

Contents

Preface to the English Edition	xiii
Introduction	xvii
1. Gentzen’s Accomplishments	xvii
2. Aims of My Life Story of Gerhard Gentzen	xviii
3. Mathematical Logic and National Socialism: The Political Field	xix
Chapter 1. Early Youth and Abitur	1
1. Gerhard Gentzen’s Birth	1
2. Gentzen’s Mother: Melanie Gentzen (1873-1968)	1
3. Gentzen’s Paternal Grandparents and His Father: The Attorney and Court Official Dr. jur. Hans Gentzen (1870-1919)	2
4. Youth and Student Days of Hans Gentzen	3
5. Gentzen’s Maternal Grandparents: The Physician Alfons Bilharz and Adele Bilharz	4
6. The Shining Example in Gentzen’s Family Tree: The Great, Successful Physician and Natural Scientist Maximilian Theodor Bilharz (1823-1862)	9
7. Gentzen’s Sister: Waltraut Sophie Margaret Gentzen (*1911)	10
8. The Schoolchild Gerhard Gentzen	11
9. The Death of the Father Means a Move and a New School	12
10. The Beginning of Gentzen’s Intellectual Activity	12
11. Gentzen’s Success at School	15
12. The Abitur on 29 February 1928	16
Chapter 2. 1928-1938—Weimar Republic and National Socialism in Peace. From the Beginning of Studies to the Extension of the Unscheduled Assistantship for Another Year in Effect from 1 October 1938	21
1. Beginning of Studies in Greifswald	21
2. Continuation of Study in Göttingen	22
3. Is Göttingen the Centre of Mathematics for Gentzen?	23
4. Continuing Studies in Munich	23
5. A Semester in Berlin: Winter Semester 1930/31	26
6. Back in Göttingen: Saunders Mac Lane and Gentzen as the “Type of a Scientifically Oriented Man” (Richard Courant)	27
7. The Decision: Gentzen’s First Publication, “Über die Existenz unabhängiger Axiomensysteme zu unendlichen Satzsystemen” and His Programme for 1932	30

8. What Do Gentzen's Intellectual Interests and Attitude in 1931 and 1932 Appear to Be?	33
9. Political Language in Mathematics in 1918	34
10. Political Language by Hermann Weyl and David Hilbert	34
11. Whom Did Gentzen Know in Göttingen and What Did He Read?	37
12. Gentzen's Life in the Early Nazi Period. The Withdrawn Manuscript "Über das Verhältnis zwischen intuitionistischer und klassischer Arithmetik" of 15 March 1933	38
13. Gerhard Gentzen's Dissertation "Untersuchungen über das logische Schließen" of 12 July 1933	41
14. The Penetration of the Nazis into Mathematical Research at the University in Göttingen 1933 and 1934—Or, Vahlen and Bieberbach vs. Weber and Wegner	46
15. The State Examination with "Elektronenbahnen in axialsymmetrischen Feldern unter Anwendung auf kosmische Probleme" on 16 November 1933	51
16. Why Did Gentzen Join the SA?	52
17. Gentzen's Political Position: A Conjecture	53
18. Gentzen in Financial Difficulties	54
19. Financial Straits and Job Hunting	55
20. Consistency Proof for Number Theory in Discussion with Paul Bernays	57
21. "Widerspruchsfreiheit der reinen Zahlentheorie" Mirrored in the Correspondence of Bernays and Weyl	58
22. Difficulties with the "Widerspruchsfreiheit der reinen Zahlentheorie" of 11 August 1935	59
23. The Unscheduled Assistantship under Hilbert from 1 November 1935: A Productive Period for Foundational Research Begins	62
24. Consistency of Type Theory	63
25. Revising the Proof of the "Widerspruchsfreiheit der reinen Zahlentheorie"	64
26. "Die Widerspruchsfreiheit der reinen Zahlentheorie"	65
27. Gentzen Was an Intellectual Independent	69
28. Gentzen Expresses His Thanks to Turing	71
29. Correspondence between Bernays and Ackermann 1936 to 1940	72
30. The Correspondence between Bernays and Gentzen Merrily Continues	75
31. Invitation to the Parisian Descartes Congress in August 1937. The Invitation to Lecture to the DMV Conference in Bad Kreuznach on 21 September 1937: "Die gegenwärtige Lage in der mathematischen Grundlagenforschung". The Extension of the Tenure of the Unscheduled Assistantship on 1 October 1937 for a Year	77
32. Jean Cavaillès and Gerhard Gentzen	82
33. Gentzen Becomes an "Associate" of the Publication of Scholz's <i>Forschungen zur Logik und zur Grundlegung der exakten Wissenschaften</i>	84
34. "Die gegenwärtige Lage in der mathematischen Grundlagenforschung"	86
35. "Neue Fassung des Widerspruchsfreiheitsbeweises der reinen Zahlentheorie" 1938	88

