JOURNALS PUBLISHED BY
THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society is a bimonthly journal. In 1978 it will contain officially invited addresses presented before the Society, reviews of advanced mathematical books, and research announcements. Communications concerning the Bulletin should be sent to P. R. Halmos Dept. of Mathematics, University of California at Santa Barbara, Santa Barbara, CA 93106.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Papers in algebraic and differential topology should be sent to Reinhard E. Schultz, Dept. of Mathematics, Purdue University, West Lafayette, IN 47907; in combinatorics and discrete mathematics to Thomas H. Brylawski, Dept. of Mathematics, University of North Carolina, Chapel Hill, NC 27514; in commutative algebra to David Eisenbud, Dept. of Mathematics, Brandeis University, Waltham, MA 02154; in complex variables and analytic number theory to W. E. Kirwan, Dept. of Mathematics, University of Maryland, College Park, MD 20742; or to Lawrence A. Zalcman, Dept. of Mathematics, University of Maryland, College Park, MD 20742; in differential equations to Richard K. Miller, Dept. of Mathematics, Iowa State University, Ames, IA 50010; in functional analysis and operator theory to Chandler Davis, Dept. of Mathematics, University of Toronto, Toronto M5S 1A1, Canada or to Ronald G. Douglas, Dept. of Mathematics, State University of New York at Stony Brook, Stony Brook, NY 11790 or to Robert R. Phelps, Dept. of Mathematics, University College London, Gower Street, London WC1E 6BT, England; in general algebra to Robert W. Wilson, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903; in general analysis to Richard R. Goldberg, Dept. of Mathematics, Vanderbilt University, Nashville, TN 37235; in general topology to David J. Lutzer, Dept. of Mathematics, Texas Tech University, Lubbock, TX 79409 or to Thomas A. Chapman, Dept. of Mathematics, University of Kentucky, Lexington, KY 40506; in geometry to Joseph A. Wolf, Dept. of Mathematics, University of California at Berkeley, Berkeley, CA 94720; in group theory to Norman Blackburn, Dept. of Mathematics, The University, Manchester M13 9PL, England; in logic and foundations to Paul C. Eklof, Dept. of Mathematics, University of California at Irvine, Irvine, CA 92717; in probability and other fields to Naresh Jain, School of Mathematics, 127 Vincent Hall, University of Minnesota, Minneapolis, MN 55455; in real variables to Richard A. Hunt, Dept. of Mathematics, Purdue University, Lafayette, IN 47907. All other communications should be addressed to Joseph A. Wolf at the above address.
Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, James H. Bramble, Center for Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, NY 14853.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Abstracts and reviews are grouped under subject headings.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Papers in real analysis (excluding harmonic analysis) and applied mathematics should be sent to Robert T. Seeley, Dept. of Mathematics, University of Massachusetts at Boston, Harbor Campus, Boston, MA 02125; in harmonic and complex analysis to Hugo Rossi, Dept. of Mathematics, University of Utah, Salt Lake City, UT 84112; in abstract analysis to W. A. J. Luxemburg, Dept. of Mathematics, California Institute of Technology Pasadena, CA 91125; in algebra and number theory (excluding universal algebras) to Stephen S. Shatz, Dept. of Mathematics, University of Pennsylvania, Philadelphia, PA 19174; in logic, foundations, universal algebras and combinatorics to Solomon Feferman, Dept. of Mathematics, Stanford University, Stanford, CA 94305; in topology to James D. Stasheff, Dept. of Mathematics, Temple University, Philadelphia, PA 19122; in global analysis and differential geometry to Alan D. Weinstein, Dept. of Mathematics, University of California at Berkeley, Berkeley, CA 94720; in probability and statistics to Daniel W. Stroock, Dept. of Mathematics, University of Colorado, Boulder, CO 80302.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

Notices of the American Mathematical Society, published eight times a year, announces the programs of the meetings of the Society. The NOTICES carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematician scientists. All communications should be addressed to the Editor, American Mathematical Society, P.O. Box 6248, Providence, RI 02940. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced that issue. These deadlines are published regularly on the inside front cover.

