HANS J. STETTER, Institut für Numerische Mathematik, Technische Hochschule Wien, A-1040 Wien, Karlsplatz 13, Austria
JOHN W. WRENCH, JR., Naval Ship Research and Development Center, Washington, D.C. 20034

Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. The subscription price is $20.00. All back volumes are available. For Volumes 1–19 (1943–1965), prices are $20.00 per volume, subsequent volumes are $24.00.

Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section Reviews and Descriptions of Tables and Books. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Subscriptions, address changes, business communications and payments should be sent to:

Information for Contributors
Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest Mathematical Reviews volume index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "Information for Contributors to Mathematics of Computation" and "Manual for Authors," both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to Mathematical Reviews, Volume 39 (June 1970).

Microfiche Edition
Volumes 1–14 (1943–1960) are available on Microcards at $39.00 for the complete set and may be purchased from Microcard Editions, Inc., 901 26th Street, N. W., Washington, D.C. 20037.
Proceedings of Symposia in Pure Mathematics

Representation Theory of Finite Groups and Related Topics

Edited by Irving Reiner

PROCEEDINGS OF SYMPOSIA IN PURE MATHEMATICS, VOLUME XXI
184 pages; List Price $11.70; Member Price $8.78

This volume constitutes the proceedings of a symposium on Representation Theory of Finite Groups and Related Topics which was held in Madison, Wisconsin, April 14-16, 1970, in conjunction with a sectional meeting of the American Mathematical Society. The symposium was held in honor of Professor Richard Brauer whose fundamental work in representation theory lies at the heart of most of the further developments in this topic. These proceedings contain articles by the participants, based on their symposium lectures. The articles range from brief surveys of results to detailed outlines of proofs, and are intended to indicate the scope of current research in representation theory. Professor Irving Reiner of the University of Illinois, Urbana, was chairman of the Organizing Committee and editor of these proceedings.

Algebraic Topology

Edited by Arunas Liulevicius

PROCEEDINGS OF SYMPOSIA IN PURE MATHEMATICS, VOLUME XXII
290 pages; List Price $17.80; Member Price $13.35

This volume constitutes the proceedings of the seventeenth summer research institute of the American Mathematical Society, held at the University of Wisconsin, Madison, from June 29 to July 17, 1970. The program of the institute was divided into four parts: (1) survey talks on recent developments in the field of algebraic topology; (2) invited one-hour talks on important recent work; (3) sessions on problems; and (4) seminars organized by the participants. Appearing in this volume are the lecture notes of the survey talks presented by J. Frank Adams, Edgar H. Brown, Jr., Samuel Gitler, Richard K. Lashof, Franklin P. Peterson, Larry Smith, and James D. Stasheff. The remainder of the volume consists of the texts of the invited one-hour talks and a list of research problems. The list of research problems was edited by R. James Milgram.

Something new has been

The Audio Recordings of Mathematical Lectures are recordings of lectures presented at meetings of the American Mathematical Society: Gibbs Lectures, Colloquium Lectures, and invited hour addresses. These audio recordings are now being prepared on cassettes as well as tapes. Each lecture is accompanied by a manual which contains displays referred to in the lecture, and the recordings contain editorial comments referring the listener to these displays.

The lectures are recorded on tape at a speed of 1¼"/second (4.75cm/second) and can be played on standard tape recorders; tapes run at 3¾"/second (9.5cm/second) are available if requested. Cassettes and tapes may be purchased at $6.00 each for hour addresses and $10.00 for Colloquium Lectures. Additional copies of

American Mathematical Society
Mathematical Aspects of Electrical Network Analysis
Edited by Herbert S. Wilf and Frank Harary

SIAM-AMS PROCEEDINGS, VOLUME III
214 pages; List Price $10.60; Member Price $7.95

This volume constitutes the proceedings of the SIAM-AMS symposium on Mathematical Aspects of Electrical Network Analysis held in New York City in April 1969. Most of the papers apply various mathematical methods to electrical network problems, but a few of them accomplish the reverse “application,” and help to solve purely mathematical problems using electrical network theory technique. The authors include R. K. Brayton, R. W. Brockett, D. A. Calahan, Shu-Park Chan, R. J. Duffin, R. J. Leake, R. Liu, Ronald Rohrer, J. Paul Roth, R. Saeks, I. W. Sandberg, R. A. Skoog, Pravin Varaiya, Dan H. Wolaver, Dante C. Youla, and J. W. T. Youngs.

