PROVIDENCE, RHODE ISLAND USA

ISSN 0894-0347

Journal of the American Mathematical Society

The Journal of the American Mathematical Society has been established for the publication of research articles in all areas of pure and applied mathematics.

Editors

Chairman

Wilfried Schmid
Department of Mathematics
Harvard University
Cambridge, MA 02138

H. Blaine Lawson, Jr.
Department of Mathematics
SUNY at Stony Brook
Stony Brook, NY 11794

Richard Melrose
Department of Mathematics 2-243
Massachusetts Institute of Technology
Cambridge, MA 02139

Robert D. MacPherson
Department of Mathematics 2-246
Massachusetts Institute of Technology
Cambridge, MA 02139

Andrew Odlyzko
Room 2C-355
AT & T Bell Laboratories
600 Mountain Ave.
Murray Hill, NJ 07974

Associate Editors

James G. Arthur, University of Toronto
Peter Bickel, University of California, Berkeley
Gerd Faltings, Princeton University
Charles L. Fefferman, Princeton University
Michael H. Freedman, University of California, San Diego
Daniel Friedan, University of Chicago
Ronald L. Graham, AT & T Bell Laboratories
Joe Harris, Harvard University
Hendrik W. Lenstra, Jr., University of California, Berkeley
Andrew Majda, Princeton University
Hugh L. Montgomery, University of Michigan
Paul H. Rabinowitz, University of Wisconsin
Karen Uhlenbeck, University of Texas at Austin
W. Hugh Woodin, University of California, Berkeley

Assistant to the Editorial Board

Joanne Jonsson
Department of Mathematics 2-108
Massachusetts Institute of Technology
Cambridge, MA 02139

Subscription information. The Journal of the American Mathematical Society is published quarterly. Subscription prices for Volume 4 (1991) are \$126 list, \$101 institutional member, \$76 individual member. Subscribers outside the United States and India must pay a postage surcharge of \$8; subscribers in India must pay a postage surcharge of \$18. Expedited delivery to destinations in North America \$12; elsewhere \$36.

Back number information. Back number prices per volume are: for Volume 1, \$164 list, \$131 institutional member; for Volume 2, \$177 list, \$142 institutional member; for Volume 3, \$174 list, \$139 institutional member.

Manuscript submission. See inside back cover.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 1571, Annex Station, Providence, R.I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, R.I. 02940-6248.

The Journal of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, R.I. 02904-2213 and is mailed from Providence, Rhode Island. Second class postage is pending at Providence, Rhode Island. Postmaster: Send address changes to Journal of the AMS, American Mathematical Society, P.O. Box 6248, Providence, R.I. 02940-6248.

INDEX TO VOLUME 4

January–December 1991

- Bedford, Eric and Klingenberg, Wilhelm. *On the envelope of holomorphy of a 2-sphere in \mathbb{C}^2* , 623
- Bedford, Eric and Smillie, John. *Polynomial diffeomorphisms of \mathbb{C}^2 . II: stable manifolds and recurrence*, 657
- Bertram, Aaron, Ein, Lawrence, and Lazarsfeld, Robert. *Vanishing theorems, a theorem of Severi, and the equations defining projective varieties*, 587
- Bestvina, Mladen and Mess, Geoffrey. *The boundary of negatively curved groups*, 469
- Bloch, Spencer. *Algebraic cycles and the Lie algebra of mixed Tate motives*, 771
- Cappell, Sylvain E. and Shaneson, Julius L. *Stratifiable maps and topological invariants*, 521
- Chung, F. R. K. and Graham, R. L. *Quasi-random set systems*, 151
- Coti Zelati, Vittorio and Rabinowitz, Paul H. *Homoclinic orbits for second order Hamiltonian systems possessing superquadratic potentials*, 693
- Dai, Xianzhe. *Adiabatic limits, nonmultiplicativity of signature, and Leray spectral sequence*, 265
- Deligne, P. *Groupe de Heisenberg et réalité*, 197
- Delort, Jean-Marc. *Existence de nappes de tourbillon en dimension deux*, 553
- Ein, Lawrence. See Bertram, Aaron
- Eliashberg, Yakov. *New invariants of open symplectic and contact manifolds*, 513
- Friedlander, John, Granville, Andrew, Hildebrand, Adolf, and Maier, Helmut. *Oscillation theorems for primes in arithmetic progressions and for sifting functions*, 25
- Ginsburg, Victor. *Perverse sheaves and \mathbb{C}^* -actions*, 483
- Gouvêa, F. and Mazur, B. *The square-free sieve and the rank of elliptic curves*, 1
- Graham, R. L. See Chung, F. R. K.
- Granville, Andrew. See Friedlander, John
- Green, Mark and Lazarsfeld, Robert. *Higher obstructions to deforming cohomology groups of line bundles*, 87
- Hambleton, Ian and Pedersen, Erik Kjær. *Bounded surgery and dihedral group actions on spheres*, 105
- Hildebrand, Adolf. See Friedlander, John
- Jech, Thomas and Shelah, Saharon. *A partition theorem for pairs of finite sets*, 647
- Kenig, Carlos E., Ponce, Gustavo, and Vega, Luis. *Well-posedness of the initial value problem for the Korteweg-de Vries equation*, 323
- Klingenberg, Wilhelm. See Bedford, Eric
- Lazarsfeld, Robert. See Bertram, Aaron
- . See Green, Mark
- Lu, Jiang-Hua and Ratiu, Tudor. *On the nonlinear convexity theorem of Kostant*, 349
- Luczak, Tomasz and Spencer, Joel. *When does the Zero-One Law hold?*, 451
- Lusztig, G. *Quivers, perverse sheaves, and quantized enveloping algebras*, 365
- Maier, Helmut. See Friedlander, John
- Mather, John N. *Variational construction of orbits of twist diffeomorphisms*, 207
- Mathieu, Olivier. *Bicontinuity of the Dixmier map*, 837
- Mazur, B. See Gouvêa, F.
- Mess, Geoffrey. See Bestvina, Mladen
- Nadel, Alan Michael. *The boundedness of degree of Fano varieties with Picard number one*, 681
- Pardon, William L. and Stern, Mark A. *$L^2 - \bar{\partial}$ -cohomology of complex projective varieties*, 603
- Pedersen, Erik Kjær. See Hambleton, Ian
- Ponce, Gustavo. See Kenig, Carlos E.
- Rabinowitz, Paul H. See Coti Zelati, Vittorio
- Ratiu, Tudor. See Lu, Jiang-Hua

