Preface	ix
Chapter 1. One-Dimensional Brownian Motion	1
§1.1. Some motivation	1
§1.2. The multivariate Gaussian distribution	2
§1.3. Processes with stationary independent increments	5
§1.4. Definition of Brownian motion	5
§1.5. The construction	9
§1.6. Path properties	15
§1.7. The Markov property	21
§1.8. The strong Markov property and applications	28
§1.9. Continuous time martingales and applications	38
§1.10. The Skorokhod embedding	47
§1.11. Donsker's theorem and applications	51
Chapter 2. Continuous Time Markov Chains	57
§2.1. The basic setup	57
§2.2. Some examples	59
§2.3. From Markov chain to infinitesimal description	61
§2.4. Blackwell's example	65
§2.5. From infinitesimal description to Markov chain	68
§2.6. Stationary measures, recurrence, and transience	79
§2.7. More examples	86

Chapter 3. Feller Processes	91
§3.1. The basic setup	91
§3.2. From Feller process to infinitesimal description	98
§3.3. From infinitesimal description to Feller process	102
§3.4. A few tools	109
§3.5. Applications to Brownian motion and its relatives	119
Chapter 4. Interacting Particle Systems	133
§4.1. Some motivation	133
§4.2. Spin systems	134
§4.3. The voter model	149
§4.4. The contact process	161
§4.5. Exclusion processes	175
Chapter 5. Stochastic Integration	193
§5.1. Some motivation	193
§5.2. The Itô integral	195
§5.3. Itô's formula and applications	204
§5.4. Brownian local time	213
§5.5. Connections to Feller processes on R^1	219
Chapter 6. Multi-Dimensional Brownian Motion and the Dirichlet Problem	227
§6.1. Harmonic functions and the Dirichlet problem	228
§6.2. Brownian motion on R^n	231
§6.3. Back to the Dirichlet problem	237
§6.4. The Poisson equation	245
Appendix	247
§A.1. Commonly used notation	247
§A.2. Some measure theory	248
§A.3. Some analysis	249
§A.4. The Poisson distribution	252
§A.5. Random series and laws of large numbers	252
§A.6. The central limit theorem and related topics	253
§A.7. Discrete time martingales	258
§A.8. Discrete time Markov chains	261
§A.9. The renewal theorem	263

§A.10. Harmonic functions for discrete time Markov chains	263
§A.11. Subadditive functions	265
Bibliography	267
Index	269
