GENERAL INDEX

1925–1934

[Throughout this Index, bold face numerals are used to denote the volume number; light face numerals denote pages.]

I. AUTHORS

Adams, C. R. Factorial series in two variables, 34, 473.
— Linear q-difference equations, 37, 361.
— Transformations of double sequences with application to Cesàro summability of double series, 37, 741.
— Hausdorff transformations for double sequences, 39, 303.
— Kojima on double Dirichlet series, 39, 979.

Adkisson, V. W. Note on the law of biquadratic reciprocity, 38, 529.

Agnew, R. P. On uniform summability of sequences of continuous functions, 36, 529.
— On complex methods of summability, 37, 597.

Albert, A. A. On the rank equation of any normal division algebra, 35, 335.
— A necessary and sufficient condition for the non-equivalence of any two rational generalised quaternion division algebras, 36, 535.
— A note on an important theorem on normal division algebras, 36, 649.
— On the Wedderburn norm condition for cyclic algebras, 37, 301.
— A note on cyclic algebras of order sixteen, 37, 727.
— Division algebras over an algebraic field, 37, 777.
— A construction of non-cyclic normal division algebras, 38, 449.
— A note on normal division algebras of order sixteen, 38, 703.
— A note on the equivalence of algebras of degree two, 39, 257.
— On primary normal division algebras of degree eight, 39, 265.
— Normal division algebras over algebraic number fields not of finite degree, 39, 746.
— Integral domains of rational generalised quaternion algebras, 40, 164.
— Cyclic fields of degree $p^n$ over $F$ of characteristic $p$, 40, 625.
— The principal matrices of a Riemann matrix, 40, 843.

Alexander, J. W. See Reviews, under Lefschetz.

Allen, E. S. See Reviews, under Baldus, Barbarin, Dubislav, Hessenberg, Klein, Kostitzin, Reidemeister, Speiser, Stenström.

Archibald, R. C. See Reviews, under Ball, Carroll, Dudeney, Kowalewski, Madan, Williams, S. H.

Archibald, R. G. Criteria for the solution of a certain quadratic diophantine equation, 37, 608.

Ayres, W. L. A new characterisation of plane continuous curves, 33, 201.
— Concerning the boundaries of domains of a continuous curve, 33, 565.
— A correction, 34, 107.
— An elementary property of bounded domains, 34, 200.
— Continuous curves in which every arc may be extended, 35, 850.
— On the density of the cut points and end points of a continuum, 36, 659.
— See Whyburn, G. T.

Ballantine, J. P. On a certain functional condition, 32, 153.

The transformations generated by an infinitesimal projective transformation in function space, 36, 273.

Basoco, M. A. On the trigonometric expansion of elliptic functions, 37, 117.

On the trigonometric developments of certain doubly periodic functions of the second kind, 38, 560.

On the element of decomposition of a doubly periodic function of the second kind, 39, 923.

Bateman, Harry. A cubic curve connected with two triangles, 33, 45.

Transverse seismic waves on the surface of a semi-infinite solid composed of heterogeneous material, 34, 343.

Some properties of spherical harmonics, 36, 306.

Some applications of Murphy's theorem, 39, 118.

See Reviews, under Bohr, Eyraud, Federhofer, Gonseth, Hohenemser, Jeans, Levi-Civita, McLaren, Müller, W., Reidemeister, Schaefer, Strutt, Walmsley.

Baten, W. D. The evaluation of certain definite integrals by the use of probability functions, 36, 433.

The probable error of certain functions of the errors made in measurements, 37, 105.

The probability law for the sum of n independent variables, each subject to the law \((1/2\pi) \text{sech}(\pi x/(2h))\), 40, 284.

See Reviews, under Gibbs.

Beatley, Ralph. See Reviews, under Cajori.

Beckenbach, E. F. An inequality for definite Hermitian determinants, 35, 325.

Bloch's theorem for minimal surfaces, 39, 450.

A characteristic property of surfaces of negative curvature, 40, 761.

Beetle, R. D., and Wilder, C. E. John Wesley Young—in memoriam, 38, 603.

Bell, Clifford. In- and circumscribed sets of planes to space curves, 36, 409.

Useful functions associated with rational cubic curves, 37, 749.

Bell, E. T. On the number of representations of an integer as a sum or difference of two cubes, 31, 309.

A ray of numerical functions of r arguments, 32, 341.

On a fundamental formula in the theory of class-number relations, 32, 682.

A diophantine automorphism, 33, 71.

Cauchy's cyclotomic function and functional powers, 33, 416.

