Creating new systems of automatic programming

One of the most challenging facets of programming is the creation and implementation of automatic programming systems. Substantial progress has been made over the past three years. As in any pioneering effort, however, new problems constantly arise. Here are a few of the frontier areas of programming you might work in at IBM:

- New logical scanning techniques for programming languages . . .
- New, more powerful languages for the statement of problems . . .
- Processors to translate programming languages into efficient machine language programs . . .
- Advanced languages powerful enough to describe their own processors . . .
- Programming concepts affecting logical machine design . . .
- The general solution of these problems will lead to techniques applicable to many families of computers. If you are a qualified programmer or mathematician and are interested in joining professional people working in a professional atmosphere, with ample computer time to test your ideas, write to:

  Manager of Technical Employment
  IBM Corporation, Dept. 529 O
  590 Madison Avenue
  New York 22, New York

While in New York for the American Mathematical Society meeting, you are invited to visit with IBM, or call PLaza 3-0495 for an appointment to discuss career opportunities.
MATHEMATICIANS

With an interest in theoretical and applied statistics are invited to join an expanding scientific community

MITRE, a system engineering and development organization formed under the sponsorship of the Massachusetts Institute of Technology, has the unusual responsibility for providing engineering solutions to the varied and complex problems inherent in large-scale computer-based man-machine systems.

Within a complete system context, MITRE's tasks involve the establishment of system objectives, the development of design specifications, prototype equipment engineering of components as well as of major subsystems, analysis of subsystem interactions and evaluation of the operational system.

Mathematicians with a wide range of interests in statistical methods and techniques and an appreciation of the complexities of system work will find an excellent cross-disciplined environment in which to apply their professional backgrounds in such diversified areas as:

- Operations Research
- Psychometrics
- Monte Carlo Methods
- Real Time Simulations
- Information Theory
- Numerical Analysis
- Econometrics
- Game Theory
- Probability Studies

NEW YORK INTERVIEWS DURING IRE CONVENTION
MARCH 21-22-23-24

Senior members of the Technical Staff will be available for interviews at the MITRE suite in the Waldorf Astoria Hotel.

If you prefer to arrange an appointment in advance, you are invited to CALL COLLECT,
Frank Balanis, Lexington, Massachusetts • Volunteet 2-8950

To arrange an immediate confidential interview, please forward your resume to Dana N. Burdette, Personnel Director, Dept. 3-BE

THE MITRE CORPORATION
244 Wood Street – Lexington 73, Massachusetts

A brochure more fully describing MITRE and its activities is available on request.
Mathematics
Section Head

Outstanding Opportunity for
Capable Young Man to Move
Up to a Top Position in
Communications Research

RESPONSIBILITIES
Will supervise and give technical direction to the activities of a group of mathematicians, physicists, and engineers in research and support activities in the general area of mathematical analysis. Must be capable of directing analysis and evaluation of communications systems, basic and applied research in mathematical areas related to communications, and analytical and theoretical design support activities of a Communications Department. Will also supervise the preparation of technical proposals and customer briefings for obtaining contract support in the subject area.

EDUCATIONAL REQUIREMENTS
PhD in Mathematics, or PhD in EE with Information Theory major desirable. MS in Math, Physics, or EE considered if accompanied by relevant experience.

EXPERIENCE
3 to 4 years experience in communications area desirable. Acquaintance with computers and computing techniques desirable but not necessary.

Please write in confidence to Dr. R. L. San Soucie

ILLINOIS JOURNAL OF MATHEMATICS
A quarterly journal of basic research in pure and applied mathematics published by the University of Illinois, Urbana.

edited by
REINHOLD BAER • J. L. DOOB
A. H. TAUB • GEORGE W. WHITEHEAD
PAUL T. BATEMAN • OSCAR ZARISKI

The subscription price is $9.00 a volume (four numbers); this is reduced to $5.00 for individual members of the American Mathematical Society. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois.

