OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITORS

H. Blaine Lawson, Jr.
Robert D. MacPherson
Richard Melrose
Wilfried Schmid

ASSOCIATE EDITORS

James G. Arthur
Peter Bickel
Gerd Faltings
Charles L. Fefferman
Michael H. Freedman
Daniel Friedan
Ronald L. Graham
Joe Harris
Hendrik W. Lenstra, Jr.
Andrew Majda
Hugh L. Montgomery
Paul H. Rabinowitz
Karen Uhlenbeck
W. Hugh Woodin

PROVIDENCE, RHODE ISLAND USA

ISSN 0894-0347

Journal of the American Mathematical Society

The Journal of the American Mathematical Society has been established for the publication of research articles in all areas of pure and applied mathematics.

Editors

Chairman

Wilfried Schmid
Department of Mathematics
Harvard University
Cambridge, MA 02138

H. Blaine Lawson, Jr.
Department of Mathematics
SUNY at Stony Brook
Stony Brook, NY 11794

Robert D. MacPherson
Department of Mathematics 2-246
Massachusetts Institute of Technology
Cambridge, MA 02139

Richard Melrose
Department of Mathematics 2-243
Massachusetts Institute of Technology
Cambridge, MA 02139

Associate Editors

James G. Arthur, University of Toronto
Peter Bickel, University of California, Berkeley
Gerd Faltings, Princeton University
Charles L. Fefferman, Princeton University
Michael H. Freedman, University of California, San Diego
Daniel Friedan, University of Chicago
Ronald L. Graham, AT & T Bell Laboratories
Joe Harris, Harvard University
Hendrik W. Lenstra, Jr., University of California, Berkeley
Andrew Majda, Princeton University
Hugh L. Montgomery, University of Michigan
Paul H. Rabinowitz, University of Wisconsin
Karen Uhlenbeck, University of Texas at Austin
W. Hugh Woodin, University of California, Berkeley

Assistant to the Editorial Board

Joanne Jonsson
Department of Mathematics 2-108
Massachusetts Institute of Technology
Cambridge, MA 02139

Subscription information. The Journal of the American Mathematical Society is published quarterly. Subscription prices for Volume 4 (1991) are \$126 list, \$101 institutional member, \$76 individual member. Subscribers outside the United States and India must pay a postage surcharge of \$8; subscribers in India must pay a postage surcharge of \$18. Expedited delivery to destinations in North America \$12; elsewhere \$36.

Back number information. Back number prices per volume are: for Volume 1, \$164 list, \$131 institutional member; for Volume 2, \$177 list, \$142 institutional member; for Volume 3, \$174 list, \$139 institutional member.

Manuscript submission. See inside back cover.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P.O. Box 1571, Annex Station, Providence, R.I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, R.I. 02940-6248.

The Journal of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, R.I. 02904-2213 and is mailed from Providence, Rhode Island. Second class postage is pending at Providence, Rhode Island. Postmaster: Send address changes to Journal of the AMS, American Mathematical Society, P.O. Box 6248, Providence, R.I. 02940-6248.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. 

This publication was typeset using $\mathcal{A}_M\mathcal{S}\text{-}\mathcal{T}_E\mathcal{X}$,
the American Mathematical Society's $\mathcal{T}_E\mathcal{X}$ macro system.

Preparation of the manuscript. All papers should be double-spaced. Two copies of the paper should be sent directly to one of the Editors or to the Assistant to the Editorial Board. At that time, authors should indicate if the paper has been set electronically. The author should keep a copy.

Electronically-prepared manuscripts. The AMS encourages submission of electronically-prepared manuscripts preferably in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared “preprint” style files, specifically the `amspt` style of $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ and the `amsart` style of $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$, which will simplify the work of authors and of the production staff. *Guidelines for Preparing Electronic Manuscripts* provide additional assistance and are available for use with either $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. Authors may obtain these Guidelines free of charge from the e-mail address `guide-elec@math.ams.com` (Internet) or from the Publications Department, P.O. Box 6248, Providence, RI 02940-6248. Electronically prepared manuscript files should be sent to the Providence office only after the paper has been accepted for publication. Please send files via e-mail to `pub-submit@math.ams.com` (Internet) or on diskettes to the Publications Department address listed above. Electronic manuscripts usually move through the production process more quickly.

Subject classification. Included with the footnotes to the paper, but placed before the first footnote, the subject classification should represent the primary and secondary subjects of the article. A list may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1990.

Galley proof. When a paper with more than one author has been accepted for publication, only one set of proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

JOURNAL OF THE AMERICAN MATHEMATICAL SOCIETY

Volume 4, Number 3

July 1991

Lower bounds of rates of decay for solutions to the Navier-Stokes equations	
MARIA E. SCHONBEK.....	423
When does the Zero-One Law hold?	
TOMASZ LUCZAK and JOEL SPENCER	451
The boundary of negatively curved groups	
MLADEN BESTVINA and GEOFFREY MESS	469
Perverse sheaves and C^* -actions	
VICTOR GINSBURG.....	483
The Poisson kernel for Drinfeld modular curves	
JEREMY T. TEITELBAUM	491
New invariants of open symplectic and contact manifolds	
YAKOV ELIASHBERG	513
Stratifiable maps and topological invariants	
SYLVAIN E. CAPPELL and JULIUS L. SHANESON	521
Existence de nappes de tourbillon en dimension deux	
JEAN-MARC DELORT	553
Vanishing theorems, a theorem of Severi, and the equations defining projective varieties	
AARON BERTRAM, LAWRENCE EIN, and ROBERT LAZARSFELD	587
$L^2 - \bar{\partial}$ -cohomology of complex projective varieties	
WILLIAM L. PARDON and MARK A. STERN	603
On the envelope of holomorphy of a 2-sphere in C^2	
ERIC BEDFORD and WILHELM KLINGENBERG	623
