### Library of Congress Cataloging-in-Publication Data

Names: Harrington, Heather A., 1984– editor. | Omar, Mohamed, 1982– editor. | Wright, Matthew, 1984– editor.

Title: Algebraic and geometric methods in applied discrete mathematics: AMS special session on algebraic and geometric methods in applied discrete mathematics, January 11, 2015, San Antonio, Texas / Heather A. Harrington, Mohamed Omar, Matthew Wright, editors.

Description: Providence, Rhode Island: American Mathematical Society, [2017] | Series: Contemporary mathematics; volume 685 | Includes bibliographical references.

Identifiers: LCCN 2016042006 | ISBN 9781470423216 (alk. paper)

Subjects: LCSH: Mathematics—Congresses. | Geometry, Algebraic—Congresses. | AMS: General – Conference proceedings and collections of papers – Proceedings of conferences of general interest. msc | Commutative algebra – Computational aspects and applications – Applications of commutative algebra (e.g., to statistics, control theory, optimization, etc.). msc | Group theory and generalizations – Representation theory of groups – Representations of finite symmetric groups. msc | Functional analysis – Miscellaneous applications of functional analysis – Applications in probability theory and statistics. msc | Geometry – Geometric closure systems – Combinatorial geometries. msc | Convex and discrete geometry – Polytopes and polyhedra – Combinatorial properties (number of faces, shortest paths, etc.). msc | Statistics – Data analysis. msc | Statistics – Applications – Applications to biology and medical sciences. msc | Numerical analysis – Probabilistic methods, simulation and stochastic differential equations – Computational problems in statistics. msc | Game theory, economics, social and behavioral sciences – Mathematical economics – Voting theory. msc

Classification: LCC QA39.3 .A5255 2017 | DDC 511/.1–dc23 LC record available at <https://lccn.loc.gov/2016042006>

## Contents

Preface	vii
Eigenconfigurations of tensors HIROTACHI ABO, ANNA SEIGAL, and BERND STURMFELS	1
Sum of squares basis pursuit with linear and second order cone programming AMIR ALI AHMADI and GEORGINA HALL	27
Helly's theorem: New variations and applications NINA AMENTA, JESÚS A. DE LOERA, and PABLO SOBERÓN	55
Representation theory of the symmetric group in voting theory and game theory KARL-DIETER CRISMAN and MICHAEL E. ORRISON	97
Modeling the distribution of distance data in Euclidean space RUTH DAVIDSON, JOSEPH RUSINKO, ZOE VERNON, and JING XI	117
Geometric combinatorics and computational molecular biology: Branching polytopes for RNA sequences ELIZABETH DRELLICH, ANDREW GAINER-DEWAR, HEATHER A. HARRINGTON, QIJUN HE, CHRISTINE HEITSCH, and SVETLANA POZNANOVIĆ	137
Polyhedral approaches to learning Bayesian networks DAVID HAWS, JAMES CUSSENS, and MILAN STUDENÝ	155
Neural network coding of natural images with applications to pure mathematics CHRISTOPHER J. HILLAR and SARAH E. MARZEN	189
Proving Tucker's Lemma with a volume argument BEAUTTIE KUTURE, OSCAR LEONG, CHRISTOPHER LOA, MUTIARA SONDJAJA, and FRANCIS EDWARD SU	223
Factorization invariants in numerical monoids CHRISTOPHER O'NEILL and ROBERTO PELAYO	231
A survey of discrete methods in (algebraic) statistics for networks SONJA PETROVIĆ	251

## Preface

This Contemporary Mathematics volume was initiated by the same named special session at the 2015 AMS/MAA Joint Mathematics Meetings, and also celebrates the themes of an AMS Mathematics Research Community (MRC) in 2014. The MRC on Algebraic and Geometric Methods in Applied Discrete Mathematics was held June 15–21, 2014, at Snowbird Resort in Utah. The goal of the MRC was to introduce young mathematicians to research bridging pure and applied mathematics—specifically, the use of algebraic and geometric methods to solve applied discrete problems. Working groups at the MRC included combinatorial topology in the social sciences, representation theory in data analysis, combinatorics in molecular biology, algebraic and geometric approaches in neuroscience, and algebraic and geometric methods in optimization.

