1973 Election Results	368

Members of the Council for 1974

Robert G. Bartle, Hyman Bass, Paul T. Bateman, Anatole Beck, Lipman Bers, Raoul H. Bott, James H. Bramble, Fred Brauer, Glen E. Bredon, William Browder, Edgar H. Brown, Jr., Alberto P. Calderón, S. S. Chern, Philip T. Church, W. Wistar Comfort, Charles W. Curtis, Samuel Eilenberg, Jacob Feldman, Robert M. Fossum, Frederick W. Gehring, Richard R. Goldberg, Michael Golomb, Walter H. Gottschalk, Mary W. Gray, Paul R. Halmos, Orville G. Harrold, Jr., Alston S. Householder, Eugene Isaacson, Irving Kaplansky, Herbert B. Keller, John L. Kelley, Harry Kesten, Robion C. Kirby, Alistair H. Lachlan, Lee Lorch, Saunders Mac Lane, Arthur P. Mattuck, Edwin E. Moise, Cathleen S. Morawetz, P. S. Mostert, Barbara L. Osofsky, Franklin P. Peterson, Everett Pitcher, Murray H. Protter, Dock S. Rim, Kenneth A. Ross, Jane Cronin Scanlon, Jacob T. Schwartz, Robert T. Seeley, Allen L. Shields, I. M. Singer, Shlomo Sternberg, Dorothy Maharam Stone, Olga Taussky, François Treves, Hans F. Weinberger, John W. Wrench, Jr.

CONTENTS

March, 1974

J. T. Schwartz. Semantic and syntactic issues in programming	185
Mary-Elizabeth Hamstrom. Homotopy in homeomorphism spaces, TOP and PL	207
A. Ionescu Tulcea. On measurability, pointwise convergence and compactness	231
Elections to membership	237
Colloquium in combinatorial theory, Rome	238
M. Cantor. Sobolev inequalities for Riemannian bundles	239
Su-Shing Chen. On Lobatchewsky manifolds	244
C. A. Robinson. Stable homotopy theory over a fixed base space . .	248
G. B. Folland and E. M. Stein. Parametrices and estimates for the $\bar{\delta}_b$ complex on strongly pseudoconvex boundaries	253
Robert Sharpley. Interpolation of operators for Λ spaces	259
Michael J. Fisher. Properties of three algebras related to L_p - multipliers	262
Michael Anshel and Peter Stebe. The solvability of the conjugacy problem for certain HNN groups	266
John N. Mather. Simplicity of certain groups of diffeomorphisms .	271
Richard A. Hunt and Wo-Sang Young. A weighted norm inequality for Fourier series	274
Robert J. Sacker and George R. Sell. A note on Anosov diffeo- morphisms	278
Melvin Hochster and Joel L. Roberts. Actions of reductive groups on regular rings and Cohen-Macaulay rings	281
Daniel Drucker. Orbit structure of the exception Hermitian sym- metric spaces. I	285
Burton Fein and Murray Schacher. Finite subgroups of finite dimen- sional division algebras	290
Robert F. Brown. Fixed points of endomorphisms of compact groups	293
Ching Chou. Weakly almost periodic functions with zero mean	297
James O. Stevenson. Holomorphy of composition	300
William Thurston. Foliations and groups of diffeomorphisms . . .	304
Umberto Mosco and Gilbert Strang. One-sided approximation and variational inequalities	308
Richard Bouldin. Positive near-approximants and some problems of Halmos	313
M. D. Choi and Chandler Davis. The spectral mapping theorem for joint approximate point spectrum	317
C. Vaseekaran. Equivariant homotopy theory	322
