Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Surveys

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Submission information. See **Information for Authors** at the end of this issue.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. For paper delivery, subscription prices for Volume 33 (1996) are \$252 list, \$202 institutional member, \$151 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$13.00. Expedited delivery to destinations in North America is \$12; elsewhere \$21.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

INDEX TO VOLUME 33 (1996)

RESEARCH-EXPOSITORY SURVEYS

- Bump, Daniel, Friedberg, Solomon, and Hoffstein, Jeffrey. *On some applications of automorphic forms to number theory*, 157
- Edelman, Alan, and Kostlan, Eric. *Erratum to "How many zeros of a random polynomial are real?"*, 325
- Eisenbud, David, Green, Mark, and Harris, Joe. *Cayley-Bacharach theorems and conjectures*, 295
- Friedberg, Solomon. *See* Bump, Daniel
- Green, Mark. *See* Eisenbud, David
- Harris, Joe. *See* Eisenbud, David
- Hoffstein, Jeffrey. *See* Bump, Daniel
- Kostlan, Eric. *See* Edelman, Alan
- Ribet, Kenneth A. *Erratum to "Galois representations and modular forms"*, 43
- Sawin, Stephen. *Links, quantum groups and TQFTs*, 413
- Stroock, Daniel W. *Gaussian measures in traditional and not so traditional settings*, 135
- Varadarajan, V. S. *Linear meromorphic differential equations: A modern point of view*, 1

RESEARCH REPORTS

- Benson, Dave. *Stably splitting BG*, 189
- Bruns, Winfried. *Tight closure*, 447
- Donaldson, S. K. *The Seiberg-Witten equations and 4-manifold topology*, 45
- Sjamaar, Reyner. *Symplectic reduction and Riemann-Roch formulas for multiplicities*, 327
- Weiss, Michael. *Calculus of embeddings*, 177

BOOK REVIEWS

- Adams, William W., and Loustaunau, Philippe. *An introduction to Gröbner Bases*, reviewed by Lorenzo Robbiano, 477
- Amann, Herbert. *Linear and quasilinear parabolic problems, Vol. I: Abstract linear theory*, reviewed by Alberto Venni, 501
- Anosov, D. V., and Bolibruch, A. A. *The Riemann-Hilbert problem*, reviewed by Helmut Röhrl, 199
- Antman, Stuart S. *Nonlinear problems of elasticity*, reviewed by J. M. Ball, 269
- Antonevich, Anatolij, and Lebedev, Andrei. *Functional differential equations I: C^* -theory*, reviewed by Paul S. Muhly, 223
- Aoki, N., and Hiraide, K. *Topological theory of dynamical systems*, reviewed by Clark Robinson, 497
- Auslander, Maurice, Reiten, Idun, and Smalø, Serre O. *Representation theory of Artin algebras*, reviewed by Claus Michael Ringel, 509
- Becker, Thomas, and Weispfenning, Volker. *Gröbner Bases: A computational approach to commutative algebra*, reviewed by Lorenzo Robbiano, 477
- Beltrametti, Mauro C., and Sommese, Andrew J. *The adjunction theory of complex projective varieties*, reviewed by Kenji Matsuki, 493
- Berline, N., Getzler, E., and Vergne, M. *Heat kernels and Dirac operators*, reviewed by Rafe Mazzeo, 125
- Bethuel, F., Brezis, H., and Helein, F. *Ginzburg-Landau vortices*, reviewed by Paul C. Fife, 245
- Bloom, Walter R., and Heyer, Herbert. *The harmonic analysis of probability measures on hypergroups*, reviewed by Alan L. Schwartz, 355
- Bobylev, Nikolai A., Burman, Yuri M., and Korovin, Sergey K. *Approximation procedures in nonlinear oscillation theory*, reviewed by Hermann Brunner, 277
- Bolibruch, A. A. *See* Anosov, D. V.
- Brezis, H. *See* Bethuel, F.
- Bruggeman, Roelof W. *Families of automorphic forms*, reviewed by Audrey A. Terras, 77
- Bueso, J. L., Jara, P., and Verschoren, A. *Compatibility, stability and sheaves*, reviewed by Jay Shapiro, 121
- Burman, Yuri M. *See* Bobylev, Nikolai A.
- Chavel, Isaac. *Riemannian geometry: A modern introduction*, reviewed by Jerry L. Kazdan, 339
- Chorin, Alexandre. *Vorticity and turbulence*, reviewed by Andrew J. Majda, 71

