Dynamics of self-similar interval exchange transformations on three intervals KELLY YANCEY	297

Preface

The work of John C. Oxtoby was fundamental for the fields of measure theory and ergodic theory, and paved the way for many advances in these fields. His contributions were numerous and include his classic monograph, “Measure and Category,” along with the oft-quoted Oxtoby-Ulam theorem. His life was celebrated at the Oxtoby Centennial Conference held at Bryn Mawr College on October 30–31, 2010. This conference, held at the institution where Oxtoby spent most of his professional life, featured 14 speakers and over 30 participants and included recollections on Oxtoby’s life by his son David and his daughter Margaret. The webpage for this conference can be found at

http://web.williams.edu/Mathematics/csilva/Oxtoby_Centennial_Conf.htm

These proceedings serve as a tangible record of that celebration along with two subsequent conferences: the Williams Ergodic Theory Conference, held at Williams College on July 27-29, 2012, and the AMS Special Session on Ergodic Theory and Symbolic Dynamics at the joint AMS/MAA meetings in Baltimore on January 17-18, 2014. Webpages for these events can be found at:

http://web.williams.edu/Mathematics/csilva/Williams_ErgodicTheory2012.html

http://jointmathematicsmeetings.org/meetings/national/jmm20142160_program_ss31.html#title

The articles contained in this volume are from the participants of these three conferences and comprise a variety of topics in both measurable and symbolic dynamics. These include a survey article on the life and work of Oxtoby, providing a source of information about the many ways Oxtoby’s work influenced mathematical thought in this and other fields.

We thank the co-organizers of the Oxtoby Centennial Conference, Leslie Cheng and Paul Melvin, for their invaluable help in organizing such an endeavor. We gratefully acknowledge the National Science Foundation, grant DMS-1058120, and the Bryn Mawr College 1902 Lecture Fund for their financial support. The National Science Foundation grant DMS-1058120 also supported the Williams Ergodic Theory Conference, with additional financial support provided by Williams College. Finally, we thank all of the speakers for their wonderful talks and the participants for making these three conferences such a success.

Oxtoby Centennial Conference, organized by Joseph Auslander, Leslie Cheng, Aimee Johnson, Paul Melvin, and Cesar E. Silva. Bryn Mawr College, October 30–31, 2010

Ethan Akin (CCNY), *Good measures on the Cantor set*

Tim Austin (Brown University), *The quantitative ergodic theorem and embeddings of groups into Banach spaces*

Robert Devaney (Boston University), *The fractal geometry of the Mandelbrot set*

Jane Hawkins (UNC Chapel Hill), *Families of type III_0 ergodic transformations in distinct orbit equivalent classes*

Fern Hunt (NIST), *A model of routing in computer networks*

Mike Keane (Wesleyan University), *Understanding ergodicity*

Kathryn Lindsey (Cornell University), *Tight upper bounds on the number of invariant components on translation surfaces by connected component of moduli space*

Nelson Markley (University of Maryland and Lehigh University), *Completing the Weil-Hedlund-Anosov program*

Dan Mauldin (University of North Texas), *Some problems and techniques inspired by John C. Oxtoby*

Kevin McGoff (University of Maryland), *Random subshifts of finite type*

V.S. Prasad (University of Massachusetts, Lowell), *Continuous versions of the homeomorphic measures theorem*

Bethany Springer (Colorado State), *Some results in almost continuous dynamics*

Susan Williams (University of South Alabama), *Oxtoby and Toeplitz minimal systems: An excursion*

Kelly Yancey (University of Illinois), *Continuous and smooth realizations of ergodic transformations of finite entropy*

Participants in addition to speakers

Joseph Auslander (University of Maryland)

Karl Backs (University of North Texas)

Andres del Junco (University of Toronto)

Joanna Furno (University of North Carolina, Chapel Hill)

Geoff Goodson (Towson University)

Gernot Greschonig (University of Vienna and University of Maryland)

Aimee Johnson (Swarthmore College)

