JOURNALS PUBLISHED BY
THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics--Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR--Izvestija, a bimonthly journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATICESKAJA.

Mathematics of the USSR--Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATICKI I SBORNIK (NOVAJA SERIJA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIJA VEROJATNOSTEI I MATEMATICHESKAIA STATIESTIKA.

Vestnik of the Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVERSITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of the PROCEEDINGS OF THE STEKLOV INSTITUTE OF MATHEMATICS IN THE ACADEMY OF SCIENCES OF THE USSR.

RESEARCH JOURNALS

Submission information for these journals is included in the May and September issues of this Bulletin.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Abstracts and reviews are grouped under subject headings.
BULLETIN (New Series) of the American Mathematical Society

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Lipman Bers                      John W. Milnor
Felix E. Browder,               Donald S. Ornstein
      Chairman
Fredrick W. Gehring             James B. Serrin
Irving Kaplansky                Stephen Smale

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Irving Kaplansky                Cathleen S. Morawetz
Robert P. Langlands            David Mumford
Richard K. Lashof              Gian-Carlo Rota
Hugh P. McKean, Jr.            I. M. Singer, Chairman
Hugh L. Montgomery             Elias M. Stein

BOOK REVIEW EDITOR:           Meyer Jerison
MANAGING EDITOR:                I. M. Singer

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The Manual
for Authors, available from the Society, should be consulted for symbols and style conven-
tions. Authors should take the greatest possible care in preparing the original manuscript. Hand
drawn symbols are satisfactory, if clearly done; directions to the printer should be included
where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should
include subject classification numbers representing the primary and secondary subjects of the
article. The 1980 Mathematics Subject Classification can be found in the December index vol-
umes of Mathematical Reviews.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in
the BULLETIN. A copy of the agreement is sent to authors upon receipt of a manu-
script in the Providence Office of the Society; in case of joint authors, copies are sent to
the author who is designated to receive galley proof. Authors are urged to return the
form immediately to prevent delays in processing and publishing of the manuscript. The
1978 edition of the Manual for Authors has a description of Society policy concerning
copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of $40.00 per page to help defray
the cost of publication. This amount is charged to the institution or to a contract support-
ing the research reported in the published paper. The publication charge policy of
the United States Federal Council for Science and Technology (FCST) is reported on
page 112 of the February, 1975 issue of the NOTICES of the American Mathematical So-
ciety. In no case is the author personally responsible for paying the page charge, nor is
acceptance of the author’s paper for publication dependent upon payment of the page
charge.

ABCDFGHIJ—BAN—89876543210
REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write CCC Operations Staff, P.O. Box 765, Schenectady, New York 12301).
RESEARCH – EXPOSITORY PAPERS

Scattering theory for automorphic functions by Peter D. Lax and Ralph S. Phillips.............. 261

RESEARCH ANNOUNCEMENTS

Counterexamples to global Torelli for certain simply connected surfaces by Kenneth N. Chakiris.............................................................. 297

A characterization of hereditary rings of finite representation type by Piotr Dowbor and Daniel Simson................................................................. 300

On Hurwitz' "84(g — 1) theorem" and pseudofree actions by R. S. Kulkarni....................... 303

Solomon's conjectures and the local functional equation for zeta functions of orders by Colin J. Bushnell and Irving Reiner............................................... 306

On simplicity of certain infinite dimensional Lie algebras by V. G. Kac.............................. 311

The cell-like mapping problem by George Kozlowski and John J. Walsh.............................. 315

On the union of sets of synthesis and Ditkin's condition in regular Banach algebras by Aharon Atzmon................................................................. 317

BOOK REVIEWS

Algebraic number theory by Robert L. Long A classical invitation to algebraic numbers and class fields by Harvey Cohn Number fields by Daniel A. Marcus—Reviewed by Harold Edwards................................................................. 321

The computer revolution in philosophy: Philosophy, science and models of mind by Aaron Sloman—Reviewed by Douglas R. Hofstadter................................................................. 328

Interpolation theory, function spaces, differential operators by Hans Triebel—Reviewed by Ron DeVore................................................................. 339

Mathematical methods of classical mechanics by V. I. Arnold A course in mathematical physics, Vol. 1: Classical dynamical systems by Walter Thirring—Reviewed by Ian N. Sneddon................................................................. 346

Elliptic curves: Diophantine analysis by Serge Lang—Reviewed by Alan Baker........................ 352

Introduction to mathematical economics by Murray C. Kemp and Yoshio Kimura—Reviewed by Louis J. Billera................................................................. 355

Approximants de Padé by Jacek Gilewicz—Reviewed by William B. Jones............................ 360

Barreledness in topological and ordered vector spaces by T. Husain and S. M. Khaleelulla—Reviewed by I. Namioka................................................................. 364

Monotone operators and applications in control and network theory by V. Dolezal—Reviewed by R. Saeks................................................................. 369

Gaussian random processes by I. A. Ibragimov and Yu. A. Rozanov—Reviewed by R. M. Dudley................................................................. 373

Foundations of mechanics by Ralph Abraham and Jerrold E. Marsden—Reviewed by Shiomo Sternberg................................................................. 378
