Appendix VII

Four-Year Statistics Questionnaire

SURVEY OF UNDERGRADUATE PROGRAMS IN THE MATHEMATICAL SCIENCES

General Information

Statistics Questionnaire

As part of a random sample, your department has been chosen to participate in the NSF-funded CBMS2015 National Survey of Undergraduate Mathematical Sciences Programs. The presidents of all U.S. mathematical sciences organizations have endorsed it and ask for your cooperation, even though it is a very complicated survey.

We assure you that no individual departmental data, except the names of responding departments, will be released.

This survey provides data about the nation's undergraduate statistical effort that is available from no other source. You can see the results of a similar survey fielded five years ago by going to www.ams.org/cbms, where the CBMS 2010 report is available online.

All departments in this survey are in universities and colleges that offer at least a bachelor's degree.

They may or may not offer an undergraduate major in statistics. Most of the statistics departments in our random sample also offer higher degrees in statistical sciences.

We have classified your department as belonging to a university or four-year college. If this is not correct, please contact Ellen Kirkman, Survey Director, at 336-758-5351 or at Kirkman@wfu.edu.

Please report on undergraduate programs in the statistical sciences (including probability) that are under the direction of your department. Do not include data for other departments or for branches or campuses of your institution that are budgetarily separate from your own. Also, if your department is broader than just statistics (e.g., Department of Statistics and Computer Science or Statistics and Operations Research), please report on all the courses offered by your department.

This survey may be completed either online or using a hard-copy questionnaire. We recommend using the online system because it will do some of the work for you; e.g., it will automatically skip those questions that are not applicable (based on the response you give), gray out portions of questions that do not apply, remind you of previous responses, and provide definitions when you let your cursor hover over certain highlighted words.

If you have any questions while filling out this survey form, please call the Survey Director, Ellen Kirkman, at 336-758-5351 or contact her by e-mail at Kirkman@wfu.edu. For help with the online questionnaire, call Westat at 855-680-1849 or send an email to cbms2015@westat.com.

Please return your completed questionnaire by October 31, 2015, either online or by mailing a hard copy to:

CBMS Survey Westat 1600 Research Boulevard, RB 3103 Rockville, MD 20850-3129

Please retain a copy of your responses to this questionnaire in case questions arise.

B. Dual-Enrollment Courses

Statistics Questionnaire

Definition: We use the term <u>dual-enrollment courses</u> to refer to courses <u>conducted on a high school campus</u> and taught <u>by high school teachers</u>, for which high school students may obtain high school credit and, simultaneously, college credit through your institution.

	Does your department particip	ate in any dual-e	nrollment progra	ms of this type?
	Yes	——— If `	Yes, go to B2.	
	No	→ If	No, go to B4.	
B2.	Please complete the following for the previous term (spring 2	•	•	ment program (as defined above) 015.
			tal ollments	
	Course	Last Term= Spring 2015	This Term= Fall 2015	
	a. Statistics			
B3.	Are the high school instructors participate in a teaching evaluates			·

B. Dual-Enrollment Courses (continued)

Statistics Questionnaire

B4.	Does your department assign any of <u>its own full-time</u> or part-time faculty to teach courses conducted <u>on a high school campus</u> for which high school students may receive both high school and college credit (through your institution)?
	Yes ☐ — If Yes, go to B6.
	No ☐ → If No, go to Section C.
B5.	In Fall 2015 how many students are enrolled in the courses conducted <u>on a high school campus</u> and taught by your full-time or part-time faculty and through which high school students may receive both high school and college credit (through your institution)?
	Number of students
B6.	Does your institution participate in a program that allows high school students to enroll in statistics courses <u>on your campus</u> for high school credit and, simultaneously, college credit?
	Yes
	No

In subsequent sections we ask about course enrollments in your department; please do not include any of the enrollments reported in this Section B.

C. Distance Learning

Statistics Questionnaire

Definition: Distance learning courses are those courses offered by your institution for credit, in which the majority of the instruction occurs with the instructor and the students separated by time and /or place (e.g. courses in which the majority of the course is taught online, or by computer software, or by other technologies) including MOOCs that are offered for credit. (a MOOC is a "massive open online course").