Jonathan King (University of Florida)

Lorelei Koss (Dickinson College)

Kathleen Madden (Drew University)

Nelson Markley (University of
Maryland and Lehigh University)

Dan Mauldin (University of North
Texas)

David McClendon (Swarthmore
College)

Kevin McGoff (University of Maryland)

Paul Melvin (Bryn Mawr College)

Joseph Moser (West Chester
University)

Anima Nagar (Indian Institute of
Technology Delhi, India)

Mahesh Nerurkar (Rutgers University
Camden)

David Oxtoby (Pomona College)

Vincent Peck (IBM)

Vallorie J. Peridier (Temple University)

Karl Petersen (University of North
Carolina, Chapel Hill)

Amit Priyadarshi (Rutgers University)

Joe Rosenblatt (University of Illinois,
Urbana-Champaign)

Niketa Salvi (Colorado State University
and DePaul University)

Michael Sears (University of the
Witwatersrand)

Nicholas Sharpe (University of Florida)

Cesar E. Silva (Williams College)

Bethany Springer (Colorado State
University and University of Toronto)

Lisa Traynor (Bryn Mawr College)

Conan Wu (Princeton University)

Andy Yingst (University of South
Carolina)

**Williams Ergodic Theory Conference, organized by Joseph
Auslander and Cesar E. Silva.
Williams College, July 27–29, 2012**

Jon Aaronson (Tel Aviv University,
Israel), *Rational weak mixing in infinite
measure spaces*

Ethan Akin (The City College, New
York, USA), *Homeomorphisms of the
Cantor set*

Rachel Bayless (University of North
Carolina, Chapel Hill, USA), *Negative
generalized Boole transformations and
Krengel entropy*

Darren Creutz (Vanderbilt University,
USA), *Stabilizers of ergodic actions of
lattices and commensurators*

Alexandre Danilenko (Institute for Low
Temperature Physics, Ukraine),
Odometer actions of Heisenberg group

Jared Hallett (Williams College), *On
Li-Yorke measurable sensitivity*

Jane Hawkins (University of North
Carolina, Chapel Hill, USA), *Complex
dynamics and infinite ergodic theory*

Yuri Karlovich (Universidad Autonoma
del Estado de Morelos, Mexico),
*Ergodic number theory and AP
factorization of almost periodic matrix
functions*

Zemer Kosloff (Tel Aviv University,
Israel), *Maharam extensions of
nonsingular Bernoulli shifts*

Mariusz Lemanczyk (Nicolaus
Copernicus University, Poland),
*Self-joinings of higher order in the
problem of non-reversibility of ergodic
flows*

Tudor Pădurariu (University of
California, Los Angeles), *On rationally
ergodic and rationally weakly mixing
rank-one transformations*

Kyewon Park (Ajou University, South
Korea), *Entropy dimension: examples*

V.S. Prasad (University of
Massachusetts Lowell, USA), *Tilings of
the integers arising from a class of
infinite measure preserving
transformations*

Emmanuel Roy (University of Paris 13,
France), *Prime Poisson suspensions*

Ilya Vinogradov (Princeton University),
*Effective bisector estimate for $PSL(2, C)$
with applications to circle packings*

Kelly Funk Yancey (University of
Illinois) *Generic homeomorphisms*

Participants in addition to speakers

Joseph Auslander (University of
Maryland)

Rachel Bayless, (University of North
Carolina, Chapel Hill)

Darren Creutz (Vanderbilt University)

Irving Dai (Harvard University)

Andres del Junco (University of Toronto)

Stanley Eigen (Northeastern University)

Xavier Garcia (University of Minnesota)

Arshag Hajian (Northeastern University)

Shelby Heinecke (MIT)

Aimee Johnson (Swarthmore College)

Yuri Karlovich (Universidad Autonoma del Estado de Morelos, Mexico)

Zemer Kosloff (Tel Aviv University, Israel)

David McClendon (Swarthmore College)
