Fluctuation-Based Proof of the Stability of AC Spectra of Random Operators on Tree Graphs MICHAEL AIZENMAN, ROBERT SIMS AND SIMONE WARZEL	1
Metrized Graphs, Laplacian Operators, and Electrical Networks MATTHEW BAKER AND XANDER FABER	15
Form Factor Expansion for Large Graphs: a Diagrammatic Approach GREGORY BERKOLAIKO	35
The Spectral Form Factor for Quantum Graphs with Spin-Orbit Coupling JENS BOLTE AND JONATHAN HARRISON	51
Linear Network Models Related to Blood Flow ROBERT CARLSON	65
Localization on Avron-Exner-Last Graphs: I. Local Perturbations KINGWOOD CHEN, STANISLAV MOLCHANOV AND BORIS VAINBERG	81
Weighted Laplacians and the Sigma Function of a Graph FAN CHUNG AND ROSS M. RICHARDSON	93
Approximations of Permutation-Symmetric Vertex Couplings in Quantum Graphs PAVEL EXNER AND ONDŘEJ TUREK	109
Resistance of Random Sierpiński Gaskets DANIEL FONTAINE, THOMAS SMITH AND ALEXANDER TEPLYAEV	121
Small Diffusion Asymptotics for Exit Problems on Graphs MARK FREIDLIN AND MATTHIAS WEBER	137
Determinant of the Schrödinger Operator on a Metric Graph LEONID FRIEDLANDER	151
Local Spectral Density and Vacuum Energy Near a Quantum Graph Vertex STEPHEN A. FULLING	161
What Are Zeta Functions of Graphs and What Are They Good For? MATTHEW D. HORTON, H. M. STARK AND AUDREY A. TERRAS	173
Fluctuation Statistics For Quantum Star Graphs J.P. KEATING	191

Laplacians on Metric Graphs: Eigenvalues, Resolvents and Semigroups VADIM KOSTRYKIN AND ROBERT SCHRADER	201
Transition From a Network of Thin Fibers to the Quantum Graph: an Explicitly Solvable Model STANISLAV MOLCHANOV AND BORIS VAINBERG	227
On the Limiting Absorption Principle and Spectra of Quantum Graphs BENG-SEONG ONG	241
Quantum Mechanics, Superconductivity and Fluid Flow in Narrow Networks JACOB RUBINSTEIN	251
A Relation Between the Bond Scattering Matrix and the Spectral Counting Function for Quantum Graphs HOLGER SCHANZ	269
The Quantum Graph as a Limit of a Network of Physical Wires UZY SMILANSKY AND MICHAEL SOLOMYAK	283
On the Trace Formula for Quantum Star Graphs B. WINN	293

## Preface

This volume contains contributions from the participants of the Joint Summer Research Conference “Quantum Graphs and Their Applications” that took place June 19-23, 2005 at Snowbird, Utah.

Quantum graphs are graphs considered as one-dimensional varieties and equipped with differential rather than difference operators. Such objects have appeared in recent decades in several areas of mathematics and the sciences, including chemistry, nanotechnology, microelectronics, quantum chaos, optics, number theory and dynamical systems. Prominent among the various motivations for studying such objects is that they model wave or electron propagation in thin graph-like structures. Quantum graphs is clearly a multi-disciplinary, rapidly developing subject. The goal of the conference was to promote development in the field by bringing together researchers from different areas of science and mathematics who could illuminate the subject from a variety of perspectives. The result was a stimulating and fruitful cross-pollination of ideas and methods.

