Preface to the Second Edition	xi
Preface to the First Edition	xv
Chapter 1. Bounded Linear Operators	1
1.1. Bounded Operators on Banach Spaces	1
1.2. Bounded Operators on Hilbert Spaces	5
1.3. Compact Operators on Hilbert Spaces	10
1.4. Schatten Class Operators	18
1.5. Notes	30
1.6. Exercises	30
Chapter 2. Interpolation of Banach Spaces	33
2.1. Interpolation Spaces	33
2.2. Complex Interpolation	36
2.3. $L^p$ Spaces and Schatten Classes	39
2.4. The Marcinkiewicz Interpolation Theorem	41
2.5. Notes	45
2.6. Exercises	46
Chapter 3. Integral Operators on $L^p$ Spaces	47
3.1. Hölder's Inequalities	47
3.2. Hilbert-Schmidt Integral Operators	49
3.3. Schur's Theorem	52
3.4. Integral Operators on the Unit Disk	54
3.5. Notes	61
3.6. Exercises	62
Chapter 4. Bergman Spaces	65
4.1. The Möbius Group	65
4.2. The Bergman Metric	66
4.3. Bergman Spaces	72
4.4. Kernel Functions and Related Projections	76
4.5. Atomic Decomposition	87
4.6. Notes	94
4.7. Exercises	97

Chapter 5. Bloch and Besov Spaces	101
5.1. The Bloch Space	101
5.2. The Little Bloch Space	108
5.3. Analytic Besov Spaces	114
5.4. Notes	125
5.5. Exercises	128
Chapter 6. The Berezin Transform	133
6.1. The Berezin Transform	133
6.2. The Case of Weighted Bergman Spaces	135
6.3. The Berezin Transform of Functions	141
6.4. Notes	159
6.5. Exercises	160
Chapter 7. Toeplitz Operators on the Bergman Space	163
7.1. Toeplitz Operators	163
7.2. Carleson Type Measures	166
7.3. Toeplitz Operators in Schatten Classes	173
7.4. Toeplitz Operators with Bounded Symbols	189
7.5. Commuting Toeplitz Operators with Harmonic Symbols	197
7.6. Notes	202
7.7. Exercises	204
Chapter 8. Hankel Operators on the Bergman Space	207
8.1. BMO in the Bergman Metric	207
8.2. VMO in the Bergman Metric	219
8.3. Bounded Hankel Operators	221
8.4. Compact Hankel Operators	225
8.5. Schatten Class Hankel Operators	227
8.6. Hankel Operators on the Unweighted Bergman Space	233
8.7. Little Hankel Operators	244
8.8. Notes	248
8.9. Exercises	250
Chapter 9. Hardy Spaces and BMO	253
9.1. $H^p$ Spaces	253
9.2. Carleson Measures	262
9.3. Functions of Bounded Mean Oscillation	266
9.4. Functions of Vanishing Mean Oscillation	275
9.5. Notes	279
9.6. Exercises	280
Chapter 10. Hankel Operators on the Hardy Space	285
10.1. Toeplitz Operators on $H^2$	285

## CONTENTS

ix

10.2.	Bounded Hankel Operators on $H^2$	287
10.3.	Compact Hankel Operators on $H^2$	289
10.4.	Schatten Class Hankel Operators on $H^2$	291
10.5.	Notes	299
10.6.	Exercises	301
Chapter 11.	Composition Operators	303
11.1.	Littlewood's Subordination Principle	303
11.2.	The Nevanlinna Counting Function	305
11.3.	Composition Operators on the Bergman Space	308
11.4.	Composition Operators on the Hardy Space	317
11.5.	Notes	323
11.6.	Exercises	324
	Bibliography	325
	Index	345