ENZYKLOPADIE DER MATHEMATISCHEN WISSENSCHAFTEN
Herausgegeben im Auftrage der Akademien der Wissenschaften zu Berlin, Göttingen, Heidelberg, Leipzig, München und Wien sowie unter Mitwirkung zahlreicher Fachgenossen

Band I Algebra und Zahlentheorie
2., völlig neubearbeitete Auflage, herausgegeben von Prof. Dr. M. Deuring, Göttingen, und Prof. Dr. G. Köthe, Heidelberg, mit Unterstützung der Akademie der Wissenschaften zu Mainz und unter Mitwirkung des Forschungsinstitutes für Mathematik in Oberwolfach

Band I 2, Heft 10, Teil II:
Die Klassenkörper der komplexen Multiplikation. Von Prof. Dr. M. Deuring, Göttingen. 60 Seiten. Gr. 8°. 1958. Brosch. DM 15,—

Band I 1, Heft 3, Teil II:

Boundary Problems in Differential Equations
edited by Rudolph E. Langer

BOUNDARY PROBLEMS IN DIFFERENTIAL EQUATIONS is comprised of the nineteen papers which were delivered at The Symposium on Boundary Problems in Differential Equations conducted by the Mathematics Research Center, United States Army, at the University of Wisconsin, Madison, April 20-22, 1959. $4.00

On Numerical Approximation
edited by Rudolph E. Langer

ON NUMERICAL APPROXIMATION is comprised of the twenty-one papers which were delivered at The Symposium on Numerical Approximation conducted by the Mathematics Research Center, United States Army, at the University of Wisconsin in April, 1958. The objective of this symposium was the presentation and discussion of recent developments in the field of numerical approximation. The papers are centered around three general themes: Linear Approximation, Extremal Approximation, and Algorithms. $4.50

430 Sterling Court Madison 6, Wisconsin

MATHEMATICIAN

Master degree with knowledge of linear programming and model construction methods. Computer programming experience desirable but not essential.

Will work with central analysis and planning group of major integrated oil company. Assignments will embrace mathematical analysis and solution of problems in exploration, production and refining of crude oil, and distribution of petroleum products.

General Office now in Chicago loop. Moving to new suburban headquarters near Palatine in fall.

New Books in the UNIVERSITY SERIES IN UNDERGRADUATE MATHEMATICS

NAIVE SET THEORY
by Paul R. Halmos, University of Chicago
This brief, informal exposition of set theory is written from the viewpoint of a prospective mathematician whose main interest is not in the foundations of mathematics but in such concrete mathematical objects as groups, integrals, and manifolds. With a minimum of philosophical discourse and logical formalism, Professor Halmos tells the beginning graduate student what he considers "the basic set-theoretic facts of life." 110 pages, April 1960, about $3.50

AXIOMATIC SET THEORY
by Patrick Suppes, Stanford University
This new text approaches set theory in a careful way from the axiomatic standpoint. No mathematical prerequisites are assumed, although students without some background in logic or mathematics may find the treatment difficult. Professor Suppes clearly develops the Zermelo-Fraenkel system of set theory at a level suitable to advanced undergraduate or beginning graduate courses. 260 pages, March 1960, about $6.00

VAN NOSTRAND
Princeton, N. J.
Proceedings of Symposia in Applied Mathematics
Volume 9

ORBIT THEORY

These proceedings of a symposia held in April, 1957, in New York contain the following papers:

Orbit Stability in Particle Accelerators  
E. D. Courant

Motion of Cosmic-Ray Particles in Galactic Magnetic Fields  
Stanislaw Olbert

Störmer Orbits  
W. H. Bennett

General Theory of Oblateness Perturbations  
Paul Herget

Fundamental Problems in Predicting Positions of Artificial Satellites  
F. L. Whipple

Cislunar Orbits  
K. A. Ehricke

Satellite Launching Vehicle Trajectories  
J. W. Siry

Numerical Determination of Precise Orbits  
W. J. Eckert

Comments on General Theories of Planetary Orbits  
Dirk Brouwer

Orbits in Birkhoff's Central Field  
Carlos Graef-Fernandez

195 pages  25% discount to members  $7.20

AMERICAN MATHEMATICAL SOCIETY
190 Hope Street, Providence, Rhode Island

A new series of books

Proceedings of Symposia in Pure Mathematics
Volume 1

FINITE GROUPS

The eleven articles in this book are texts of addresses which were delivered at a symposium held in April, 1959. The discussions at the symposium were lively and served to indicate an enormous renewed interest in one of the oldest branches of algebra. The major new results in the field which are brought out in this book should serve to stimulate research activity in the Theory of Groups, one of the most beautiful subjects of mathematics.

