Editorial Committee
Division of Mathematics
National Academy of Sciences—National Research Council
Washington, D. C.

C. B. Tompkins, Chairman, University of California, Los Angeles, California
J. H. Bigelow, The Institute for Advanced Study, Princeton, New Jersey
C. C. Craig, University of Michigan, Ann Arbor, Michigan
A. Erdélyi, California Institute of Technology, Pasadena, California
A. H. Taub, University of Illinois, Urbana, Illinois
J. Todd, National Bureau of Standards, Washington, D. C.

Information to Subscribers

The journal is now published quarterly in one volume per year with issues numbered serially since Volume I, Number 1. Subscriptions are $5.00 per year, single copies $1.50. Back issues are available as follows:

Volume I (Nos. 1-12, 1943-1945) $12.00 (sold only as a complete volume)
Volume I (No. 7, 1944) "A Guide to Tables of Bessel Functions," by H. Bateman and R. C. Archibald, 104 pp., $2.00
Volume II and III (Nos. 13-28, 1946-1949) $4.00 per year, $1.25 per issue
Volume IV and following, $5.00 per year, $1.50 per issue

All payments are to be made to the National Academy of Sciences and forwarded to the Publications Office, 2101 Constitution Avenue, Washington, D. C.

Information to Contributors

All contributions intended for publication in Mathematical Tables and Other Aids to Computation and all books for review should be addressed to C. B. Tompkins, Department of Mathematics, University of California, Los Angeles 24, California. The author should mention the name of an appropriate editor for his paper if this is convenient.
CLASSIFICATION OF TABLES

A. Arithmetical Tables. Mathematical Constants
B. Powers
C. Logarithms
D. Circular Functions
E. Hyperbolic and Exponential Functions
F. Theory of Numbers
G. Higher Algebra
H. Numerical Solution of Equations
I. Finite Differences. Interpolation
J. Summation of Series
K. Statistics
L. Higher Mathematical Functions
M. Integrals
N. Interest and Investment
O. Actuarial Science
P. Engineering
Q. Astronomy
R. Geodesy
S. Physics, Geophysics, Crystallography
T. Chemistry
U. Navigation
V. Aerodynamics, Hydrodynamics, Ballistics
Z. Calculating Machines and Mechanical Computation
CONTENTS

October 1955

Notations for Partitions .................................................Stig Comé 143

Determination of Steiner Triple Systems of Order 15 ..................Marshall Hall, Jr. & J. D. Swift 146

A Set of Test Matrices ..................................................Mark Lotkin 153

Orthogonal Polynomials Arising in the Numerical Evaluation of Inverse Laplace Transforms ........................................Herbert E. Salzer 164

On the Improvement of the Solutions to a Set of Simultaneous Linear Equations using the ILLIAC ......................James N. Snyder 177

The Use of Iterative Methods for Finding the Latent Roots and Vectors of Matrices ..................................................J. H. Wilkinson 184

Technical Notes and Short Papers ..................................... 191

The Specific Heat Function for a Two-Dimensional Continuum . aluminum & S. W. Barber 191

A Continued Fraction for e .............................................N. Macon 194

Reviews and Descriptions of Tables and Books ........................ 195

Table Errata ............................................................... 224

Jahnke & Emde 245, Greenwood 246.

Notes ................................................................. 224

R. C. Archibald .......................................................... 224

Postdoctoral Research Associates of the National Bureau of Standards .................................................. 225

National Simulation Conference ......................................... 225

The Second Regional Graduate Summer Session in Statistics held at the University of Florida in June and July 1955 .................................................. 226

Sponsorship by the Office of Naval Research, the National Bureau of Standards, the National Science Foundation, and various other organizations .................................................. 226

Index ................................................................. 226

Corrigenda ............................................................. 229

Greenwood .............................................................. 229

Indices to volume IX ................................................... 230

Author Index, Papers and Technical Notes ................................ 230

Reviews by Author of Work Reviewed .................................. 231

Reviews by Subject ..................................................... 233

General Works on Numerical Analysis .................................. 233

Tables from Number Theory ........................................... 235

Tables from Algebra ................................................... 236

Tables from Analysis .................................................. 236

Tables from Statistics ................................................ 243

Tables from Physical Sciences ......................................... 248

Automatic Computation ................................................ 249

Table Errata ............................................................... 250

Notes ................................................................. 251

Queries and Replies .................................................... 251
