Titles in this Series

- VOLUME 1** **Markov random fields and their applications**
Ross Kindermann and J. Laurie Snell
- VOLUME 2** **Proceedings of the conference on integration,
topology, and geometry in linear spaces**
William H. Graves, Editor
- VOLUME 3** **The closed graph and P-closed graph
properties in general topology**
T. R. Hamlett and L. L. Herrington
- VOLUME 4** **Problems of elastic stability and vibrations**
Vadim Komkov, Editor
- VOLUME 5** **Rational constructions of modules
for simple Lie algebras**
George B. Seligman
- VOLUME 6** **Umbral calculus and Hopf algebras**
Robert Morris, Editor
- VOLUME 7** **Complex contour integral representation
of cardinal spline functions**
Walter Schempp
- VOLUME 8** **Ordered fields and real algebraic geometry**
D. W. Dubois and T. Recio, Editors
- VOLUME 9** **Papers in algebra, analysis and statistics**
R. Lidl, Editor
- VOLUME 10** **Operator algebras and K-theory**
Ronald G. Douglas and Claude Schochet, Editors
- VOLUME 11** **Plane ellipticity and related problems**
Robert P. Gilbert, Editor
- VOLUME 12** **Symposium on algebraic topology
in honor of José Adem**
Samuel Gitler, Editor

Titles in this series

- VOLUME 13** **Algebraists' homage: Papers in ring theory and related topics** Edited by
S. A. Amitsur, D. J. Saltman and G. B. Seligman
- VOLUME 14** **Lectures on Nielsen fixed point theory**
Boju Jiang
- VOLUME 15** **Advanced analytic number theory.**
Part I: Ramification theoretic methods
Carlos J. Moreno
- VOLUME 16** **Complex representations of $GL(2, K)$
for finite fields K**
Ilya Piatetski-Shapiro
- VOLUME 17** **Nonlinear partial differential equations**

TABLE OF CONTENTS

Preface 1x

Papers Submitted

Part I

Theoretical problems and numerical results for nonlinear conservation laws J. GLIMM	1
Quasilinear hyperbolic partial differential equations and the mathematical theory of shock waves T. P. LIU	9
Analytical solutions of the Helmholtz equations C. BARDOS	21
Large time regularity of viscous surface waves J. T. BEALE	31
Shock waves and the Boltzmann equation R. CAFLISCH AND B. NICOLAENKO	35
Formation of singularities for nonlinear hyperbolic partial differential equations K. S. CHENG	45
Conservation laws R. DiPERNA	57
Recent results for hyperbolic conservation laws J. GREENBERG	61
On the smoothing of initial discontinuities and the development of singularities in certain quasilinear hyperbolic equations D. HOFF	67
Non-strictly hyperbolic systems of conservation laws: formation of singularities B. KEYFITZ AND H. KRANZER	77

On the variable sign penalty approximation of the Navier-Stokes equations H. KHESHI AND M. LUSKIN	91
Initial boundary value problems for the equations of motion of compressible viscous fluids A. MATSUMURA AND T. NISHIDA	109
Convergence of finite difference approximations to nonlinear hyperbolic systems T. NISHIDA AND J. SMOLLER	117
Linearized stability of extreme shock profiles for systems of conservation laws with viscosity R. PEGO	125
On some "viscous" perturbations of quasi-linear first order hyperbolic systems arising in biology M. RASCLE	133
Systems of conservation laws with coinciding shock and rarefaction curves B. TEMPLE	143
Computational synergetics and mathematical innovation: waves and vortices N. J. ZABUSKY	153
<u>Part II</u>	
Reaction and diffusion in carbon combustion N. AMUNDSON	165
Bifurcation for colinear solutions to a reaction-diffusion system D. BARROW AND P. BATES	179
Travelling wave solutions to reaction-diffusion systems modeling combustion H. BERESTYCKI, B. NICOLAENKO AND B. SCHEURER	189
Stable equilibria with variable diffusion M. CHIPOT AND J. HALE	209
Diffusion and the predator-prey interaction: steady-state with flux at the boundaries E. CONWAY	215
Asymptotic flow theory with complex chemistry P. FIFE AND B. NICOLAENKO	235

Strongly nonlinear detonations R. GARDNER	257
Differential equations and convergence almost everywhere in strongly monotone semiflows M. HIRSCH	267
Some ideas in the proof that the Fitz-Hugh-Nagumo pulse is stable C. JONES	287
Diffusion induced chaos J. KEENER	293
Monotone and oscillatory equilibrium solutions of a problem arising in population genetics H. KURLAND	323
Some convection diffusion equations arising in population dynamics M. MIMURA	343
Finite-dimensional attracting manifolds in reaction-diffusion equations X. MORA	353
Travelling wave solutions of multi-stable reaction-diffusion equations D. TERMAN	361
<u>Part III</u>	
Creation and breaking of self-duality symmetry - a modern aspect of calculus of variations M. BERGER	379
Multiple solutions for a problem in buoyancy induced flow S. HASTINGS AND N. KAZARINOFF	395
Frequency plateaus in a chain of weakly coupled oscillators N. KOPELL	401
A system of nonlinear pde's arising in the optimal control of stochastic systems with switching costs S. BELBAS AND S. LENHART	405
L^1 stability of travelling waves with applications to convective porous media flow S. OSHER AND J. RALSTON	409
A one variable map analysis of bursting in the Belousov-Zhabotinskii reaction J. RINZEL AND W. TROY	411

Stable and unstable states of nonlinear wave equations	
W. STRAUSS	429
Equilibrium states of an elastic conductor in a magnetic field: a paradigm of bifurcation theory	
P. WOLFE	443

PREFACE

This is the volume of the proceedings of a conference on Nonlinear Partial Differential Equations, which took place from June 20 - 26, 1982, at the University of New Hampshire in Durham, New Hampshire. The conference was sponsored by the American Mathematical Society, and was funded by the National Science Foundation.

There were 67 participants, of which 16 people gave 1 hour talks, 17 people gave 1/2 hour talks and there were 11 informal 1/2 hour evening talks. In addition there was an informal session on computational and numerical aspects of shock waves.

The theme of the conference was on time-dependent nonlinear partial differential equations; in particular, the majority of the speakers lectured either on shock waves or reaction-diffusion equations and related areas. The first day speakers were asked to give an overview of their field: to describe the main results, and the open problems.

Perhaps the most interesting feature of this conference was the constant interplay between analysis, topology and computational methods.

I would like to thank the members of the organizing committee, consisting of C. Conley, P. Fife, T. P. Liu for their help and constant encouragement.

I am extremely grateful to Carole Kohanski for doing a superb job of making the arrangements, and for being so helpful (and cheerful!) throughout the week.

Joel Smoller