C1.	Does your institution give (transfer) credit for any distance learning courses in statistics that are not taught by faculty in your institution?
	Yes
	No
C2.	Does your institution have a specific limit on the number of credits earned (or number of courses taken) in distance learning classes that may be counted toward graduation?
	Yes
	No
C3.	Has your department taught any distance learning courses during the calendar years 2013-2015?
	Yes go to C4.
	No ☐ — If No, skip to Section D.
C4.	Which best characterizes the format/structure of the majority of your distance learning courses? (Check one box)
	Completely online: Instruction takes place completely online
	Blended/Hybrid: Instruction takes place in a combination of face-to-face and online formats
	Other
C5.	Which one response best describes the general pattern for how the instructional materials used in your distance learning courses are determined? (Check one box.)
	Course instructors create materials
	Course instructors choose commercially produced materials
	Course instructors choose a combination of both

C. Distance Learning (continued)

C6.	In most of your distance learning courses, how are the majority of the tests administered? (Choose one response.)
	Not monitored (e.g., online or by correspondence)
	Online, but using some kind of monitoring technology
	At a monitored testing site
	Combination of the above
C7.	Are there any courses that you offer in both non-distance learning and in distance learning formats?
	Yes If Yes, go to C8 below.
	No ☐ — → If No, go to C10.
C8.	Do the course instructors in your distance learning courses generally: (Check one response on each line.)
	Yes No
	 a. Hold office hours to meet with students on campus as in comparable non-distance learning courses taught on campus?
	b. Participate in evaluation of instruction in the same way as faculty who teach comparable non-distance learning courses?
C9.	Which, if any, of the following practices apply to the majority of distance learning courses in your department? (Check one response on each line.)
	Yes No
	a. Same common departmental tests and examinations as in the non-distance-learning course
	b. Same common course as in the non-distance-learning course
	c. Same course projects as in the non-distance-learning course
	d. More course projects than in non-distance-learning course
C10.	In the three calendar years 2013-2015 has your department taught (for credit) any distance learning courses that could be characterized as a MOOC?
	Yes If Yes, go to C11 below.
	No If No, go to Section D.

C. Distance Learning (continued)

C11.	In which of the following content areas has your department taught a MOOC (for credit) during 2013-2015? (Check all that apply.)
	☐ Introductory Statistics
	☐ Statistics course requiring previous statistical knowledge
	Teacher Preparation
	Other (specify)
C12.	What is the total number of students enrolled in MOOCs (for credit) offered by your department in Fall 2015?

D. Faculty Profile (Fall 2015)

Statistics Questionnaire

Please indicate whether the following types of faculty are actively teaching one or more courses in fall 2015.

Definitions

- Full-time faculty. Faculty who are full-time employees in the institution and more than half-time in the department. For example, if a tenured physics professor with a joint appointment in your department teaches a total of two courses in fall 2015, with exactly one being in your department (i.e., statistics is 50% of the fall teaching assignment), then that person would be counted as part-time in your department.
- Permanent faculty. If your institution does not recognize tenure, please report fulltime departmental faculty who are permanent on line D1a and report all other faculty on the remaining lines as appropriate.
- Other full-time faculty. Full-time faculty who are not tenured or tenure-eligible, faculty with renewable positions, postdoctoral faculty, visiting faculty.

Face	ultu Tuno	Teach in I	Fall 2015
raci	ılty Type	Yes	No
D1.	Full-time faculty		
	a. Tenured or tenure-eligible faculty		
	b. Other full-time faculty		
D2.	Part-time faculty		
D3.	Graduate teaching assistant(s) who teach courses independently (not counting the teaching of recitation sessions)		

Statistics Questionnaire

Probability and Statistics Courses (Fall 2015)

the numbers of each kind of faculty (tenure-eligible, part-time, etc.) who are teaching the course. Also, you may not teach some of your advanced courses In the next several pages, you will enter data about courses your department is teaching. For each course that is taught, you will be asked to enter the fall 2015 enrollment and the number of sections of the course. Depending upon the type of course, you will be asked about distance learning enrollment and in every term; for those courses we also ask whether the course was offered in spring 2015 or will be offered in spring 2016 (please combine the winter and spring terms if your institution uses the quarter system); please answer these questions regardless of whether you offer the courses in fall 2015.

