THREE IBM CAREER OPPORTUNITIES
WHERE THE COMMON DENOMINATOR IS

MATHEMATICS

COMPUTER PROGRAMMING at IBM is being extended to include many new areas—such as orbit computation, meteorological satellites, space probes, information retrieval, design automation, real-time systems, and optical studies. As a result, we are greatly expanding our programming staff, creating opportunities for people with various levels of experience. Assignments involve a wide variety of problems in science, business, and government.

Qualifications: Degree in Math, Statistics, the Physical Sciences, Engineering or Engineering Science ... plus one year's programming experience.

MATHEMATICS RESEARCH at IBM involves interesting challenges in a wide variety of areas. These include matrix algebra; logic; mathematical physics; and probability, communication and information theory. Other fields which are also being subjected to intensive study are numerical analysis, combinatorial topology, and operations research.

Qualifications: B.S., M.S., or Ph.D. in Math, Physics, Statistics, Engineering Science, or Electrical Engineering—and proven ability to assume important technical responsibilities in your sphere of interest.

APPLIED MATHEMATICS offers unusually fine opportunities for the math-oriented. You will be asked to apply your knowledge of mathematical and statistical analysis, probability, logic, and coding to advanced computer development problems. Assignments may take you into computer systems design, component engineering, human factors engineering, or feed-back control theory, information and communication theory, inertial guidance, and scientific programming.

Qualifications: B.S. or Advanced Degree in Math, Physics, or Statistics—plus related experience.

There is a wide and diverse range of career opportunities at IBM: Advancement is rapid. The demands of a constantly expanding program of research and development, and promotion from within, based on individual merit and achievement, make this possible. Working alone or on a small team, you'll find that specialized assistance is readily available.

For details, write, outlining your background and interests, to:
Mr. R. E. Rodgers, Dept. 529M
IBM Corporation
590 Madison Avenue, New York 22, N. Y.
Announcing a new series of books
Proceedings of Symposia in Pure Mathematics
Volume 1

FINITE GROUPS

The eleven articles in this book are texts of addresses which were delivered at a symposium held in April, 1959. The discussions at the symposium were lively and served to indicate an enormous renewed interest in one of the oldest branches of algebra. The major new results in the field which are brought out in this book should serve to stimulate research activity in the Theory of Groups, one of the most beautiful subjects of mathematics.

The authors contributing papers to this book are:

J. G. THOMPSON  WALTER FEIT  MICHIO SUZUKI
R. C. LYNDON  MARSHALL HALL, JR.  W. E. DESKINS
DANIEL GORENSTEIN  DANIEL HUGHES  HANS ZASSENHAUS
H. S. M. COXETER  WILHELM MAGNUS

ASYMPTOTIC BEHAVIOR OF SOLUTIONS OF DIFFERENTIAL-DIFFERENCE EQUATIONS

by RICHARD BELLMAN and K. L. COOKE

This paper provides the first detailed discussion of the determination of the asymptotic series for the solutions of linear differential-difference equations whose coefficients possess asymptotic series.

91 pages  25% discount to members  $2.00

AMERICAN MATHEMATICAL SOCIETY
190 Hope Street, Providence, Rhode Island
UNIVERSITY OF CINCINNATI
Graduate Department of Mathematics

ANNUAL OFFERINGS in Algebra, Real and Complex Analysis, Geometry, Topology, Applied Mathematics

ADDITIONAL OFFERINGS (1960-61) include Mathematical Logic, Differential Geometry, Theory of Lie Groups, Algebraic Numbers, Integral Equations, Group Theory and Quantum Mechanics, Advanced Seminars in Algebra and in Analysis

DOCTORAL THESES in Algebra, Analysis, Applied Mathematics

MASTER'S THESES in Various fields

FELLOWSHIPS AND TEACHING ASSISTANTSHIPS available (an assistant teaches no more than three semester-hours per week). For information and application blanks (due 1 March, 1960) write DEAN of the GRADUATE SCHOOL, University of Cincinnati, Cincinnati 21, Ohio