Ternary characteristics of primes, 34, 323.

Certain class-number relations implied in the Nachlass of Gauss, 34, 490.

A partial isomorphism between the functions of Lucas and Weierstrass, 35, 321.

A correction, 35, 498.

Non-existence theorems on the number of representations of arbitrary odd integers as sums of \(Ar\) squares, 35, 695.

A correspondence between irregular fields, 36, 415.

Numbers of representations in certain senary quadratic forms, 36, 883.

Modular interpolation, 37, 65.

Functional equations for totients, 37, 85.

Factorability of numerical functions, 37, 251.

On a type of illusory theorem concerning higher indeterminate equations, 37, 261.

Addendum on factorability of numerical functions, 37, 630.

Quadratic partitions, I, 37, 870.

On the degree of generality of a class of arithmetical identities, 38, 263.

Quadratic partitions, II, 38, 551.

Quadratic partitions, III, 38, 569.

Quadratic partitions, IV, 38, 697.

Reducible diophantine systems, 39, 417.

Similar sequences, 39, 937.

Composition of arithmetical identities, 40, 583.

See Reviews, under Cantor, Dedekind, Dickson, Fulco, Hilbert, Nazimoff, Nieweglowski, Ramanujan.

Bennett, A. A. On sets of three consecutive integers which are quadratic residues of primes, 31, 411.

Consecutive quadratic residues, 32, 283.

The distributive laws for homogeneous linear systems, 37, 766.

INDEX—VOLUMES XXXI—XL

— See Reviews, under Becker, Behmann, Charbonnier, Enriques, Joly, Osgood.

Bennett, W. R. Note on relations between elliptic integrals and Schlömilch series, 38, 843.
— See Reviews, under Abason.

Benton, T. C. A definition of an unknotted simple closed curve, 36, 406.
— See Reviews, under d'Abro, Fraenkel, Kamke.

— A general theory of representation of finite operations and relations, 32, 533.
— The dual of a logical expression, 33, 309.
— Irredundant sets of postulates for the logic of propositions, 35, 545.
— Whitehead and Russell's theory of deduction as a mathematical science, 37, 480.
— Application of Boolean algebra to proving consistency and independence of postulates, 37, 715.
— On proposition *4.78 of Principia Mathematica, 38, 388.
— Relation of Whitehead and Russell's theory of deduction to the Boolean logic of propositions, 38, 589.
— On unit-zero Boolean representations of operations and relations, 38, 707.
— Remarks on propositions *1.1 and *3.35 of Principia Mathematica, 39, 111.
— Simplification of the set of four postulates for Boolean algebras in terms of retraction, 39, 783.
— On section A of Principia Mathematica, 39, 788.

— Reports of meetings of the American Mathematical Society: 31, 110, 385, 488; 32, 97, 212, 417; 33, 2, 269, 513; 34, 15, 433, 545; 35, 11, 593; 36, 10; 39, 316.

Birkhoff, Garrett. Axiomatic definitions of perfectly separable metric spaces, 39, 601.
— On the lattice theory of ideals, 40, 613.

Birkhoff, G. D. A mathematical critique of some physical theories, 33, 165.
— Probability and physical systems, 38, 361.
— The mathematical work of Oliver DeWitt Kellogg, 39, 171.
— Quantum mechanics and asymptotic series, 39, 681.
— See Reviews, under Humbert, G., Landau, Poincaré.
— See Veblen, O.

Bishop, K. E. Abstract defining relations for the simple group of order 5616, 37, 91.

Black, Amos. Types of involutorial space transformations associated with certain rational curves—composite basis curves, 40, 417.

Blasshke, Wilhelm. Results and problems about n-webs of curves in a plane, 38, 828.

Bliss, G. A. A boundary value problem in the calculus of variations, 32, 317.
— The calculus of variations and the quantum theory, 38, 201.
— Eliakim Hastings Moore, 39, 831.
— The scientific work of Eliakim Hastings Moore, 40, 501.
— See Birkhoff, G. D., Tonelli, Leonida, Veblen, Oswald.
— See Reviews, under Forsyth, A. R., Vivanti.

Bliss, G. A., and Schoenberg, I. J. On the derivation of necessary conditions for the problem of Bolza, 38, 858.

Blumberg, Henry. Properties of unrestricted real functions, 32, 132.
— Note on a theorem of Kempner concerning transcendental numbers, 32, 351.
— On a complete characterization of the set of points of unbounded grade of an arbitrary surface, 36, 655.
— Methods in point sets and the theory of real functions, 36, 809.
— Note on sets of positive measure, 39, 369.