The following instructions apply throughout Section E (pages 8-11).

- courses in which the majority of the course is taught online, or by computer software, or by other technologies), including MOOCs that are Report distance learning enrollments separately from other enrollments. Distance learning courses are those courses offered by your institution for credit, in which the majority of the instruction occurs with the instructor and the students separated by time and /or place (e.g. offered for credit. (A MOOC is a "massive open online course").
- conducted on <u>a high school campus,</u> taught by a high school teacher, and allows students to receive high school credit and, simultaneously, college credit from your institution for the course. These courses were reported in Section B.) Do NOT include any dual-enrollment sections or enrollments in these tables. (In this questionnaire, a dual-enrollment section is one that is
- For Introductory Statistics classes, you will be asked to list separately classes taught in a large lecture format (with recitation/problem/laboratory example, you will be asked for both the number of large lecture courses (E1-1 column c) and the total number of recitation sections for all the large lectures (E1-2 column c). There are other formats for handling large classes, but please treat any large class that is broken up into smaller units as a "lecture/recitation" class (even if there is no lecture); if neither the lecture/recitation or individual class format seems an sections) and sections that meet as a class with an instructor at a regularly scheduled time (and do not split into recitation sections). For appropriate description of the enrollment, enter the enrollment under "other"
- For all courses except as marked in E1 and E2, please do not treat recitation sessions as separate sections. Instead, please treat both the ecture component and any associated recitation sessions as a single section
- Report a section of a course as being taught by a *graduate teaching assistant (GTA*) if and only if that section is taught independently by the GTA, i.e., when it is the GTA's own course and the GTA is the instructor of record.
- other full-time faculty in column (e). If your institution does recognize tenure but has faculty with renewable contracts, report these faculty as If your institution does not recognize tenure, report sections taught by your permanent full-time faculty in column (d) and sections taught by other full-time faculty (column e)
- tenure-eligible, or permanent in your department should be counted in column (f) if their fall 2010 teaching in your department is less than or Full-time faculty teaching in your department and holding joint appointments with other departments should be counted in column (d) if they professor with a joint appointment in your department teaches a total of two courses in fall 2015, with exactly one being in your department, are tenured, tenure-eligible, or permanent (if your institution does not recognize tenure) in your department. Faculty who are not tenured, equal to 50% of their total fall teaching assignment, and they should be reported in column (e) otherwise. (Example: If a tenured physics then that person would be counted as part-time in your department.)
- Do not fill in any shaded boxes.
- Any unshaded box that is left blank will be interpreted as reporting a count of zero.
- Except where specifically stated to the contrary, the tables in Section E deal with enrollments in fall term 2015
- If a section is co-taught by multiple faculty, categorize the section in terms of the most senior faculty member teaching that course.
- If your department is broader than just statistics (e.g., Department of Statistics and Computer Science or Statistics and Operations Research), please use E24 to report on the courses outside of probability and statistics.
 - If a course is cross-listed in both statistics and another department (such as mathematics, psychology, or engineering), count all students regardless of how the course is listed on the students' transcripts.

Probability and Statistics Courses (Fall 2015) (continued) ш

Statistics Questionnaire

◆ Cells left blank will be interpret	erpreted a	ed as zeros.			Of the n how many s	Of the number in column (c), how many sections are taught by:	umn (c), aught by:

F. Undergraduate Program (Fall 2015)

F. U	Indergraduate Program (Fall 2015)	Statistics Questionnaire
If you	u do not offer a major in statistics, check here \square and go to F5. Otherwise go to	F1.
F1.	Report the total number of your departmental majors who received their bachelor's degrees from your institution between July 1, 2014, and June 30, 2015. Include joint majors and double majors ¹	

Of the undergraduate degrees described in F1, please report the number who majored in each of the following categories. Each student should be reported only once. Include all double and joint majors¹ in your totals. Use the Other category for a major in your department who does not fit into one of the earlier categories.

