

B

QVONIAM vero de sphaera circulis verba fecimus, non abs re fuerit, paucis indicare, quoniam pacto ex ipsis sphaera materialis sit componenda, vel ob hanc solam utilitatem, ut iudicium ferre possimus de quacunq; sphaera, num rite sit fabricata, & composita. Primo igitur parentur ex aliqua materia tres circuli inter se omnino aequales, diuisiq; in 360. partes aequales, quas gradus diximus appellari; Quorum duo ita coniungantur, ut se inuicem ad angulos aequales, nimirum rectos sphaerales secant in duobus punctis, per quæ extendatur axis mundi; eruntq;
