CORRIGENDA

The parenthetical word “rational” in the second line of this review should be deleted, inasmuch as when \( m_1 + m_2 \) is odd the corresponding integrals have values equal to irrational numbers that are rational multiples of \( \pi \). These rational coefficients are tabulated, as well as the rational values of the integrals, corresponding to \( m_1 + m_2 \) even.

OLIVER G. LUDWIG

On p. 174, in line 14 from the bottom,

\[
\text{for } a_{ij} = b_{ij} = \frac{n}{2}, \quad \text{read } a_{ii} = b_{ii} = \frac{n}{2}.
\]

On p. 180, in line 2 and line 4,

\[
\text{for } \cdots, \text{ read } \vdash;
\]

in line 5,

\[
\text{for } U(U S^{i-1})^T, \text{ read } U(U S^{i-1})^T.
\]