	Area of Major	Male	Female
a.	Statistics		
b.	Biostatistics		
C.	Actuarial Science		
d.	Joint ¹ Statistics and Computer Science		
e.	Joint ¹ Statistics and Mathematics		
f.	Joint ¹ Statistics and (Business or Economics)		
g.	Statistics Education		
h.	Other		

¹ A "double major" is a student who completes the degree requirements of two separate majors, one in statistics and one in another program or department. A "joint major" is a student who completes a single major in your department that integrates courses from statistics and some other program or department and typically requires fewer credit hours that the sum of the credit hours required by the separate majors.

F4.

F. Undergraduate Program (Fall 2015) (continued)

F9.		hich of the following factors were significant reasons for the changes made to the kinds dagogy used in your department over the last ten years? (Check all that apply.)		
	a.	Educational research		
	b.	Advocacy of some faculty member in our department		
	C.	Advocacy by another department		
	d.	Advocacy by institution's administrators		
	е.	Advocacy by a professional organization		
F10.		r each of the following opportunities, indicate whether or not it is available dergraduate statistics students through your department or institution.		
			Yes	No
	a.	Honors sections of departmental courses		
	b.	An undergraduate statistics club		
	C.	Special statistics programs to encourage women		
	d.	Special statistics programs to encourage minorities		
	e.	Opportunities to participate in statistics contests		
	f.	Special statistics lectures/colloquia not part of a statistics club		
	g.	Statistics outreach opportunities in local K–12 schools		
	h.	Undergraduate research opportunities in statistics		
	i.	Independent study opportunities in statistics		
	j.	Assigned faculty advisers in statistics		
	k.	Opportunity to write a senior thesis in statistics		
	l.	A career day for statistics majors		
	m.	Special advising about graduate school opportunities in statistical sciences		
	n.	Opportunity for an internship experience or part-time employment in a professional statistical opportunity		
	0.	Opportunity to participate in a senior seminar		
	p.	Supervised consultation working in a consulting lab with clients		
	q.	Opportunity to tutor, grade papers, or TA in the department		

F11.	Give your best estimate of the number of all of your majors who have participated in each of the following activities over the past year September 1, 2014 – August 31, 2015;
	a. Undergraduate research project in statistics b. Internship in statistics c. Statistical consulting to client
F12.	a. Does your department offer a minor in statistics?
	Yes ☐ — If Yes, go to F12b.
	No ☐ → If No, go to F13.
	F12.b. How many students graduated with a minor in statistics from your department between July 1, 2014 and June 30, 2015?
F13.	Does your institution allow a student to meet an institutional or divisional graduation requirement in the mathematical sciences using an Advanced Placement course (taken while the student was in high school)?
	Yes
	No

F14.	Responses to this question will be used to project total enrollment in the current (2015-2016) academic year based on the pattern of your departmental enrollments in 2014–2015. Do NOT include any numbers from dual-enrollment courses in answering question F14. Please provide head counts, not full-time equivalents.
	1
	a. Previous fall (2014) total student enrollment in <u>your department's</u> undergraduate courses (remember: do not include dual-enrollment courses¹):
	b. Previous academic year (2014–2015) total enrollment in <u>your department's</u> undergraduate courses, <u>excluding</u> dual enrollments and excluding enrollments in summer school 2015:
	c. Total enrollment in <u>your department's undergraduate courses in summer school 2015:</u>
	his question, the term "dual enrollment courses" is used to mean courses taught on a high school campus

¹ In this question, the term "dual enrollment courses" is used to mean courses taught <u>on a high school campus</u> by high school teachers, for which high school students may obtain high school credit and, simultaneously, college credit through your institution.

