

**JOURNALS PUBLISHED BY
THE AMERICAN MATHEMATICAL SOCIETY
TRANSLATION JOURNALS**

Soviet Mathematics-Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR-Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA.

Mathematics of the USSR-Sbornik is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKIĬ SBORNIK (NOVAYA SERIYA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA.

Vestnik of the Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVER-SITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of AKADE-MIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTI-TUTA IMENI V. A. STEKLOVA.

RESEARCH JOURNALS

Submission information for these journals is included in the April and October issues of this BULLETIN.

Bulletin (New Series) of the American Mathematical Society is a quarterly journal which contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

Current Mathematical Publications, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme. The subscription includes an annual author and subject index.

Notices of the American Mathematical Society, published eight times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

BULLETIN (New Series) of the American Mathematical Society

EDITORS

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Hyman Bass Chairman	Benedict Gross Irving Kaplansky
Felix Browder	John W. Milnor
S. S. Chern	Gian-Carlo Rota
Frederick W. Gehring	Wilfred Schmid

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Spencer Bloch	H. Blaine Lawson, Jr.
David Eisenbud	Richard Melrose
Ronald L. Graham	Calvin C. Moore
Roger Howe	Chairman
Wu-chung Hsiang	Yiannis Moschovakis
Harold M. Stark	

BOOK REVIEW EDITOR: Meyer Jerison

MANAGING EDITOR: Hyman Bass

MANUSCRIPT, PROOF AND COPYING INFORMATION

MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of *Mathematical Reviews*.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or

108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc. 21, Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works or for resale.

OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of \$50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

(Continued from back cover)

Pseudo-differential operators by <i>Hitoshi Kumano-go</i> ; Introduction to the Fourier transform and pseudo-differential operators by <i>Bent E. Petersen</i> —Reviewed by <i>Andre Unterberger</i>	149
Differential forms orthogonal to holomorphic functions or forms, and their properties by <i>L. A. Aizenberg and Sh. A. Dautov</i> —Reviewed by <i>G. B. Folland</i>	156
Univalent functions by <i>Peter L. Duren</i> —Reviewed by <i>Albert Baernstein II.</i> ..	158
Lectures on exponential decay of solutions of second-order elliptic equations: bounds on eigenfunctions of N-body Schrödinger operators by <i>Shmuel Agmon</i> —Reviewed by <i>Percy Deift</i>	165
Groups of divisibility by <i>Jiří Močková</i> —Reviewed by <i>Jack Ohm</i>	170
Mathematical scattering theory by <i>H. Baumgartel and M. Wollenberg</i> —Reviewed by <i>Walter A. Strauss</i>	172
Éléments de mathématique. Algèbre commutative by <i>N. Bourbaki</i> —Reviewed by <i>M. Nagata</i>	175
Classical potential theory and its probabilistic counterpart by <i>J. L. Doob</i> —Reviewed by <i>P. A. Meyer</i>	177
Erratum	182

Research — Expository Papers

Some recent developments in Fourier analysis and H^p -theory on product domains by Sun-Yung A. Chang and Robert Fefferman 1

Five short stories about the cardinal series by J. R. Higgins..... 45

Research Announcements

Canonical perturbation theory of Anosov systems, and regularity results for the Livsic cohomology equation by R. de la Llave, J. M. Marco and R. Moriyón..... 91

Local moduli for meromorphic differential equations by Donald G. Babbitt and V. S. Varadarajan..... 95

BMO estimates and radial growth of Bloch functions by B. Korenblum 99

A polynomial invariant for knots via von Neumann algebras by Vaughan F. R. Jones 103

Weighted norm inequalities for potentials with applications to Schrödinger operators, Fourier transforms and Carleson measures by R. Kerman and E. Sawyer..... 112

Rigidity of some translations on homogeneous spaces by Dave Witte..... 117

On the construction of codimension-two minimal immersions of exotic spheres into Euclidean spheres by Wu-teh Hsiang, Wu-yi Hsiang and Ivan Sterling 120

C^* -algebras and differential topology by Jerome Kaminker 125

A symplectic fixed point theorem for complex projective spaces by Barry Fortune and Alan Weinstein..... 128

Finiteness of Mordell-Weil groups of generic abelian varieties by Alice Silverberg..... 131

Complete embedded minimal surfaces of finite total curvature by David A. Hoffman and William H. Meeks III..... 134

Book Reviews

Intersection theory by William Fulton; Introduction to intersection theory in algebraic geometry by William Fulton—Reviewed by Steven L. Kleiman 137

Mathematical experiments on the computer by Ulf Grenander—Reviewed by Alan J. Perlis..... 143

Chain conditions in topology by W. W. Comfort and S. Negrepointis —Reviewed by James E. Baumgartner 145

Linear and combinatorial optimization in ordered algebraic structures by U. Zimmermann—Reviewed by R. A. Cuninghame-Green 148