The week-long conference attracted 47 participants from nine countries. They represented diverse fields, including physics, mathematical physics, algebra, combinatorics and number theory. Here is the list of lectures delivered at the conference:

- Michael Aizenman, Princeton Univ., USA. “Stability of the absolutely continuous spectra of metric tree graphs under random perturbations”
- Sergei Avdonin, Univ. of Alaska, Fairbanks, USA. “Control and Inverse Problems for Partial Differential Equations on Graphs”
- Matthew Baker, Georgia Institute of Technology, USA. “Questions about quantum graphs motivated by number theory”
- Gregory Berkolaiko, Texas A&M Univ., USA. “Correlations within the spectrum of a large quantum graph”
- Malcolm Brown, Cardiff Univ., UK. “A Borg-Levinson theorem for trees”
- Robert Carlson, Univ. Colorado, Colorado Springs, USA. “Linear network models related to blood flow”
- Fan Chung Graham, UC San Diego, USA. “Laplacians and the Cheeger inequality for directed graphs”
- Pavel Exner, Nuclear Physics Inst. and Doppler Inst., Acad. Sci., Prague, Czech Republic. “Approximations for and by quantum graph Hamiltonians”
- Mark Freidlin, Univ. of Maryland, USA. “Incompressible almost planar 3D-flows and stochastic processes on an open book”
- Lenny Friedlander, Univ. of Arizona, USA. “The determinant of the Laplacian on a metric graph”

- Stephen Fulling, Texas A&M Univ., USA. “Local spectral density and quantum vacuum energy near a quantum graph vertex”
- Alexander Gamburd, Stanford Univ., USA. “Expander graphs, random matrices, and quantum chaos”
- Jonathan Keating, Univ. of Bristol, UK. “Eigenvalue and eigenfunction statistics for quantum star graphs”
- Jun Kigami, Kyoto Univ., Japan. “Resistance forms and  $RC$ -networks”
- Vadim Kostrykin, Fraunhofer Inst., Aachen, Germany. “Inverse spectral problems for quantum graphs”
- Peter Kuchment, Texas A&M Univ., USA. “On some spectral properties of combinatorial and quantum graphs”
- Pavel Kurasov, Univ. of Lund, Sweden. “Trace formulas for quantum graphs and the inverse spectral problem”
- Stanislav Molchanov, Univ. of N. Carolina, Charlotte, USA. “Localization on quantum graphs”
- Petri Ola, Nevanlinna Institute, Helsinki, Finland. “Pseudodifferential operators on graph”
- Boris Pavlov, Univ. of Auckland, New Zealand. “Quantitatively-consistent modelling of quantum networks by quantum graphs with resonance nodes”
- Koby Rubinstein, Indiana Univ., USA. “Canonical Ginzburg-Landau limits on graphs”
- Holger Schanz, Max-Planck-Inst., Göttingen, Germany. “Quantum correlations: Hamiltonian chaos vs simple graphs”
- Robert Schrader, Freie Univ., Berlin, Germany. “Quantum scattering on graphs and a solution to the Traveling Salesman Problem”
- Uzy Smilansky, Weizmann Inst., Israel. “Isospectral quantum graphs”
- Alexander Sobolev, Univ. of Sussex, UK. “Spectral statistics for the perturbed Laplace operator on the torus”
- Michail Solomyak, Weizmann Inst., Israel. “On the spectrum of a self-adjoint operator appearing in Smilansky’s model of irreversible quantum graphs”
- Alexander Teplyaev, Univ. of Connecticut, USA. “Energy and spectrum of Sierpinski gasket type fractal”
- Audrey A. Terras, UC San Diego, USA. “What are zeta functions of graphs and what are they good for?”
- Boris Vainberg, Univ. of North Carolina, Charlotte, USA. “Slowing down wave packets in quantum graphs”

Besides well established researchers, there were 13 undergraduate and graduate students and postdocs among the attendees. They were able to represent their results at the poster sessions.

The participants are looking forward to a related semester long program, “Analysis on Graphs and its Applications,” at the Isaac Newton Institute for Mathematical Sciences, Cambridge, UK, in January – June 2007.

Besides the very high scientific level of the participants and presentations, the wonderful scenery of the ski resort and the superb organization by the AMS staff have contributed to the success of the conference.

The editors (who also organized the conference) express their gratitude to all the participants and contributors to this volume, to AMS staff members Wayne

Drady and Donna Salter for their flawless work on the organization of the conference and to Christine Thivierge and other members of the AMS technical staff for great help with editing this volume.