The 2015 AMS/MAA Joint Mathematics Meetings, held January 10–13 in San Antonio, featured a special session dedicated to the themes of the MRC. Talks in this session were presented by experts in fields connected to the MRC topics. Given the intense interest in this special session and the enthusiasm of the session speakers and MRC participants, it was suggested that proceedings of the session be collected in a book. The present volume is that book.

We are deeply grateful to Carina Curto, Jesus A. De Loera, Christine Heitsch, Michael Orrison, and Francis Edward Su for organizing the MRC program and supporting this volume. We have benefited immensely from your mathematical expertise, mentoring, and willingness to introduce young mathematicians to your research areas. We also express great thanks to the AMS staff, especially Ellen Maycock, Melissa Colton, and Robin Hagan Aguiar for your work in arranging the logistics of the MRC, and to Christine Thivierge for your assistance in preparing this volume. The MRC would not have been possible without funding from the National Science Foundation, which we also acknowledge with thanks.

- 667 **Mark L. Agranovsky, Matania Ben-Artzi, Greg Galloway, Lavi Karp, Dmitry Khavinson, Simeon Reich, Gilbert Weinstein, and Lawrence Zalcman, Editors**, Complex Analysis and Dynamical Systems VI: Part 2: Complex Analysis, Quasiconformal Mappings, Complex Dynamics, 2016
- 666 **Vicențiu D. Rădulescu, Adélia Sequeira, and Vsevolod A. Solonnikov, Editors**, Recent Advances in Partial Differential Equations and Applications, 2016
- 665 **Helge Glöckner, Alain Escassut, and Khodr Shamseddine, Editors**, Advances in Non-Archimedean Analysis, 2016
- 664 **Dihua Jiang, Freydoon Shahidi, and David Soudry, Editors**, Advances in the Theory of Automorphic Forms and Their  $L$ -functions, 2016
- 663 **David Kohel and Igor Shparlinski, Editors**, Frobenius Distributions: Lang-Trotter and Sato-Tate Conjectures, 2016
- 662 **Zair Ibragimov, Norman Levenberg, Sergey Pinchuk, and Azimbay Sadullaev, Editors**, Topics in Several Complex Variables, 2016
- 661 **Douglas P. Hardin, Doron S. Lubinsky, and Brian Z. Simanek, Editors**, Modern Trends in Constructive Function Theory, 2016

For a complete list of titles in this series, visit the  
AMS Bookstore at [www.ams.org/bookstore/conmseries/](http://www.ams.org/bookstore/conmseries/).

This volume contains the proceedings of the AMS Special Session on Algebraic and Geometric Methods in Applied Discrete Mathematics, held on January 11, 2015, in San Antonio, Texas.

The papers present connections between techniques from “pure” mathematics and various applications amenable to the analysis of discrete models, encompassing applications of combinatorics, topology, algebra, geometry, optimization, and representation theory. Papers not only present novel results, but also survey the current state of knowledge of important topics in applied discrete mathematics.

Particular highlights include: a new computational framework, based on geometric combinatorics, for structure prediction from RNA sequences; a new method for approximating the optimal solution of a sum of squares problem; a survey of recent Helly-type geometric theorems; applications of representation theory to voting theory and game theory; a study of fixed points of tensors; and exponential random graph models from the perspective of algebraic statistics with applications to networks.

This volume was written for those trained in areas such as algebra, topology, geometry, and combinatorics who are interested in tackling problems in fields such as biology, the social sciences, data analysis, and optimization. It may be useful not only for experts, but also for students who wish to gain an applied or interdisciplinary perspective.
