## PREFACE

After an Olympic styled intermission of four years, the Mathematisches Forschungsinstitut Oberwolfach reconvened a conference on abelian groups August 1-7, 1993. During a week of beautiful sunshine on the Schwarzwald forest, enlightening talks and bright ideas for new research were emanating from the Institute.

The conference was organized by two local participants, Rüdiger Göbel of Essen and Wolfgang Liebert of München, along with Paul Hill of the United States. It brought together forty-seven participants from all over the world with five continents represented. For the first time in a long series of conferences on abelian groups at Oberwolfach, researchers from Russia and other Eastern bloc countries were in attendance.

The broad geographic scope of the conference yielded world-wide interaction among specialists in abelian groups. Moreover, the conference attracted researchers from other areas of mathematics as well. Indeed, as if reverting to the sixteenth-century concept of the smaller planet being the center of gravity, the conference seemed to have a variety of topics revolving around abelian groups – if only for a week. Experts from model theory, set theory, noncommutative groups, module theory, and from computer science discussed problems in their fields that relate to abelian group theory.

These international conferences on abelian groups have established a tradition of paying tribute to pioneer contributors to the subject such as Prüfer, Ulm, and Baer. This time a more contemporary figure has been selected. We have chosen someone who has been a faithful friend, dedicated advisor, and an inspiring colleague to most who are currently active including the participants of this conference and the contributors to these Proceedings. Certainly, R. S. Pierce was that and more.

Although Pierce had a wide interest in mathematics, he seemed to have a special place in his heart for abelian groups. He made significant contributions to the structure theory of both torsion and torsion-free groups. One of his favorite topics was endomorphisms of abelian groups. After Pierce had become seriously ill, he still made every effort to attend all the major conferences on abelian groups. His interest in what was going on in the subject apparently never waned even over a protracted illness.

The editors invited several people who had a special relationship to R. S. Pierce or his work to contribute papers. We express our appreciation to these and other authors who have made this volume a worthy tribute.

Rüdiger Göbel (Essen)  
Paul Hill (Auburn)  
Wolfgang Liebert (München)

## CONFERENCE PARTICIPANTS

David M. Arnold	Baylor University
Khalid Benabdallah	University of Montreal
Ekatarina Blagoveshchenskaya	University of St. Petersburg
Andreas Blass	University of Michigan
Danny Carrol	Dublin Institute of Technology
Manfred Droste	University of Essen
Manfred Dugas	Baylor University
Theodore Faticoni	Fordham University
Temple Fay	University of Southern Mississippi
Steve Files	University of Arizona
Alexander Fomin	Pedagogical State University of Moscow
Laszlo Fuchs	Tulane University
Anthony Giovannitti	University of Southern Mississippi
Rüdiger Göbel	University of Essen
Brendan Goldsmith	Dublin Institute of Technology
Jutta Hausen	University of Houston
Paul Hill	Auburn University
Wilfrid Hodges	University of London
Kin-ya Honda	Meisei University
Patrick Keef	Whitman College
Franz-Viktor Kuhlmann	University of Heidelberg
Reiff Lafleur	University of Connecticut
Wolfgang Liebert	Technical University of Munich
Adolf Mader	University of Hawaii
Menachem Magidor	Hebrew University of Jerusalem
Warren May	University of Arizona
Claudia Metelli	University of Naples
Ray Mines	New Mexico State University
Otto Mutzbauer	University of Würzburg
Loyiso Nongxa	University of the Western Cape
Juha Oikkonen	University of Helsinki
Adalberto Orsatti	University of Padova
Mohamed Ould-Beddi	University of Montreal
Simone Pabst	University of Essen
Agnes Paras	Wesleyan University
K. M. Rangaswamy	University of Colorado
James Reid	Wesleyan University
Luigi Salce	University of Padova

Phillip Schultz	The University of Western Australia
Lutz Strüingmann	University of Essen
Jan Trlifaj	Charles University of Prague
William Ullery	Auburn University
Gert Viljoen	University of Orange Free State
Charles Vinsonhaler	University of Connecticut
William Wickless	University of Connecticut
Anatoly Yakovlev	University of St. Petersburg
Peter Yom	Fordham University