Blumenthal, L. M. The norm of a space configuration, 34, 726.
— An application of metric geometry to determinants, 37, 752.
Note on Volterra and Fredholm products of symmetric kernels, 37, 891.

Note on an application of metric geometry to determinants, 38, 283.

A note on the four-point property, 39, 423.

Bol, Gerrit. On n-webs of curves in a plane, 38, 855.

Borsuk, Karol, and Ulam, Stanislaw. On symmetric products of topological spaces, 37, 875.

See Reviews, under Milne-Thomson.

Breit, Gregory. See Reviews, under Mott.

— On the summability and generalised sum of a series of Legendre polynomials, 39, 821.

Brouwer, Dirk. See Reviews, under Moulton.

Brown, A. B. On the join of two complexes, 37, 417.

— Note on the form of a first-order partial differential equation, 40, 475.

— See Reviews, under Encyklopädie.

Brown, E. W. Resonance in the solar system, 34, 265.

— See Reviews, under Born, Rigge.

Brown, O. E. The equivalence of triples of bilinear forms, 37, 424.

Browne, E. T. The characteristic equation of a matrix, 34, 363.

The characteristic roots of a matrix, 36, 705.

Bush, L. E. Note on the discriminant matrix of an algebra, 38, 49.

— On Young's definition of an algebra, 39, 142.

Byrne, W. E. See Reviews, under Garnier.

Cajori, Florian. See Smith, D. E.

— See Reviews, under Enriques, Euler, Fladt, Huygens, Neugebauer, Ptolémée, Reymond.

Cameron, R. H. Implicit functions of almost periodic functions, 40, 895.

Camp, B. H. See Reviews, under Holzinger, Jordan, Rietz, Secrist.

Camp, C. C. A method for accelerating the convergence in the process of iteration, 33, 209.

— See Reviews, under Duarte.

Campbell, A. D. Three-parameter and four-parameter linear families of conics in the Galois fields of order 2^n, 33, 608.

— The polar curves of plane algebraic curves in the Galois fields, 34, 361.

— Nets of conics in the Galois fields of order 2^n, 34, 481.

— Note on the Plücker equations for plane algebraic curves in the Galois fields, 34, 718.

— Note on linear transformations of n-ics in m variables, 35, 691.

— Edward Drake Roe, Jr.—in memoriam, 36, 161.

— A polarity in the Galois fields of order 2^n, 38, 52.

— Pseudo-covariants of an n-ic in m variables in a Galois field that consist of terms of this n-ic, 39, 252.

— Note on cubic surfaces in the Galois fields of order 2^n, 39, 406.

Campbell, J. W. See Reviews, under Hayashi.

Carathéodory, Constantin. Remark on a theorem of Osgood concerning convergent series of analytic functions, 34, 721.

Carlitz, Leonard. On a function connected with a cubic field, 37, 73.

— Note on diophantine automorphisms, 38, 246.

— New diophantine automorphisms, 38, 271.
INDEX—VOLUMES XXXI-XL

— On polynomials in a Galois field, 38, 736.
— On a theorem of higher reciprocity, 39, 155.
Carlson, Elizabeth. On the convergence of trigonometric approximations for a function of two variables, 32, 639.
Carmichael, R. D. Concerning quasi-k-fold transitivity of permutation groups, 36, 857.
— Note on triple systems, 38, 695.
— Functions of exponential type, 40, 241.
See Reviews, under Birkhoff, Birtwistle, de Broglie, Burke, Chwolson; Davis, Eddington, Einstein, Gent, Hahn, Halphen, Heyl, Hobson, Lamb, Latzin, Laurès, Li, Nörlund, Northrop, Planck, Smart, Sommerfeld, Weyl.
Carpenter, A. F. A theorem on ruled surfaces, 34, 479.
— Note on ruled surfaces and their developables, 36, 525.
— A triad of ruled surfaces defined by reciprocal polars, 38, 95.
Carslaw, H. S. A historical note on Gibbs' phenomenon in Fourier's series and integrals, 31, 420.
Carson, J. R. The heaviside operational calculus, 32, 43.
— A generalized two-dimensional potential problem, 33, 296.
Carver, W. B. See Reviews, under Enriques, Young, J. W.
Cauer, Wilhelm. The Poisson integral for functions with positive real part, 38, 713.
Charpentier, Marie. On certain dynamical systems with points of Peano, 38, 849.
— See Reviews, under Phillips, E. G., Titchmarsh.