Gregory Berkolaiko, Texas A&M University

Stephen A. Fulling, Texas A&M University

Robert Carlson, University of Colorado, Colorado Springs

Peter Kuchment, Texas A&M University

- 393 **Alec L. Matheson, Michael I. Stessin, and Richard M. Timoney, Editors**, *Recent advances in operator-related function theory*, 2006

TITLES IN THIS SERIES

- 392 **Stephen Berman, Brian Parshall, Leonard Scott, and Weiqiang Wang, Editors**, Infinite-dimensional aspects of representation theory and applications, 2005
- 391 **Jürgen Fuchs, Jouko Mickelsson, Grigori Rozenblioum, Alexander Stolin, and Anders Westerberg, Editors**, Noncommutative geometry and representation theory in mathematical physics, 2005
- 390 **Sudhir Ghorpade, Hema Srinivasan, and Jugal Verma, Editors**, Commutative algebra and algebraic geometry, 2005
- 389 **James Eells, Etienne Ghys, Mikhail Lyubich, Jacob Palis, and José Seade, Editors**, Geometry and dynamics, 2005
- 388 **Ravi Vakil, Editor**, Snowbird lectures in algebraic geometry, 2005
- 387 **Michael Entov, Yehuda Pinchover, and Michah Sageev, Editors**, Geometry, spectral theory, groups, and dynamics, 2005
- 386 **Yasuyuki Kachi, S. B. Mulay, and Pavlos Tzermias, Editors**, Recent progress in arithmetic and algebraic geometry, 2005
- 385 **Sergiy Kolyada, Yuri Manin, and Thomas Ward, Editors**, Algebraic and topological dynamics, 2005
- 384 **B. Diarra, A. Escassut, A. K. Katsaras, and L. Narici, Editors**, Ultrametric functional analysis, 2005
- 383 **Z.-C. Shi, Z. Chen, T. Tang, and D. Yu, Editors**, Recent advances in adaptive computation, 2005
- 382 **Mark Agranovsky, Lavi Karp, and David Shoikhet, Editors**, Complex analysis and dynamical systems II, 2005
- 381 **David Evans, Jeffrey J. Holt, Chris Jones, Karen Klintworth, Brian Parshall, Olivier Pfister, and Harold N. Ward, Editors**, Coding theory and quantum computing, 2005
- 380 **Andreas Blass and Yi Zhang, Editors**, Logic and its applications, 2005
- 379 **Dominic P. Clemence and Guoqing Tang, Editors**, Mathematical studies in nonlinear wave propagation, 2005
- 378 **Alexandre V. Borovik, Editor**, Groups, languages, algorithms, 2005
- 377 **G. L. Litvinov and V. P. Maslov, Editors**, Idempotent mathematics and mathematical physics, 2005
- 376 **José A. de la Peña, Ernesto Vallejo, and Natig Atakishiyev, Editors**, Algebraic structures and their representations, 2005
- 375 **Joseph Lipman, Suresh Nayak, and Pramathanath Sastry**, Variance and duality for cousin complexes on formal schemes, 2005
- 374 **Alexander Barvinok, Matthias Beck, Christian Haase, Bruce Reznick, and Volkmar Welker, Editors**, Integer points in polyhedra—geometry, number theory, algebra, optimization, 2005
- 373 **O. Costin, M. D. Kruskal, and A. Macintyre, Editors**, Analyzable functions and applications, 2005
- 372 **José Burillo, Sean Cleary, Murray Elder, Jennifer Taback, and Enric Ventura, Editors**, Geometric methods in group theory, 2005
- 371 **Gui-Qiang Chen, George Gasper, and Joseph Jerome, Editors**, Nonlinear partial differential equations and related analysis, 2005

For a complete list of titles in this series, visit the  
AMS Bookstore at [www.ams.org/bookstore/](http://www.ams.org/bookstore/).

This volume is a collection of articles dedicated to quantum graphs, a newly emerging interdisciplinary field related to various areas of mathematics and physics. The reader can find a broad overview of the theory of quantum graphs. The articles present methods coming from different areas of mathematics: number theory, combinatorics, mathematical physics, differential equations, spectral theory, global analysis, and theory of fractals. They also address various important applications, such as Anderson localization, electrical networks, quantum chaos, mesoscopic physics, superconductivity, optics, and biological modeling.
