CORRIGENDA

Formula (2.10) on p. 153 should have an additional factor of $(k - 1)!$ in front of $\Gamma(p + q + k - 2)$, as in its variation (2.19).

W. F. LunnN

In this errata notice, the sign of the corrected value of $dG_\delta(\eta, \rho)/d\rho$ corresponding to $\eta = 4.5$, $\rho = 19$ should be negative; thus, it should read $(-3) - 3.4827$.

Anthony J. Strecok

The last term of the equation for $K_i(x)$ on p. 454 should be $+1/x$ rather than $-1/x$. I thank Thomas C. Weaver, of Cornell University, for this correction.
