On p. 325 the right side of Formula 6 in Article 3.411 should read

\[ \Gamma(\nu)\Phi(\beta, \nu, \mu), \]

where

\[ \Phi(\beta, \nu, \mu) = \sum_{n=0}^{\infty} (n + \mu)^{-\beta} n^n, \]

according to the definition in Article 9.55, on p. 1075.

This confusion apparently arose from the authors’ use of \( \Phi(\alpha, \gamma; z) \) to denote the confluent hypergeometric function \( \text{$_1F_1$(\alpha, \gamma; z)} \) in Article 9.21, on p. 1058.

On p. 48, in Table 21, the right member of Eq. 9 should read

\[ \frac{1}{q} B\left(\frac{p}{q}, \frac{1}{2} - \frac{p}{q}\right) \quad \text{[Re } q > \text{ Re } 2p > 0]\]

instead of

\[ 2^{2p/q}B(q - 2p, p) \quad \text{[} q > 2p]\]
