Preface vii

Foreword
John Tate ix

Non-archimedean analytic geometry: first steps
Vladimir Berkovich 1

Chapter 1. Several approaches to non-archimedean geometry
Brian Conrad 9
Introduction 9
1. Affinoid algebras 10
2. Global rigid-analytic spaces 15
3. Coherent sheaves and Raynaud's theory 30
4. Berkovich spaces I 43
5. Berkovich spaces II 52
Bibliography 63

Chapter 2. The p-adic upper half plane
Samit Dasgupta and Jeremy Teitelbaum 65
Introduction 65
1. Geometry of the p-adic upper half plane 66
2. Boundary distributions and integrals 75
3. $\mathcal{L}$-invariants and modular symbols 89
4. Breuil duality and p-adic Langlands theory 106
Bibliography 119

Chapter 3. An introduction to Berkovich analytic spaces and non-archimedean potential theory on curves
Matthew Baker 123
Introduction 123
1. The Berkovich projective line 125
2. Further examples of Berkovich analytic spaces 134
3. Harmonic functions 141
4. Laplacians 150
5. Introduction to potential theory on Berkovich curves 164
Bibliography 173

Chapter 4. p-adic cohomology: from theory to practice
Kiran S. Kedlaya 175
Introduction 175
1. Algebraic de Rham cohomology 175
2. Frobenius actions on de Rham cohomology 189
3. Gauss-Manin connections 193
4. Beyond good reduction 199
Bibliography 201