Computers in Algebra and Number Theory
Edited by Garrett Birkhoff and Marshall Hall, Jr.

SIAM-AMS PROCEEDINGS, VOLUME IV
208 pages; List Price $12.70; Member Price $9.53

This volume constitutes the proceedings of the SIAM-AMS symposium on Computers in Algebra and Number Theory held in New York City in March 1970. Part 1 consists of papers devoted to applications of algebraic ideas to computing with especial attention to problems of optimizing computer algorithms. The five papers in Part 2 consider number theory and combinatorial theory. The final section, Part 3, deals with the application of computers to finite groups. The authors include L. D. Baumert et al., B. J. Birch, Garrett Birkhoff, John J. Cannon, J. H. Conway, Marshall Hall, Jr., M. D. Hestenes, D. G. Higman, John Mckay, J. Neubiiser, Charles C. Sims, H. P. F. Swinnerton-Dyer, J. H. van Lint, Shmuel Winograd, and Hans Zassenhaus.

added: cassettes

the manual may be ordered for $0.30 each. At the present time forty-six lectures are available, including three Colloquium Series. Lecturers include Masani, Treves, Boone, Fadell, Bott, Harish-Chandra, Kirby, Baum, Tate, Bass, Feferman, Friedman, Shah, Rosenblum, Heerema, Shult, Hirsch, McMillan, Glimm, Auslander, Atiyah, Kohn, McLaughlin, Maher, Rubel, Curtis, Blackwell, Gangolli, Billingsley, Ax, Varga, Hofmann, Bing, Hemmingsen, Ornstein, Gorenstein, Kesten, Zariski, Hopf, Nachbin, Ellis, Sullivan, O'Meara, Blattner, Fan and Knopp. For additional information, or to place an order, please write to the Promotion Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.
"automatic computation"

four new titles in the Automatic Computation Series,
edited by George Forsythe

NUMERICAL INITIAL VALUE PROBLEMS IN ORDINARY DIFFERENTIAL
EQUATIONS
C. William Gear, University of Illinois
New—Discusses all classes of step by step methods suitable for the automatic
numerical integration of general problems. Covers the derivation of methods; the
theory of error and convergence, and the practical implementation on a com-
puter. Includes theoretical and computational end-of-chapter problems, many
numerical examples showing error behavior, numerical comparisons of different
methods, and a large bibliography.
1971 304 pp. $12.95 (62660-6)

COLLECTIVELY COMPACT OPERATOR APPROXIMATION THEORY AND
APPLICATIONS TO INTEGRAL EQUATIONS
Philip Anselone, Michigan State University
New—Provides an introduction to a currently active field of research, presenting
a recently developed abstract operator approximation theory and various applica-
tions to numerical integration approximations of integral operators. The theory
is based on a new concept, that of a collectively compact (completely continu-
ous) operator. Treats both linear and nonlinear operators. Valuable for courses
and seminars at the graduate level.
1971 128 pp. $12.50 (14067-3)

APPROXIMATE CALCULATION OF MULTIPLE INTEGRALS
A. H. Stroud, State University of New York at Buffalo
New—A research monograph that can serve as text or reference book. Provides
the reader with a well-written exposition of all theoretical and practical aspects
of the subject. Contains recent results relating integration formulas and ortho-
gonal polynomials. Includes an excellent discussion of error estimates and a
complete bibliography.
1972 432 pp. $16.50 (04389-3)

DISCRETE OPTIMIZATION: INTEGER PROGRAMMING AND NETWORK
ANALYSIS FOR MANAGEMENT DECISIONS
Donald R. Plane and Claude McMillan, both of the University of Colorado
New—Management Decision-making through an easy to understand treatment
of integer programming and network analysis. Offers extensive discussions of
problem formulation, methods of solution, and computational experience. Intro-
duces the concepts of constrained optimization through enumeration algorithms.
Emphasizes problem formulation so that the user of operations research tech-
niques can understand the power of discrete optimization.
1971 288 pp. $13.50 (21604-4)