The Newest Books from VAN NOSTRAND

IN THE UNIVERSITY SERIES IN UNDERGRADUATE MATHEMATICS

AXIOMATIC SET THEORY
By Patrick Suppes, Stanford University
This text carefully develops the Zermelo-Fraenkel system of set theory from the axiomatic standpoint. The proofs are presented informally but in such a way that they can easily be fitted into a formal system of logic. A great many exercises have been included. Ready in March

FINITE MARKOV CHAINS
By John G. Kemeny and J. Laurie Snell, both at Dartmouth College
224 pages, $6.00

REAL ANALYSIS
By Edward J. McShane and Truman Botts, both at the University of Virginia
288 pages, $6.60

VAN NOSTRAND

Princeton, N. J.
TO MATHEMATICIANS

who would affiliate with an expanding scientific community

THE MITRE CORPORATION

AFFORDS AN OPPORTUNITY TO MAKE CREATIVE CONTRIBUTIONS IN THE DESIGN AND DEVELOPMENT OF LARGE-SCALE SYSTEMS

Formed under the sponsorship of the Massachusetts Institute of Technology, with a professional staff nucleus of the men who designed and developed the SAGE System, it is MITRE's responsibility to provide the required scientific and engineering services for the integration of air defense systems.

Inherent within this continuing system engineering task is an opportunity for mathematicians to range widely across their discipline and explore new mathematical areas applicable to computer-based systems operating in real time. Immediate career openings are available for individuals with qualifications prerequisite to making important individual contributions in these areas:

- Operations Research and Analysis
- Applied Mathematics
- Computer Design and Analysis
- Communication Theory
- Game Theory
- Field Theory
- Logic
- Mathematical and Numerical Analysis
- Probability Theory
- Statistics
- Programming Research
- Mathematical Model Building
- Computer Programming

Conveniently located in suburban Boston, MITRE's modern facilities afford mathematicians some of the most up-to-date computer equipment obtainable: Two large-scale, high-speed digital computers – the IBM 704 and an experimental SAGE AN/FSQ-7. These machines will soon be augmented by an IBM 7090 and a solid state SAGE computer.

Equally challenging openings exist at MITRE's additional computer facilities in Fort Walton Beach, Florida and Montgomery, Alabama.

To arrange an immediate confidential interview please send resume to Dana N. Burdette, Personnel Director, Dept. 3-C

THE MITRE CORPORATION
244 Wood Street – Lexington 73, Massachusetts

A brochure more fully describing MITRE and its activities is available on request.
Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society
This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems, and a department of research announcements.

The subscription price is $7.00 per annual volume of six numbers.
Research Problems and Invited Addresses offered for publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to J. C. OXTOBY, Bryn Mawr College, Bryn Mawr, Pennsylvania. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Department of Mathematics, University of Michigan, Ann Arbor, Michigan. All other communications to the editors should be sent to the Managing Editor, E. E. MOISE.

Proceedings of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is $11.00 per annual volume of six numbers.
Papers in algebra and number theory should be sent to ALEX ROSENBERG, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic and foundations to P. R. HALMOS, ECKHART HALL, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to HANS SAMUELSON, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, LUNT BUILDING, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

Transactions of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The subscription price is $8.00 per volume.
Papers in analysis, applied mathematics and probability should be sent to LIPMAN BERS, Institute of Mathematical Sciences, New York University, New York, New York; in topology to W. S. MASSEY, Department of Mathematics, Brown University, Rhode Island; in algebra, number theory, and logic to G. P. HOCHSCHILD, Department of Mathematics, University of California, Berkeley 4, California; in geometry and abstract analysis to I. M. SINGER, Institute of Mathematical Sciences, New York University, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, LIPMAN BERS.

Mathematical Reviews
This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.
MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is $50.00 per annual volume of eleven numbers.

Notices of the American Mathematical Society
This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.
The subscription price is $7.00 per annual volume of 7 numbers. A single copy is $2.00.
All communications should be addressed to the Editor, G. L. WALKER, 190 Hope Street, Providence 6, R. I. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts of the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover page.
