TABLE ERRATA

On p. 561, in the right members of Formulas 15.4.8 and 15.4.9 the associated Legendre functions of the first kind, $P_{b-1}^{a}$ and $P_{b-1}^{a-b}$, respectively, should be replaced by those of the second kind, $Q_{b-1}^{a}$ and $Q_{b-1}^{a-b}$, of the respective given arguments.

HENRY E. FETTIS

Applied Mathematics Laboratory
Aerospace Research Laboratories
Wright-Patterson Air Force Base, Ohio 45433

On p. 227 of Volume II, in the right member of transform 14.3(26), for $I_{a}[b(y-\gamma)^{1/2}]$, read $I_{a}[b(y-\gamma)^{1/2}]$.

SAKARI INAWASHIRO
SHIGETOSHI KATSURA

Department of Applied Physics
Tohoku University
Sendai, Japan

On p. 290 of Volume II, the polynomials $H(ax)$ and $H(x)$ in formula 20 should be replaced by $He(ax)$ and $He(x)$, respectively, so that the integral will correctly read

$$\int_{-\infty}^{\infty} \exp (-\frac{1}{2} x^2) He_{n}(ax) He_{n}(x) dx.$$ 

Similarly, on p. 291, in formula 21 the integrand should read

$$\exp (-\frac{1}{2} x^2) He_{2m+n}(ax) He_{n}(x).$$

LEE C. BRADLEY

Lincoln Laboratory
Massachusetts Institute of Technology
Lexington, Massachusetts 02173

On p. 837, in formula 7.374.4 the exponent of 2 in the right member should be \( n \) instead of \(-m + \frac{1}{2}\).

Lee C. Bradley

On p. 514, the coefficient of \( x^n \) in the shifted Legendre polynomial \( P_{18}^* (x) \) should read 67603900 instead of 97603900.

A. Forbes

M. Lal

Memorial University of Newfoundland
St. John's, Newfoundland, Canada

Recalculation to higher precision has revealed that a few of the early abscissas given in Table M14 (appearing in the microfiche supplement of this issue) are inaccurate beyond the 12th decimal place. An emended version of Table M14, giving abscissas and weights to 20S, appears in the microfiche supplement of this issue. The weights in the original table are consistent with the corresponding abscissas, so that in practice the difference in results produced by that table and the modified one will be insignificant.

T. N. L. Patterson

Southwest Center for Advanced Studies
Dallas, Texas 75230

In 1.27, on p. 1 and in 5.14, on p. 12, the final digit in the 20S approximation to \( \pi/180 \) should be rounded correctly to an 8.

In formula 5.37, on p. 15, the denominator of the right member should read \( \cot B \pm \cot A \).

In formula 7.14 on p. 24, the 10D value of \( \ln 10 \) should be rounded up to read 2.30258 50930.

In formula 19.29 on p. 108, the right member should read \( 3\pi^2 \sqrt{2}/128 \), in place of \( 3\pi^2 \sqrt{2}/16 \).

In problem 6(d) on p. 195, the logarithm of \( 0.009848 \) should read 7.9933 − 10.

In problem 27(a) on p. 200, the last equation should read

\[
\sinh (4.846) = 63.231 + \frac{6}{10} (.635) = 63.612
\]

J. W. W.
