ISSN 0894-0347

Journal of the American Mathematical Society

This journal is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

Subscription information. The *Journal of the American Mathematical Society* is published quarterly. Subscription prices for Volume 6 (1993) are \$144 list, \$115 institutional member, \$86 individual member. Subscribers outside the United States and India must pay a postage surcharge of \$8; subscribers in India must pay a postage surcharge of \$18. Expedited delivery to destinations in North America \$13; elsewhere \$36.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 1571, Annex Station, Providence, RI 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

The *Journal of the American Mathematical Society* is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213 and is mailed from Providence, Rhode Island. Second class postage paid at Providence, Rhode Island. Postmaster: Send address changes to *Journal of the AMS*, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

INDEX TO VOLUME 6

January–December 1993

- Barbasch, Dan and Moy, Allen. *Reduction to real infinitesimal character in affine Hecke algebras*, 611
- Canary, Richard D. *Ends of hyperbolic 3-manifolds*, 1
- Dwyer, W. G. and Wilkerson, C. W. *A new finite loop space at the prime two*, 37
- Ein, Lawrence and Lazarsfeld, Robert. *Global generation of pluricanonical and adjoint linear series on smooth projective threefolds*, 875
- Farrell, F. T. and Jones, L. E. *Isomorphism conjectures in algebraic K-theory*, 249
- Fintushel, Ronald and Stern, Ronald J. *2-torsion instanton invariants*, 299
- Gérard, Patrick et Lebeau, Gilles. *Diffusion d'une onde par un coin*, 341
- Gowers, W. T. and Maurey, B. *The unconditional basic sequence problem*, 851
- Harris, Michael. *L-functions of 2×2 unitary groups and factorization of periods of Hilbert modular forms*, 637
- Jones, L. E. See Farrell, F. T.
- Katz, Nicholas M. *Affine cohomological transforms, perversity, and monodromy*, 149
- Kazhdan, D. and Lusztig, G. *Tensor structures arising from affine Lie algebras*. I, 905
———. *Tensor structures arising from affine Lie algebras*. II, 949
- Kreck, Matthias and Stolz, Stephan. *Nonconnected moduli spaces of positive sectional curvature metrics*, 825
- Lazarsfeld, Robert. See Ein, Lawrence
- Lebeau, Gilles. See Gérard, Patrick
- Lusztig, G. See Kazhdan, D.
- Lyubich, Mikhail and Milnor, John. *The Fibonacci unimodal map*, 425
- Marcus, Brian and Tuncel, Selim. *Matrices of polynomials, positivity, and finite equivalence of Markov chains*, 131
- Maurey, B. See Gowers, W. T.
- Milnor, John. See Lyubich, Mikhail
- Mockenhaupt, Gerd, Seeger, Andreas, and Sogge, Christopher D. *Local smoothing of Fourier integral operators and Carleson-Sjölin estimates*, 65
- Morrison, David R. *Mirror symmetry and rational curves on quintic threefolds: A guide for mathematicians*, 223
- Moy, Allen. See Barbasch, Dan
- Müller, Werner. *Analytic torsion and R-torsion for unimodular representations*, 721
- Nitsure, Nitin. *Moduli of semistable logarithmic connections*, 597
- Raugel, Geneviève and Sell, George R. *Navier-Stokes equations on thin 3D domains*. I: *Global attractors and global regularity of solutions*, 503
- Rohlf, Jürgen and Schwermer, Joachim. *Intersection numbers of special cycles*, 755
- Schwermer, Joachim. See Rohlf, Jürgen
- Seeger, Andreas. See Mockenhaupt, Gerd
- Sell, George R. See Raugel, Geneviève
- Shub, Michael and Smale, Steve. *Complexity of Bezout's theorem*. I: *Geometric aspects*, 459
- Smale, Steve. See Shub, Michael
- Sogge, Christopher D. See Mockenhaupt, Gerd
- Stern, Ronald J. See Fintushel, Ronald
- Stolz, Stephan. See Kreck, Matthias
- Tuncel, Selim. See Marcus, Brian
- Wallach, Nolan R. *Invariant differential operators on a reductive Lie algebra and Weyl group representations*, 779
- Wilkerson, C. W. See Dwyer, W. G.
- Youssin, Boris. *L^2 -cohomology, Nash blowup, and semismall resolutions*, 817

Editorial Information

As of July 1, 1993, the backlog for this journal was approximately 1 issue. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Copyright Transfer Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors and Editors

The first page must contain a *descriptive title* that is short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Included with the footnotes to the paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual index of *Mathematical Reviews*, published with the

December issue starting in 1990, as well as from the electronic service e-MATH [telnet e-MATH.ams.org (or telnet 130.44.1.100). Login and password are e-math]. For journal abbreviations used in bibliographies, see the list of serials in the latest *Mathematical Reviews* annual index. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Two copies of the paper should be sent directly to one of the Editors and the author should keep one copy.

Electronically prepared manuscripts. The AMS encourages submission of electronically prepared manuscripts in $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process. To this end, the Society has prepared “preprint” style files, specifically the amsppt style of $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX and the amsart style of $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX , which will simplify the work of authors and of the production staff. Those authors who make use of these style files from the beginning of the writing process will further reduce their own effort. Electronically submitted manuscripts prepared in plain \TeX or \LaTeX do not mesh properly with the AMS production systems and cannot, therefore, realize the same kind of expedited processing. Users of plain \TeX should have little difficulty learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX , and \LaTeX users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX is the same as \LaTeX with additional commands to simplify the typesetting of mathematics.

Guidelines for Preparing Electronic Manuscripts provides additional assistance and is available for use with either $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX . Authors with FTP access may obtain *Guidelines* from the Society’s Internet node e-MATH@math.ams.org (130.44.1.100). For those without FTP access *Guidelines* can be obtained free of charge from the e-mail address guide-elec@math.ams.org (Internet) or from the Publications Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting *Guidelines*, please specify which version you want.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX . The *Manual for Authors of Mathematical Papers* should be consulted for symbols and style conventions. The *Manual* may be obtained free of charge from the e-mail address cust-serv@math.ams.org or from the Customer Services Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The Providence office should be supplied with a manuscript that corresponds to the electronic file being submitted.

Electronic manuscripts should be sent to the Providence office immediately after the paper has been accepted for publication. They can be sent via e-mail to pub-submit@math.ams.org (Internet) or on diskettes to the Publications Department address listed above. When submitting electronic manuscripts please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Authors and editors are encouraged to make the necessary submissions of electronically prepared manuscripts and proof copies in a timely fashion.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.
