It was reported that D. H. Lehmer would give the Gibbs Lecture in January, 1965 and Martin Schwarzschild would give the 1966 Gibbs Lecture.

It was reported that the following members represented the Society: As representative at the National Council for Accreditation of Teachers Education Conference, November, 1963: A. L. Putman; as delegate at the National Academy of Science Centenary Meeting: Saunders MacLane; as representative at the Seventy-Fifth Anniversary Convocation of the Georgia Institute of Technology: Henry A. Robinson; as representative at the inauguration of Calvin A. Van der Werf as President of Hope College: James H. Powell; as delegate at the meeting of the Association for Higher Education, Washington, D. C., November, 1963: Leon Cohen.

The Council set meetings at Chicago in January, 1966 and Houston in January, 1967.

The Chelsea Publishing Company and Consultants Bureau Enterprises, Inc., were elected as Institutional Associates in the Society.

The Council voted to accept the recommendation of the Applied Mathematics Committee that the Society hold in the summer of 1965 a Summer Seminar in Relativity Theory, Cosmology, and Astrophysics.

The Editors of the Transactions reported that due to a backlog of papers it appears desirable to publish three additional volumes totaling 1600 pages during academic year 1964–65 and a recommendation on this would be presented at the next Council Meeting. The Editors asked for the advice of the Council on whether the Transactions should be more selective. It was the consensus of opinion that there should be a gradual increase in the selectivity of papers for the Transactions.

The Council discussed at some length the question of By-Title abstracts, and voted to limit to one to an author the number of such abstracts in any issue of the Notices, joint authors to be treated as a separate category. The Council also expressed satisfaction with the present practice of the limitation of the number of ten minute papers at major meetings.

The Council received an interim report of a committee appointed to study the financial aspects of Mathematical Reviews. The Committee recommended, among other things, that the Society make substantial contributions from its own funds to the support of Mathematical Reviews. A final report from the Committee is expected at the April Council Meeting.

There was a business meeting of the Society at 1:30 P.M. Thursday, January 23, in Room 110, University College, President Doob presiding.

Representing the selection committee, Professor R. H. Bing made the first and second awards of the Veblen Prize in Geometry to Dr. C. D. Papakyriakopoulos of Princeton University and Professor Raoul Bott of Harvard University. The memoirs on which Dr. Papakyriakopoulos' award were made were On solid tori, Proc. London Math. Soc. 7 (1957), 281–299, and On Dehn's lemma and the asphericity of knots, Ann. of Math. 66 (1957), 1–26. Those of Professor Bott were The space of loops on a Lie group, Michigan Math. J. 5 (1958), 35–61, and The stable homotopy of the classical groups, Ann. of Math. 70 (1959), 313–337.

President Doob then made the tenth award of the Bocher Prize in Analysis to Professor Paul J. Cohen, of Stanford University for his paper On a conjecture of Littlewood and idempotent measures, Amer. J. Math. 82 (1960), 191-212.

All three prize winners gave short talks on their works.

The Secretary reported briefly on the affairs of the Society. At the call for new business, Professor N. D. Kazarinoff made the following motion:

Resolved:

"That Mathematical Reviews be an autonomous activity of the American Mathematical Society and that Mathematical Reviews shall be operated on the following basis:

"The power to edit, produce, and sell that journal known as Mathematical Reviews is given by the American Mathematical Society to the Mathematical Reviews Editorial Board: The Mathematical Reviews Editorial Board grants executive authority to carry out all activities and business entailed in editing, producing, and selling Mathematical Reviews to the Executive Editor and Business Manager under its direction. The Mathematical Reviews Editorial Board with the support and advice of its Executive Editor and Business Manager presents annually on June 15 a complete financial report to the Treasurer of the American Mathematical Society and a budget by March 15. The annual budget of Mathematical Reviews is that budget approved by the Trustees.

"The Treasurer of the American Mathematical Society grants the annual subsidy to Mathematical Reviews in twelve equal installments. The first two are paid on June 1. The remaining are paid one at the end of each of the following 10 months.

"The Editorial Board is empowered, subject to approval by the Trustees, to ask for and receive grants from the American Mathematical Society, U. S. Government, sponsoring societies, and private sources for the support of Mathematical Reviews."

Professor Doob ruled the motion out of order as not appropriate to come before a Business Meeting. Professor Zippin requested that the motion appear in the Minutes of the Business Meeting.

Professor M. S. Hendrickson inquired about the selection of papers to be given in the special sessions at the Miami Meeting and whether any had been selected from In-Person abstracts submitted for presentation. Professor Green explained that all abstracts submitted for presentation at the Miami Meeting had been examined by the Associate Secretary in charge of the program and those in each of the subject fields of the special sessions were referred to the chairman in charge of the session. As a result several of the papers presented at these sessions were selected from the submitted abstracts.

Professor Deane Montgomery then introduced a motion that it was the sense of the Business Meeting that Mathematical Reviews should get more autonomy. Professor Green then pointed out that new business could not be acted on without prior notice unless unanimous consent was obtained. Professor L. J. Paige argued that it was inappropriate to take action when there was a Committee of the Society charged with investigating this matter and introduced a

motion to table Professor Montgomery's resolution, which was passed.

Professor Lipman Bers called the attention of those present to the presence at the Meeting of Professor H. A. Lavrent'ev, Vice President of the Soviet Academy of Sciences.

The Meeting adjourned at 3:15.
