AN ADDITION TO “GENERALIZATIONS OF THE BERNOULLI POLYNOMIALS AND NUMBERS AND CORRESPONDING SUMMATION FORMULAS”

TOMLINSON FORT

In the third paragraph of my paper Generalizations of the Bernoulli polynomials and numbers and corresponding summation formulas, published in this Bulletin, vol. 48 (1942), pp. 567–574, no explicit statement is made of the fact that it is assumed that $P$ and $Q$ as operators on $x$ obey the laws: $PF(x+c)_{c=0}=PF(x)$; $QF(x+c)_{c=0}=QF(x)$.

Also the statement $f_n(0)=0$, should read $f_n(0)=0$, $n>0$.
