This journal is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

Submission information. See Information for Authors at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. All orders must be accompanied by payment. Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

The Journal of the American Mathematical Society (ISSN 0894-0347) is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA and is mailed from Providence, Rhode Island. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Journal of the AMS, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

INDEX TO VOLUME 24 (2011)

Andrews, Ben, and Julie Clutterbuck. *Proof of the fundamental gap conjecture*, 899

Avila, Artur. *Density of positive Lyapunov exponents for $SL(2, \mathbb{R})$-cocycles*, 999

Babson, Eric, Christopher Hoffman, and Matthew Kahle. *The fundamental group of random 2-complexes*, 1

Balakrishnan, Jennifer S., Kiran S. Kedlaya, and Minhyong Kim. *Appendix and erratum to “Massey products for elliptic curves of rank 1”*, 281

Balázs, M., J. Quastel, and T. Seppäläinen. *Fluctuation exponent of the KPZ/stochastic Burgers equation*, 683

Barnet-Lamb, Thomas, Toby Gee, and David Geraghty. *The Sato-Tate conjecture for Hilbert modular forms*, 411

Bianchi, Gabriele, Richard J. Gardner, and Markus Kiderlen. *Phase retrieval for characteristic functions of convex bodies and reconstruction from covariograms*, 293

Bourgain, Jean, and Elena Fuchs. *A proof of the positive density conjecture for integer Apollonian circle packings*, 945

Bourgain, Jean, Alex Furman, Elon Lindenstrauss, and Shahar Mozes. *Stationary measures and equidistribution for orbits of nonabelian semigroups on the torus*, 231

Bridgeland, Tom. *Hall algebras and curve-counting invariants*, 969

Caffarelli, Luis, Chi Hin Chan, and Alexis Vasseur. *Regularity theory for parabolic nonlinear integral operators*, 849

Chan, Chi Hin. *See Caffarelli, Luis

Clutterbuck, Julie. *See Andrews, Ben

Ellis, David, Ehud Friedgut, and Haran Pilpel. *Intersecting families of permutations*, 649

Fiebig, Peter. *Sheaves on affine Schubert varieties, modular representations, and Lusztig’s conjecture*, 133

Friedgut, Ehud. *See Ellis, David

Fuchs, Elena. *See Bourgain, Jean

Furman, Alex. *See Bourgain, Jean

Gardner, Richard J. *See Bianchi, Gabriele

Gee, Toby. *See Barnet-Lamb, Thomas

Geisser, Thomas, and Lars Hesselholt. *On relative and bi-relative algebraic $K$-theory of rings of finite characteristic*, 29

Geraghty, David. *See Barnet-Lamb, Thomas

Hain, Richard. *Rational points of universal curves*, 709

Hansen, Anders C. *On the Solvability Complexity Index, the $n$-pseudospectrum and approximations of spectra of operators*, 81

Hatami, Hamed, and Serguei Norine. *Undecidability of linear inequalities in graph homomorphism densities*, 547

Hesselholt, Lars. *See Geisser, Thomas

Hida, Haruzo. *Hecke fields of analytic families of modular forms*, 51

Hoffman, Christopher. *See Babson, Eric

Hrubes, Pavel, Avi Wigderson, and Amir Yehudayoff. *Non-commutative circuits and the sum-of-squares problem*, 871

Ioana, Adrian. *$W^*$-superrigidity for Bernoulli actions of property (T) groups*, 1175

Iwaniec, Tadeusz, Leonid V. Kovalev, and Jani Onninen. *The Nitsche conjecture*, 345

Kahle, Matthew. *See Babson, Eric

Kedlaya, Kiran S. *Good formal structures for flat meromorphic connections, II: Excellent schemes*, 183

Koike, Satoshi. *See Balakrishnan, Jennifer S.

Kiderlen, Markus. *See Bianchi, Gabriele

Kim, Minhyong. *See Balakrishnan, Jennifer S.

Knop, Friedrich. *Automorphisms of multiplicity free Hamiltonian manifolds*, 567

Kontorovich, Alex, and Hee Oh, with appendix by Hee Oh and Nimish Shah. *Apollonian circle packings and closed horospheres on hyperbolic 3-manifolds*, 603

Kovalev, Leonid V. *See Iwaniec, Tadeusz

Kozma, Gady, and Asaf Nachmias. *Arm exponents in high dimensional percolation*, 375

Krivelevich, Michael. *The critical bias for the Hamiltonicity game is $(1 + o(1)) n / \ln n$*, 125
Larsen, Michael J., and Richard Pink.  *Finite subgroups of algebraic groups*, 1105
Lindenstrauss, Elon.  See Bourgain, Jean
Marshall, Simon.  *Mass equidistribution for automorphic forms of cohomological type on $GL_2$*, 1051
Mozes, Shahar.  See Bourgain, Jean
Nachmias, Asaf.  See Kozma, Gady
Norine, Serguei.  See Hatami, Hamed
Oh, Hee.  See Kontorovich, Alex

Editorial Information

Information on the backlog for this journal can be found on the AMS website starting from http://www.ams.org/jams.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.
A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the manuscript has not been submitted to nor is it under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/jams or should send one copy of the manuscript to the following address: Centralized Manuscript Processing, JOURNAL OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for the Journal of the AMS and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors above).

The first page must contain a descriptive title that is short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. Although an abstract is not required upon initial submission, upon acceptance authors will be requested to supply an abstract for the electronic version of this journal. The AMS offers free worldwide access to the electronic abstracts. An abstract should be at least one complete sentence and at most 300 words. No abstracts appear in the printed journal starting in 1998. Included with the footnotes to the paper should be the 2010 Mathematics Subject Classification representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest Mathematical Reviews annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for \texttt{AMS-LATEX}. To this end, the Society has prepared \texttt{AMS-LATEX} author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the \texttt{AMS-LATEX} style file and the \texttt{\label} and \texttt{\ref} commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of \TeX, using \texttt{AMS-LATEX} also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. \texttt{AMS-LATEX} papers also move more efficiently through the production stream, helping to minimize publishing costs.

\texttt{AMS-LATEX} is the highly preferred format of \texttt{TEX}, but author packages are also available in \texttt{AMS-TEX}. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in \texttt{TEX} or plain \texttt{TEX} are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. \texttt{TEX} users will find that \texttt{AMS-LATEX} is the same as \texttt{TEX} with additional commands to simplify the typesetting of mathematics, and users of plain \texttt{TEX} should have the foundation for learning \texttt{AMS-LATEX}.

Authors may retrieve an author package for Journal of the AMS starting from www.ams.org/jams/jamsauthorpac.html or via FTP to ftp.ams.org (login as anonymous, enter your complete email address as password, and type cd pub/author-info). The AMS
Author Handbook and the Instruction Manual are available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify \AMS-L\TeX or \AMS-\TeX and the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the Web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

AMS policy on making changes to articles after posting. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website corrections may be made to the paper by submitting a traditional errata article. The errata article will appear in a future print issue and will link back and forth on the Web to the original article online.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on
the Web through links from the manuscript tracking screen. Questions can be sent to jams-query@ams.org.

**Inquiries.** Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to jams-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.