- Connes, Alain. *Noncommutative geometry*, reviewed by Irving Segal, 459
- Cordaro, Paulo D., and Trèves, Francois. *Hyperfunctions on hypo-analytic manifolds*, reviewed by Pierre Schapira, 115
- Cordes, H. O. *The technique of pseudodifferential operators*, reviewed by Alexander Dynin, 381
- Eisenbud, David. *Commutative algebra with a view toward algebraic geometry*, reviewed by Mark Green, 367
- Elduque, Alberto, and Myung, Hyo C. *Mutations of alternative algebras*, reviewed by J. Marshall Osborn, 227
- Farkas, Miklos. *Periodic motions*, reviewed by H. I. Freedman, 119
- Freese, Ralph, Ježek, Jaroslav, and Nation, J. B. *Free lattices*, reviewed by Steven Tschantz, 247
- Fukushima, M., Oshima, Y., and Takeda, M. *Dirichlet forms & symmetric Markov processes*, reviewed by Daniel W. Stroock, 87
- Galaktionov, V. A. *See Samarski, A. A.*
- Getzler, E. *See Berline, N.*
- Graver, Jack, Servatius, Brigitte, and Servatius, Herman. *Combinatorial rigidity*, reviewed by Robert Connelly, 399
- Gromov, M. *Geometric group theory, Vol. 2: Asymptotic invariants of infinite groups*, reviewed by Domingo Toledo, 395
- Hagen, Roland, Roch, Steffen, and Silbermann, Bernd. *Spectral theory of approximation methods for convolution equations*, reviewed by Albrecht Böttcher, 237
- Hahn, A. J. *Quadratic algebras, Clifford algebras, and arithmetic Witt groups*, reviewed by A. R. Wadsworth, 263
- Hasselblatt, Boris. *See Katok, Anatole*
- Helein, F. *See Bethuel, F.*
- Helson, Henry. *Harmonic analysis, 2nd edition*, reviewed by Roger Cooke, 505
- Heyer, Herbert. *See Bloom, Walter R.*
- Hiraide, K. *See Aoki, N.*
- Jara, P. *See Bueso, J. L.*
- Jensen, Tommy R., and Toft, Bjarne. *Graph coloring problems*, reviewed by Kenneth I. Appel, 287
- Ježek, Jaroslav. *See Freese, Ralph*
- Joe, Stephen. *See Sloan, Ian H.*
- Kaiser, Gerald. *A friendly guide to wavelets*, reviewed by Charles K. Chui, 131
- Karasev, N. V., and Maslov, V. P. *Nonlinear Poisson brackets, geometry and quantization*, reviewed by P. Libermann, 101
- Katok, Anatole, and Hasselblatt, Boris. *Introduction to the modern theory of dynamical systems*, reviewed by Floris Takens, 519
- Kenig, Carlos E. *Harmonic analysis techniques for second order elliptic boundary value problems*, reviewed by Jill C. Pipher, 229
- Kollár, János. *Shafarevich maps and automorphic forms*, reviewed by Donu Arapura, 283
- Korovin, Sergey K. *See Bobylev, Nikolai A.*
- Kurdyumov, S. P. *See Samarski, A. A.*
- Kuznetsov, Yuri A. *Elements of applied bifurcation theory*, reviewed by David K. Arrowsmith, 377
- Lebedev, Andrei. *See Antonevich, Anatolij*
- Loustaunau, Philippe. *See Adams, William W.*
- Ma, Zhi-Ming, and Rockner, Michael. *Dirichlet forms*, reviewed by Daniel W. Stroock, 87
- Magid, Andy R. *Lectures on differential Galois theory*, reviewed by D. Bertrand, 289
- Marsden, Jerrold E., and Ratiu, Tudor S. *Introduction to mechanics and symmetry: A basic exposition of classical mechanical systems*, reviewed by Mark S. Ashbaugh, 351
- Martin, Stuart. *Schur algebras and representation theory*, reviewed by Brian Parshall, 371
- Maslov, V. P. *See Karasev, N. V.*
- McDuff, Dusa, and Salamon, Dietmar. *J-holomorphic curves and quantum cohomology*, reviewed by François Lalonde, 385
- Meyer, Yves. *Wavelets and operators*, reviewed by Charles K. Chui, 131
- Mikhailov, A. P. *See Samarski, A. A.*
- Miranda, Rick. *Algebraic curves and Riemann surfaces*, reviewed by R. C. Gunning, 217

