CORRIGENDA

On page 272 the tabular entry for \( \zeta(s, f) \) corresponding to \( s = -6 \) should read 37231 44531 25000 00. On page 274 the exponent corresponding to \( \zeta\left(\frac{1}{2}\right) \) should read 00 instead of 01.

In Table 3, on page 287, the number 0 should be inserted in the blank space corresponding to the eleventh line of the column headed by \( |P_3(X)| \).