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.
TRANSLATION JOURNALS

Soviet Mathematics-Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMIÏ NAUK SSSR, the Reports of the Academy of Sciences in the USSR. DOKLADY publishes 500 articles a year, each about four pages long.

Mathematics of the USSR-Izvestija, a bimonthly journal is a cover-to-cover translation of IZVESTIA AKADEMIÏ NAUK SSSR SERIJA MATEMATIČESKAJA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Mathematics of the USSR-Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATIČESKIİ SBORNIK (NOVAJA SERIJA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIJA VEROIATNOSTEI I MATEMATIČESKAJA STATISTIKA published by Kiev University, beginning with the 1970 Soviet publication.

Vestnik of the Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVERSITETA, beginning with the Soviet publication of 1968. All fields of mathematics are covered.
CONTENTS

March 1978

J. FRÖHLICH. The pure phases (harmonic functions) of generalized processes or: Mathematical physics of phase transitions and symmetry breaking......................................................... 165

RICHARD A. HUNT. Harmonic measure and estimates of Green's function....................................................... 194

MICHAEL R. STEIN. Whitehead groups of finite groups......................................................................................... 201

ARUNAS LIULEVICIUS. Homotopy rigidity of linear actions: characters tell all.................................................. 213

BOOK REVIEWS

AVRON DOUGLIS. The wave equation on a curved space-time by F. G. Friedlander.......................... 222

ELLIS JOHNSON. Integer programming and network flows by T. C. Hu; Integer programming by Harold Greenberg; Integer programming by R. S. Garfinkel and G. L. Nemhauser; Mathematical programming by T. C. Hu and Stephen M. Robinson; Integer programming by Harvey M. Salkin; and Integer programming: Theory, applications and computations by Hamdy A. Taha.......................................................... 228

C. R. MIERS. Rings with involution by I. N. Herstein......................................................................................... 231

MARSHALL H. STONE. Courant in Göttingen and New York — The story of an improbable mathematician by Constance Ried.............................................................. 234

R. G. AYOUB. Trigonometrical sums in number theory by I. M. Vinogradov........................................... 250

S. J. PATTERSON. The Selberg trace formula for $PSL(2, R)$, Volume I by Dennis A. Hejhal......................................................... 256

DONALD SARASON. Gaussian processes, function theory, and the inverse spectral problem by H. Dym and H. P. McKean............................................................. 260

GEORGE C. PAPANICOLAOU. Probability methods for approximations in stochastic control and for elliptic equations by Harold J. Kushner................................................. 262

LINDA PREISS ROTHCHILD. Estimates for the $\delta$-Neumann problem by P. C. Greiner and E. M. Stein................................................................. 266

M. E. RUDIN. Aspects of topology by Charles O. Christenson and William L. Voxman; and Set-theoretic topology: With emphasis on problems from the theory of coverings, zero dimensionality and cardinal invariants by Gregory L. Naber......................................................... 271

RESEARCH ANNOUNCEMENTS

HARALD NIEDERREITER. The serial test for linear congruential pseudo-random numbers.......................................................... 273

I. GOHBERG, L. LERER AND L. RODMAN. Factorization indices for matrix polynomials........................................... 275

EBERHARD BECKER. Hereditarily pythagorean fields, infinite Harrison-primes and sums of $2^n$th powers......................................................................................... 278

ISRAEL AHARONI AND JORAM LINDENSTRAUSS. Uniform equivalence between Banach spaces......................................................... 281

N. METROPOLIS AND GIAN-CARLO ROTA. On the lattice of faces of the $n$-cube........................................... 284

A. P. CALDERÓN, C. P. CALDERÓN, E. FABES, M. JODEIT AND N. M. RIVIERE Applications of the Cauchy integral on Lipschitz curves......................................................... 287