- Moody, Robert V., and Pianzola, Arturo. *Lie algebras with triangular decompositions*, reviewed by George B. Seligman, 347
- Morel, Jean-Michel, and Solimini, Sergio. *Variational methods in image segmentation*, reviewed by David Mumford, 211
- Myung, Hyo C. *See* Elduque, Alberto
- Nadkarni, M. G. *Basic ergodic theory*, reviewed by Jack Feldman, 345
- Nation, J. B. *See* Freese, Ralph
- Nazaikinskii, V., Shatalov, V., and Sternin, B. *Methods of noncommutative analysis*, reviewed by Michael E. Taylor, 523
- Nomizu, Katsumi, and Sasaki, Takeshi. *Affine differential geometry*, reviewed by Wilhelm P. A. Klingenberg, 75
- Oberguggenberger, M. B., and Rosinger, E. E. *Solution of continuous nonlinear PDEs through order completion*, reviewed by Yuri V. Egorov, 219
- Oshima, Y. *See* Fukushima, M.
- Pianzola, Arturo. *See* Moody, Robert V.
- Ranicki, A. A. *Algebraic L-theory and topological manifolds*, reviewed by Shmuel Weinberger, 93
- Ratiu, Tudor S. *See* Marsden, Jerrold E.
- Reiten, Idun. *See* Auslander, Maurice
- Roch, Steffen. *See* Hagen, Roland
- Rockner, Michael. *See* Ma, Zhi-Ming
- Rosinger, E. E. *See* Oberguggenberger, M. B.
- Salamon, Dietmar. *See* McDuff, Dusa
- Samarski, A. A., Galaktionov, V. A., Kurdyumov, S. P., and Mikhailov, A. P. *Blow-up in quasi-linear parabolic equations*, reviewed by Nick Alikakos, 483
- Sarason, D. *Sub-Hardy Hilbert spaces in the unit disk*, reviewed by James Rovnyak, 81
- Sasaki, Takeshi. *See* Nomizu, Katsumi
- Schmidt, Roland. *Subgroup lattices of groups*, reviewed by Ralph Freese, 487
- Servatius, Brigitte. *See* Graver, Jack
- Servatius, Herman. *See* Graver, Jack
- Shatalov, V. *See* Nazaikinskii, V.
- Shelah, Saharon. *Cardinal arithmetic*, reviewed by James E. Baumgartner, 409
- Silbermann, Bernd. *See* Hagen, Roland
- Sloan, Ian H., and Joe, Stephen. *Lattice methods for multiple integration*, reviewed by Ronald Cools, 363
- Smalø, Serre O. *See* Auslander, Maurice
- Smith, Hal L. *Monotone dynamical systems: An introduction to the theory of competitive and cooperative systems*, reviewed by Chris Cosner, 203
- Solimini, Sergio. *See* Morel, Jean-Michel
- Sommese, Andrew J. *See* Beltrametti, Mauro C.
- Stepanov, Serguei. *Arithmetic of algebraic curves*, reviewed by Joseph H. Silverman, 251
- Sternin, B. *See* Nazaikinskii, V.
- Takeda, M. *See* Fukushima, M.
- Toft, Bjarne. *See* Jensen, Tommy R.
- Trèves, Francois. *See* Cordaro, Paulo D.
- Turaev, V. G. *Quantum invariants of knots and 3-manifolds*, reviewed by Greg Kuperberg, 107
- Unterberger, A., and Upmeyer, H. *Pseudodifferential analysis on symmetric cones*, reviewed by Alexander Dynin, 381
- Upmeyer, H. *See* Unterberger, A.
- Vaisman, Izu. *Lectures on the geometry of Poisson manifolds*, reviewed by Ping Xu, 255
- Vergne, M. *See* Berline, N.
- Verschoren, A. *See* Bueso, J. L.
- Vershinin, V. V. *Cobordisms and spectral sequences*, reviewed by Nils A. Baas, 111
- Weibel, Charles A. *An introduction to homological algebra*, reviewed by Joseph Rotman, 473

