FOREWORD

These Proceedings collect most of the lectures given at the Conference on Algebraic Topology held at the campus of Memorial University of Newfoundland in St. John's, from August 6 to 12, 1983. They also include three papers, one by I. Berstein, one by J. Roitberg, and one by J. Stasheff, who could not attend the meeting.

The Conference, and the Workshop which preceeded it, were organized by H. Glover, I. James, A. Liulevicius, R. Piccinini and D. Sjerve; they were supported financially by the Natural Sciences and Engineering Research Council of Canada.

All papers printed here were carefully refereed by external referees, to whom we give our sincere thanks.

These Proceedings are dedicated to Peter Hilton, on the occasion of his 60th birthday, and in whose honor the Conference was held.
