EDITOR

Bulletin Articles

Donald G. Saari
Chief Editor

Book Reviews

Andy R. Magid

Available electronically at
www.ams.org/bull/
This journal is devoted to articles of the following types:

**Bulletin Articles**

Two types of articles will be included in this section: (1) papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research, including Gibbs Lectures, Progress in Mathematics Lectures, and Retiring Presidential Addresses; and (2) brief, timely reports on important mathematical developments, which are normally solicited and often written by a disinterested expert.

**Book Reviews**

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

---

**Submission information.** See Information for Authors at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Postings to the AMS website.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Bulletin (New Series) of the American Mathematical Society* is published quarterly. The *Bulletin* is also accessible electronically, starting with the January 1992 issue, from [www.ams.org/publications/](http://www.ams.org/publications/). For paper delivery, subscription prices for Volume 39 (2002) are $337 list, $270 institutional member, $202 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $14.00. Expedited delivery to destinations in North America is $12; elsewhere $28.

**Back number information.** For back issues see [www.ams.org/bookstore/](http://www.ams.org/bookstore/).

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to the American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

**Copying and reprinting.** Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Chief Editor: Donald G. Saari

Editorial Information

As of March 31, 2002, the backlog for this journal was approximately 0 issues. This estimate is the result of reducing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the number of articles assigned to issues to be published in four months (the time necessary for editing and composing a typical issue). In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. Bulletin articles may be of two types: (1) reasonably broad expository surveys of a currently active area of mathematical research and (2) reports on a recent accomplishment in mathematical research. Three copies of the manuscript should be submitted to Professor Donald G. Saari, Department of Mathematics, Multipurpose Science and Technology Building, University of California, Irvine, Irvine, CA 92697-3875 USA. Manuscripts may also be submitted to other members of the Editorial Board, with a copy of the cover letter and of the manuscript also sent to Professor Donald G. Saari. The author should keep one copy. Bulletin articles may also be submitted electronically in \texttt{AMSTeX} or \texttt{AM\LaTeX} to \texttt{bams@math.uci.edu}.

The first page must consist of a descriptive title, followed by an abstract that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be a brief technical description of the new material.

Both types of Bulletin articles should be written so as to be understandable by graduate students or mathematicians who are not experts in the subject matter of the article. A well-written expository article will include motivating problems and examples, some indication of the historical development of the subject, and of course the results and open problems that make it an interesting and exciting area.
of mathematics. In most cases proofs should be at most briefly sketched, and there
should be a good bibliography whose main aim is to help those wishing to pursue
the subject further. Articles reporting on recent mathematical research should
include an introductory section addressed to nonexperts describing the motivation,
background, and significance of the results announced. Following the statement
of results, there should be a sketch of proofs that may be addressed to experts,
including elements of the proof which are novel. References should be given so that
an interested reader can find the details.

Included with the footnotes in each paper should be the 2000 *Mathematics Sub-
ject Classification* representing the primary and secondary subjects of the article.
The classifications are accessible from www.ams.org/msc/. The list of classifica-
tions is also available in print starting with the 1999 annual index of *Mathematical
Reviews*. The Mathematics Subject Classification footnote may be followed by a
list of *key words and phrases* describing the subject matter of the article and taken
from it. Journal abbreviations used in bibliographies are listed in the latest *Math-
ematical Reviews* annual index. The series abbreviations are also accessible from
www.ams.org/publications/. To help in preparing and verifying references, the
AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/
When the manuscript is submitted, authors should supply the Editor with electronic
addresses if available. These will be printed after the postal address at the end of
each article.

Bulletin Articles are normally solicited by the Editorial Board, but unsolicited
manuscripts will also be considered. In particular, those giving lectures (Gibbs
 Lectures, Colloquium Lectures, and Progress in Mathematics Lectures) or invited
hour addresses at meetings of the Society are encouraged to write up their lectures
in a manner that meets the requirements for expository articles described above and
to submit their manuscripts for consideration by the Editorial Board for Bulletin
Articles.

For Book Reviews the first page must include the title of the book being reviewed;
the name(s) of the author(s); publisher; city of publication; year of publication;
number of pages, including front matter; price if known; and ISBN. There should
also be a footnote with the 2000 *Mathematics Subject Classification* representing
the primary and secondary subjects of the book under review. The classifications
are accessible from www.ams.org/msc/ and are also available in print starting with
the 1999 annual index of *Mathematical Reviews*. To help in preparing and ver-
ifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at
www.ams.org/mrlookup/.

**Electronically prepared manuscripts.** The AMS encourages electronically
prepared manuscripts, with a strong preference for $\texttt{AMS-LATEX}$. To this end, the
Society has prepared $\texttt{AMS-LATEX}$ author packages for each AMS publication. Au-
 thor packages include instructions for preparing electronic manuscripts, the *AMS
Author Handbook*, samples, and a style file that generates the particular design
specifications of that publication series. Articles properly prepared using the $\texttt{AMS}-
LATEX$ style file and the \label and \ref commands automatically enable extensive
intra-document linking to the bibliography and other elements of the article for
searching electronically on the Web. Because linking must often be added manu-
ally to electronically prepared manuscripts in other forms of \TeX, using $\texttt{AMS-LATEX}$
also reduces the amount of technical intervention once the files are received by the
AMS. This results in fewer errors in processing and saves the author proofreading
AMS-LATEX papers also move more efficiently through the production stream, helping to minimize publishing costs.

AMS-LATEX is the highly preferred format of TeX, but author packages are also available in AMS-TEX. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in LATEX or plain TeX are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. LATEX users will find that AMS-LATEX is the same as LATEX with additional commands to simplify the typesetting of mathematics, and users of plain TeX should have the foundation for learning AMS-LATEX.

Authors may retrieve an author package from the AMS website starting from www.ams.org/tex/ or via FTP to ftp.ams.org (login as anonymous, enter username as password, and type cd pub/author-info). The AMS Author Handbook and the Instruction Manual are available in PDF format following the author packages link from www.ams.org/tex/. The author package can also be obtained free of charge by sending email to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify AMS-LATEX or AMS-TEX, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using AMS-LATEX or AMS-TEX and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via email to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available from www.ams.org/jourhtml/authors.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a
high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

**AMS policy on making changes to articles after posting.** Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article to the Editor. The errata article will appear in a future print issue and will link back and forth on the Web to the original article online.

**Secure manuscript tracking on the Web and via email.** Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from [www.ams.org/mstrack/](http://www.ams.org/mstrack/) or via email sent to mstrack-query@ams.org. To access by email, on the subject line of the message simply enter the AMS ID and Article ID. To track more than one manuscript by email, choose one of the Article IDs and enter the AMS ID and the Article ID followed by the word all on the subject line. An explanation of each production step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to bull-query@ams.org.

**T\TeX files available.** Beginning with the January 1992 issue of the Bulletin and the January 1996 issues of Transactions, Proceedings, Mathematics of Computation, and the Journal of the AMS, T\TeX files can be downloaded from the AMS website, starting from [www.ams.org/journals/](http://www.ams.org/journals/). Authors without Web access may request their files at the address given below after the article has been published. For Bulletin papers published in 1987 through 1991 and for Transactions, Proceedings, Mathematics of Computation, and the Journal of the AMS papers published in 1987 through 1995, T\TeX files are available upon request for authors without Web access by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T\TeX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T\TeX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T\TeX files cannot
be guaranteed to run through the author’s version of \TeX{} without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author’s \TeX{} environment.

**Inquiries.** Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to bull-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.