INDEX TO VOLUME 33 (1996)

Weispfenning, Volker. *See* Becker, Thomas

Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Surveys

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Submission information. See **Information for Authors** at the end of this issue.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. For paper delivery, subscription prices for Volume 33 (1996) are \$252 list, \$202 institutional member, \$151 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$8.00; subscribers in India must pay a postage surcharge of \$13.00. Expedited delivery to destinations in North America is \$12; elsewhere \$21.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

Editorial Information

As of July 31, 1996, the backlog for this journal was approximately 0 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue).

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. Copies of the paper should be sent directly to the appropriate Editor, and the author should keep one copy. For Research-Expository Surveys two copies of the manuscript should be submitted to Professor David Eisenbud, Department of Mathematics, Brandeis University, Waltham, MA 02254-9110. For Research Reports, four copies of the manuscript should be submitted to Professor Haynes R. Miller, Room 2-237, Massachusetts Institute of Technology, Cambridge, MA 02139-4307. Research Reports can also be submitted electronically in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ to bams@math.mit.edu.

For Research-Expository Surveys and Research Reports, the first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be a brief technical description of the new material. Then, for Research Reports there should be an introductory section addressed to nonexperts describing the motivation, background, and significance of the results announced. Following the statement of results, there should be a sketch of proofs that may be addressed to experts. Included with the footnotes in each paper, there should be the 1991 *Mathematics Subject Classification* representing the primary and secondary subjects of

the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of classifications may be found in the annual index of *Mathematical Reviews*, published with the December issue starting in 1990. Journal abbreviations used in bibliographies are also listed in the latest *Mathematical Reviews* annual index. The classifications and the journal abbreviations are accessible from e-MATH via the World Wide Web through the URL <http://www.ams.org/committee/publications/mr-info.html> or via FTP to [e-math.ams.org](ftp://e-math.ams.org) (login as `anonymous` and enter username as password). The classifications are available as a browsable list, and the journal abbreviations are available through a search tool. Authors are encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Electronically prepared manuscripts. The AMS encourages submission of electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX submissions. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author Handbook*, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX style file automatically provide hypertext linking to the bibliography and other elements of the article for searching electronically on the World Wide Web. Because linking must often be added manually to submissions in other forms of \TeX , using $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX is the highly preferred format of \TeX , but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX . Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Electronically submitted manuscripts prepared in \LaTeX or plain \TeX are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. \LaTeX users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX is the same as \LaTeX with additional commands to simplify the typesetting of mathematics, and users of plain \TeX should have little difficulty learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX .

Authors may retrieve an author package from e-MATH via the World Wide Web through the URL <http://www.ams.org/tex/> or via FTP to [e-math.ams.org](ftp://e-math.ams.org) (login as `anonymous` and enter username as password). The author package can also be obtained free of charge by sending e-mail to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX , Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}$ - \LaTeX or $\mathcal{A}\mathcal{M}\mathcal{S}$ - \TeX and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the

paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When submitting an electronic manuscript, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to submit files are included in the author package.

Electronic graphics. Figures may be submitted to the AMS in an electronic format. The AMS recommends that graphics created electronically be saved in Encapsulated PostScript (EPS) format. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images.

