JOURNALS PUBLISHED BY
THE AMERICAN MATHEMATICAL SOCIETY

Soviet Mathematics—Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMIÏ NAUK SSSR.

Mathematics of the USSR–Izvestija, a bimonthly journal is a cover-to-cover translation of IZVESTIJA AKADEMIÏ NAUK SSSR SERIJA MATEMATIČESKAJA.

Mathematics of the USSR–Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATICSKIÎI SBORNIK (NOVAJA SERIJA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIJA VEROJATNOSTEÎ I MATEMATIČESKAJA STATISTIKA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICESKOGO OBŠČESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of the PROCEEDINGS OF THE STEKLOV INSTITUTE OF MATHEMATICS IN THE ACADEMY OF SCIENCES OF THE USSR.

RESEARCH JOURNALS

Submission information for these journals is included in the May and September issues of this Bulletin.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and review of the current mathematical literature of the world. A one-year subscription consists of twelve regular issues plus a midyear and an annual author/subject index.
BULLETIN (New Series) of the American Mathematical Society

EDITORS

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Hyman Bass
Felix E. Browder
Chairman
S. S. Chern
Fredrick W. Gehring
Irving Kaplansky
Peter D. Lax
John W. Milnor
Hugh L. Montgomery
Gian-Carlo Rota

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Spencer Bloch
Charles L. Fefferman
Ronald L. Graham
Melvin Hochster
Robert P. Langlands
Richard K. Lashof
Henry P. McKean, Jr.
Richard Melrose
Calvin C. Moore
Chairman
Yiannis Moschovakis
I. M. Singer

BOOK REVIEW EDITOR: Meyer Jerison
MANAGING EDITOR: Felix E. Browder

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include subject classification numbers representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of Mathematical Reviews.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing of the manuscript. The 1978 edition of the Manual for Authors has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.
REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970.)
RESEARCH — EXPOSITORY PAPERS
Non-Euclidean functional analysis and electronics by J. William Helton.................... 1
The inverse function theorem of Nash and Moser by Richard S. Hamilton.................... 65

RESEARCH ANNOUNCEMENTS
Classifying G-spheres by Ib Madsen and Mel Rothenberg........................................ 223
A Torelli theorem for simply connected elliptic surfaces with a section and g > 2 by
K. Chakiris.................................................................................................................. 227
Normal not paracompact spaces by William G. Fleissner........................................ 233
Fast recursion formula for weight multiplicities by R. V. Moody and J. Patera............ 237
A solution to a problem of J. R. Ringrose by David R. Larson.................................. 243
On the cohomology of Chevalley groups by Eric M. Friedlander and Brian Parshall..... 247
Unipotent and prounipotent groups: cohomology and presentations by Alexander
Lubotzky and Andy R. Magid....................................................................................... 251
The Whitehead conjecture and splitting B(Z/2)K by N. J. Kuhn, S. A. Mitchell and
S. B. Priddy.................................................................................................................. 255
Brownian motion, geometry, and generalizations of Picard’s little theorem by S. I.
Goldberg and C. Mueller............................................................................................. 259
Smooth extendability of proper holomorphic mappings by Klas Diederich and John
Erik Fornaess............................................................................................................... 264
Proper holomorphic mappings extend smoothly to the boundary by Steven Bell and
David Catlin.................................................................................................................. 269

BOOK REVIEWS
The decision problem: Solvable classes of quantificational formulas by Burton Dreben
and Warren D. Goldfarb; Unsolvable classes of quantificational formulas by
Harry R. Lewis—Reviewed by Yuri Gurevich............................................................... 273
Pseudodifferential operators by Michael E. Taylor—Reviewed by J. J. Duistermaat...... 277
K-theory of forms by Anthony Bak—Reviewed by Andrew A. Ranicki......................... 279
The geometry of biological time by Arthur T. Winfree—Reviewed by Joel E. Cohen..... 280