The authors contributing papers to this book are:

J. G. THOMPSON  
WALTER FEIT  
Michio SUZUKI

R. C. LYNDON  
MARSHALL HALL, JR.  
W. E. DESKINS

DANIEL GORENSTEIN  
DANIEL HUGHES  
HANS ZASSENHAUS

H. S. M. COXETER  
  
WILHELM MAGNUS

120 pages  25% discount to members  $3.90

choice positions offering:

PROFESSIONAL ATMOSPHERE The Missile and Space Vehicle Department of General Electric is a progressive and dynamic organization involved in a variety of space programs. Currently under construction is a $14,000,000 space research center in suburban Valley Forge which will become the headquarters for the Department upon completion in the Summer of 1961. This facility will provide the ultimate in technical facilities and is located in one of the nation's finest residential areas.

CHALLENGING TECHNICAL WORK Assignments on space vehicle and satellite programs covering such areas as trajectory studies, space navigation, analysis of flight telemetry data and space communications.

RECOGNITION The applied mathematics group provides consulting services to our entire engineering staff. Salary and professional growth are given corresponding emphasis.

Desirable experience and background would include strong analytical ability, extensive knowledge of advanced techniques in numerical analysis for computers and experience in mathematical investigations on advanced engineering programs. MS or PhD in Mathematics or Theoretical Physics required.

We invite you to send a brief resume of your background to: D. G. Curley, Div. 759

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is $7.00 per annual volume of six numbers.

Research Problems and Invited Addresses offered for publication should be sent to WALTER RUDIN, Department of Mathematics, University of Wisconsin, Madison, Wisconsin; Book Reviews to J. C. OXTOBY, Bryn Mawr College, Bryn Mawr, Pennsylvania. Research Announcements offered for publication should be sent to some member of the Council of the Society, and communicated by him to E. E. MOISE, Department of Mathematics, University of Michigan, Ann Arbor, Michigan. All other communications to the editors should be sent to the Managing Editor, E. E. MOISE.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length.

The subscription price is $11.00 per annual volume of six numbers.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in other branches of analysis, applied mathematics, and all other fields to R. P. Boas, Lunt Building, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. HALMOS.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1960. The subscription price is $8.00 per volume.

Papers in analysis, applied mathematics and probability should be sent to LIPMAN BERS, Institute of Mathematical Sciences, New York University, New York, New York; in topology to W. S. MAASS, Department of Mathematics, Brown University, Rhode Island; in algebra, number theory, and logic to G. P. HOCHSCHILD, Department of Mathematics, University of California, Berkeley 4, California; in geometry and abstract analysis to I. M. SINGER, Institute of Mathematical Sciences, New York University, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, LIPMAN BERS.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

MATHEMATICAL REVIEWS is published monthly, excepting July. The subscription price is $50.00 per annual volume of eleven numbers.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is $7.00 per annual volume of 7 numbers. A single copy is $2.00. All communications should be addressed to the Editor, G. L. WALKER, 190 Hope Street, Providence 6, R. I. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts of the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the inside front cover page.
Some Recent Publications of the Society

E. M. Zaustinsky. *Spaces with non-symmetric distance.* Memoir 34. $2.00

Richard Bellman and K. L. Cooke. *Asymptotic behavior of solutions of differential-difference equations.* Memoir 35. $2.00

L. P. Eisenhart. *Non-Riemannian geometry.* Published in 1927 and reprinted in 1958, Colloquium Volume 8. $4.90

E. Hille and R. S. Phillips. *Functional analysis and semi-groups.* An enlarged and completely revised edition of Colloquium Volume 31, of the same title, by Hille. $13.80

N. Jacobson. *Structure of rings.* Colloquium Volume 37. $7.70

C. Chevalley. *Introduction to the theory of algebraic functions of one variable.* Mathematical Surveys Volume 6. $4.00

S. Bergman. *The kernel function and conformal mapping.* Mathematical Surveys Volume 5. $4.00

Russian Translations. Volume 9. *Four papers on group theory.* $5.00

Russian Translations. Volume 11. *Four papers on topology.* $5.90

Russian Translations. Volume 12. *Twelve papers on analysis, probability and topology.* $4.60

The price to members of the American Mathematical Society is 25% less than list.