36. Bernays' View of Gentzen's Programme (Second Consistency Proof)	89
37. Correspondence with Paul Bernays	93
38. Extension of the Unscheduled Position for Another Year Taking Effect 1 October 1938	97
39. Bernays' Views of Hilbert's Programme and Gentzen's Place in It	100
40. Closing Thoughts on Paul Bernays	101
41. Longer Notes	102
 Chapter 3. 1939-1942—From the Beginning of the War to Dismissal from the Wehrmacht and the Wartime Habilitation under Helmut Hasse	 117
1. 1939: At the Highpoint of Reputation	117
2. The Second Volume of <i>Grundlagen der Mathematik</i> of Hilbert and Bernays Appears	119
3. Active Military Service at the Homefront as Radio Operator by the Flugwachkommando	125
4. 1939/40: Preparation for Habilitation. "Beweisbarkeit und Unbeweisbarkeit von Anfangsfällen der transfiniten Induktion in der reinen Zahlentheorie"	128
5. 1941: Encouragement from Hellmuth Kneser	135
6. 1942: Discharge from Military Service	139
 Chapter 4. The Fight over "German Logic" from 1940 to 1945: A Battle between Amateurs	 141
A Short Preface	141
1. Ludwig Bieberbach as Supporter of the Idea That the Validity of Mathematics Be Decided through World Views	142
2. An Advocate of Racial Purity Sets the Standards in German Mathematical Logic, Where Attempts Are Made to Confuse Scientific Results with Matters of Race	143
3. Gentzen as a "Witness" for a National-Racial Interpretation of the Mathematical Foundational Research through Steck and Requard	144
4. The Somewhat Sharper Point of View of Friedrich Requard	147
5. Ludwig Bieberbach and his <i>Deutsche Mathematik</i>	150
6. NS Ideology in Mathematics through Bieberbach Receives Negative Resonance Even within His Own Camp	152
7. Ludwig Bieberbach: Representative of "German Mathematics"	153
8. A Contemporary of Bieberbach's in Exile: Johann L. Schmidt	159
9. Bieberbach and Intuitionism	160
10. Formalism and Proof Theory	160
11. Applied Mathematics as Folkish Mathematics	162
12. Nazis Criticised the Lack of Support from Mathematics	163
13. Mathematical Foundational Research Remains Unmolested by the Nazis	167
14. Attacks on Mathematical Logic from Without: Dingler, Steck, and May	169
15. The Attacked: Heinrich Scholz (1884-1956)	176
16. Bieberbach, Max Steck and Jænsch	186
17. Bieberbach and Erich Jænsch	188

18. Steck's Attack on Hilbert Leads to Bieberbach's Commissioning a Defence of Mathematical Logic by H. Scholz and Publishing It in <i>Deutsche Mathematik</i>	190
19. Interlude: May and Dingler Provide Arguments for Steck	197
20. Steck and Scholz in Dispute	202
21. Max Steck as Denouncing "Expert Witness" and Publicist	208
22. The Exception: The Dedicated National Socialist, Logician and Historian of Mathematics, Oskar Becker, Remains Neutral	216
23. Resistance as a Mathematician Was Possible under National Socialism	218
24. Kurt Reidemeister's Additional Contemplations on Politico-Scientific Power Play in "German Mathematics"	219
25. Longer Notes	221
Chapter 5. Recovery and Docent Position 1942 to 1944	233
1. Final Discharge from the German Army	233
2. Hans Rohrbach Commandeers Gerhard Gentzen to Prague through the Osenberg Initiative	234
3. Gentzen's Teaching Position in Prague: "Kepler's Laws of Planetary Motion"	236
4. The First Courses in November 1943	238
5. The Last Known Scientific Letter of Gerhard Gentzen	243
6. Gerhard Gentzen in 1944: Teaching Functions, Computing Office, and War	244
7. Hans Rohrbach's Report on the Conditions in the Mathematical Institute in Prague	246
8. Why Did Gentzen Banish Any Thought of Flight?	247
Chapter 6. Arrest, Imprisonment, Death and Nachlass	253
1. The Last Days of Freedom in the Private Sector	253
2. The Arrest of Gerhard Gentzen and the Awful Imprisonment	255
3. Gentzen's Physical Death	257
4. Is Gentzen's Death Understandable?	260
5. Rumours	261
6. Attempts to Rescue the Nachlass	263
7. The Deciphering of the Stenographic Notes	266
Conclusion	267
1. Misapprehensions about the Life of Gerhard Gentzen	267
2. Logic and Politics	267
3. Upshot	269
Tables of the Life of Gerhard Gentzen	273
Chronology	273
Contemporary Assessments of Gentzen	278
Publications of Gentzen	281
Appendix A. Gentzen and Geometry	
C. SMORYŃSKI	283

Appendix B. Hilbert's Programme	
C. SMORYŃSKI	291
1. Constructive Prologue	291
2. Problems in Paris	293
3. Hilbert and Geometry	296
4. First Steps	300
5. Enter Brouwer	301
6. Back to Hilbert	308
7. Weyl Stirs Things Up	310
8. Hilbert Responds	312
9. More on Brouwer	322
10. Outbreak of Hostilities	323
11. The Formula Game	324
12. <i>On the Infinite</i>	325
13. A Fragile Truce	327
14. "Hilbert's Programme" Is Born	329
15. Brouwer Takes Up Arms	331
16. Hilbert Finishes Off Brouwer	332
17. The Programme Expands	334
18. Gödel's Theorem	335
19. Concluding Remarks	339
Appendix C. Three Lectures	
GERHARD GENTZEN	343
1. The Concept of Infinity in Mathematics	343
2. The Concept of Infinity and the Consistency of Mathematics	350
3. The Current Situation in Research in the Foundations of Mathematics	353
Appendix D. From Hilbert's Programme to Gentzen's Programme	
JAN VON PLATO	367
1. Mathematical Proof	367
2. Hilbert's Programme	373
3. Gentzen's Programme	383
4. Later Developments in Structural Proof Theory	396
5. References	401
Bibliography	405
Index	433