If the graphics package used does not support EPS output, the graphics file should be saved in one of the standard graphics formats—such as TIFF, PICT, GIF, etc.—rather than in an application-dependent format. Graphics files submitted in an application-dependent format are not likely to be used. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from e-MATH, starting from URL <http://www.ams.org/journals/>. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending e-mail to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author’s version of T_EX without errors. The AMS

regrets that it cannot provide support to eliminate such errors in the author's \TeX environment.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Electronic Prepress Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Research-Expository Surveys

This section is intended for reasonably broad expository surveys of a currently active area of mathematical research. To stress this fact, the name of the section has been changed from "Research-Expository Papers" to "Research-Expository Surveys". The level of exposition is expected to be such that a graduate student—or a research mathematician from a remote area—will be able to read an article in order to get an overview of a subject. A well-written article will include motivating problems and examples, some indication of the historical development of the subject, and of course the results and open problems that make it an interesting and exciting area of mathematics. In most cases proofs should be at most briefly sketched, and there should be a good bibliography whose main aim should be helping those wishing to pursue the subject further. Usually Research-Expository Surveys will be at most 40 pages long.

Certain of the Society's Lecture Series, including the Gibbs Lectures, Colloquium Lectures, and Progress in Mathematics Lectures, traditionally appear in the Research-Expository Surveys, and those invited to give these lectures are informed of this tradition and of the above guidelines. Research-Expository Surveys are also frequently solicited by the Editorial Board, but unsolicited manuscripts are also encouraged; in particular, those invited to give invited hour addresses at meetings of the Society should consider writing up their lecture in a manner that meets the requirements of the preceding paragraph and submitting their manuscripts for consideration by the Editorial Board for the Research-Expository Surveys.

Research Reports

A Research Report is a timely, short (4–8 pages) report on a recent accomplishment in mathematical research. It should be written so as to be understandable by mathematicians who are not experts in the subject matter of the Report. The context giving significance to the research being reported on should be made clear, and the consequences or potential consequences should be described. Usually only the barest hint of the methods of proof should be given, although elements of the proof which are novel should be included. In any case, references should be given so that an interested reader can find the details. It is expected that Research Reports will frequently be written by specialists other than the individuals immediately involved in the research. Approximately twenty-four Reports will be published each year.

Research Reports are normally solicited by the Editor for Research Reports and the Board of Associate Editors. They cordially invite suggestions for topics and reporters. Unsolicited manuscripts, submitted to the Editor for Research Reports, will also be considered.

Ricardo Diaz and **Sinai Robins**, The Ehrhart polynomial of a lattice n -simplex**Christopher Kumar Anand**, Unitons and their moduli**Neil Robertson**, **Daniel P. Sanders**, **Paul Seymour**, and **Robin Thomas**, A new proof of the four-colour theorem**Vladimir V. Kisil**, Möbius transformations and monogenic functional calculus**Feng Luo**, Geodesic length functions and Teichmüller spaces**Rafail Krichevskii** and **Vladimir Potapov**, Compression and restoration of square integrable functions**David G. Ebin**, Global solutions of the equations of elastodynamics for incompressible materials**Luca Capogna**, Optimal regularity for quasilinear equations in stratified nilpotent Lie groups and applications**Luis Barreira**, **Yakov Pesin**, and **Jörg Schmeling**, On the pointwise dimension of hyperbolic measures - a proof of the Eckmann-Ruelle conjecture

The American Mathematical Society's first electronic-only journal, *Electronic Research Announcements of the AMS* (ERA-AMS), is available on the World Wide Web at the URL: <http://www.ams.org/era/>

ERA-AMS publishes high-quality research announcements of significant advances in all branches of mathematics. Authors may submit manuscripts to any editor. All papers are reviewed, and the entire Editorial Board must approve the acceptance of any paper.

ERA-AMS offers you ...

- decreased turn-around time from submission to print
- fast access to your specific area of interest
- up-to-the-minute research information

To obtain submission information and the template, send e-mail to: era-info@ams.org with the word "help" in the subject line.