INDEX TO VOLUME 4

- Schonbek, Maria E. *Lower bounds of rates of decay for solutions to the Navier-Stokes equations*, 423
- Schramm, Oded. *Rigidity of infinite (circle) packings*, 127
- Shaneson, Julius L. See Cappell, Sylvain E.
- Shelah, Saharon. See Jech, Thomas
- Sjöstrand, Johannes and Zworski, Maciej. *Complex scaling and the distribution of scattering poles*, 729
- Smillie, John. See Bedford, Eric
- Spencer, Joel. See Luczak, Tomasz
- Stern, Mark A. See Pardon, William L.
- Stewart, C. L. *On the number of solutions of polynomial congruences and Thue equations*, 793
- Teitelbaum, Jeremy T. *The Poisson kernel for Drinfeld modular curves*, 491
- Vega, Luis. See Kenig, Carlos E.
- Zworski, Maciej. See Sjöstrand, Johannes

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy a chapter for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The owner consents to copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that a fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. When paying this fee please use the code 0894-0347/91 to refer to this publication. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

The boundedness of degree of Fano varieties with Picard number one ALAN MICHAEL NADEL	681
Homoclinic orbits for second order Hamiltonian systems possessing superquadratic potentials VITTORIO COTI ZELATI and PAUL H. RABINOWITZ	693
Complex scaling and the distribution of scattering poles JOHANNES SJÖSTRAND and MACIEJ ZWORSKI	729
Algebraic cycles and the Lie algebra of mixed Tate motives SPENCER BLOCH	771
On the number of solutions of polynomial congruences and Thue equations C. L. STEWART	793
Bicontinuity of the Dixmier map OLIVIER MATHIEU	837

Preparation of the manuscript. All papers should be double-spaced. Two copies of the paper should be sent directly to one of the Editors or to the Assistant to the Editorial Board. At that time, authors should indicate if the paper has been set electronically. The author should keep a copy.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts preferably in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared “preprint” style files, specifically the amsppt style of $\mathcal{A}\mathcal{M}\mathcal{S}\text{-T}\mathcal{E}\mathcal{X}$ and the amsart style of $\mathcal{A}\mathcal{M}\mathcal{S}\text{-L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$, which will simplify the work of authors and of the production staff. *Guidelines for Preparing Electronic Manuscripts* provide additional assistance and are available for use with either $\mathcal{A}\mathcal{M}\mathcal{S}\text{-T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. Authors may obtain these Guidelines free of charge from the e-mail address guide-elec@math.ams.com (Internet) or from the Publications Department, P.O. Box 6248, Providence, RI 02940-6248. Electronically prepared manuscript files should be sent to the Providence office only after the paper has been accepted for publication. Please send files via e-mail to pub-submit@math.ams.com (Internet) or on diskettes to the Publications Department address listed above. Electronic manuscripts usually move through the production process more quickly.

Subject classification. Included with the footnotes to the paper, but placed before the first footnote, the subject classification should represent the primary and secondary subjects of the article. A list may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1990.

Galley proof. When a paper with more than one author has been accepted for publication, only one set of proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