G. Introductory Statistics Instruction

Statistics Questionnaire

The following questions are about instruction in course E1: Introductory Statistics for non-majors/minors (no calculus prerequisite) on page 9.

G1.	. How many different kinds of introductory statistics courses designed for non-majors (general education courses) that have no calculus prerequisite does your department offer? (e.g. statistics for social scientists, for life scientists, etc.)			
	1			
	2			
	3			
	More than 3			
prere	ollowing questions are about instruction in course E1: Introductory Statistics (no calculus quisite) on page 9. If you offer more than one such course, choose the course that is aimed at the general audience.			
G2.	In most sections of course E1, the percentage of class sessions in which real data are used is generally approximately:			
	0-20%			
	21-40%			
	41-60%			
	61-80%			
	81-100%			
G3.	In most sections of course E1, the percentage of class sessions in which in-class demonstrations			
G3.	and/or in-class problem solving activities/discussions generally take place is approximately:			
	0-20%			
	21-40%

G. Introductory Statistics Instruction (continued)

mathematical sciences, at your institution.

<u> </u>	ntroductory statistics instruction (continued)	Statistics	zuestionnaii
G4.	Which, if any, of the following kinds of technology are used in the majority of sE1?	sections of	course(s
		Yes	No
	a. Graphing calculators		
	b. Statistical packages (e.g., R, JMP,SAS, SPSS, Minitab)		
	c. Educational software(e.g. software linked to the textbook)		
	d. Applets		
	e. Spreadsheets (e.g. Excel, GoogleDocs, Access)		
	f. Web-based resources including data sources or data analysis		
	g. Classroom response systems (e.g., clickers)		
	a. Online textbooks		
	b. Online videos		
G5.	Do the majority of the sections of course(s) E1 require assessments beyond and quizzes (assessments such as projects, oral presentations, written report		exams,
	Yes		
	No		
G6.	Which, if any, of the following topics are covered in the course E1? (Check all	I that apply.	.)
	a. Conditional probability		
	b. Simulation to explore randomness		
	c. c. Resampling techniques (e.g. bootstrapping, randomization tests)		
	d. None of these topics		
G7.	Are there other introductory statistics courses at your institution, offered by de of the mathematical sciences?	epartments	outside
	Yes If Yes, go to G8.		
	No ☐ → If No, go to Section H.		
G8.	Enter the Fall 2015 total enrollment in all such introductory courses, offered o	utside of th	е

H. Pre-service Teacher Education in Statistics

Statistics Questionnaire

Question regarding the statistical preparation for secondary (generally grades 9-12) pre-service teachers of statistics:

H1. Considering the teacher preparation program at your institution, for each of the following core areas indicate whether the core area is required of all students seeking certification that leads to obtaining credentials to teach statistics at the secondary school level (generally grades 9-12) in public high schools of your state, if the course is generally taken by those seeking certification (if it is not required), and if in that core area your department offers a special course that is specifically designed for pre-service secondary statistics teachers.

Course		Required		Generally Taken		Special Course Offered	
		Yes	No	Yes	No	Yes	No
a.	Introductory Statistics						
b.	Probability						
	Probability and/or statistics with calculus prerequisite						
d.	Upper level statistics course						
e.	Applied statistics course						
f.	Other (name)						
H2.	H2. How many semester hours of courses in statistics from your department are required by your institution's program of certification for pre-service middle grades (6-8) teachers?						
H3.	H3. How many semester hours of courses in statistics from your department are required by your institution's program of certification for pre-service elementary grades (K-5) teachers?						

Statistics Questionnaire

I. Comments and Suggestions

<u> </u>	
If you found some question(s) difficult to interpret or answer, please let us know. We welcom to improve future surveys (e.g., CBMS 2020).	ne suggestions
Comments:	

Thank you for completing this questionnaire. We know it was a time-consuming process and we hope that the resulting survey report, which we hope to publish in spring 2017, will be of use to you and your department.

Please keep a copy of your responses to this questionnaire in case questions arise.
