<tr>
<td>High-Order Finite-Difference Methods for Poisson’s Equation</td>
<td>H. J. van Linde</td>
<td>369</td>
</tr>
<tr>
<td>Finite Element Methods for Parabolic Equations</td>
<td>Miloš Zlámal</td>
<td>393</td>
</tr>
<tr>
<td>Semidiscrete Least-Squares Methods for Second Order Parabolic Problems</td>
<td>J. Thomas King</td>
<td>405</td>
</tr>
<tr>
<td>Stable Approximations for Hyperbolic Systems with Moving Internal Boundary Conditions</td>
<td>M. Goldberg &amp; S. Abarbanel</td>
<td>413</td>
</tr>
<tr>
<td>The Application of Implicit Runge-Kutta and Collocation Methods to Boundary-Value Problems</td>
<td>Richard Weiss</td>
<td>449</td>
</tr>
<tr>
<td>Approximation by Aliasing with Application to “Certaine” Stiff Differential Equations</td>
<td>Arthur David Snider &amp; Gary Charles Fleming</td>
<td>465</td>
</tr>
<tr>
<td>Recursive Collocation for the Numerical Solution of Stiff Ordinary Differential Equations</td>
<td>H. Brunner</td>
<td>475</td>
</tr>
<tr>
<td>On Semicardinal Quadrature Formulae</td>
<td>I. J. Schoenberg &amp; S. D. Silliman</td>
<td>483</td>
</tr>
<tr>
<td>Quadrature Formulas for Semi-Infinite Integrals</td>
<td>Ravindra Kumar &amp; M. K. Jain</td>
<td>499</td>
</tr>
<tr>
<td>Methods for Modifying Matrix Factorizations</td>
<td>P. E. Gill, G. H. Golub, W. Murray &amp; M. A. Saunders</td>
<td>505</td>
</tr>
<tr>
<td>Modifying Pivot Elements in Gaussian Elimination</td>
<td>G. W. Stewart</td>
<td>537</td>
</tr>
<tr>
<td>The Evaluation of Determinants by Expansion by Minors and the General Problem of Substitution</td>
<td>W. M. Gentleman &amp; S. C. Johnson</td>
<td>543</td>
</tr>
<tr>
<td>A Characterization of Superlinear Convergence and Its Application to Quasi-Newton Methods</td>
<td>J. E. Dennis, Jr. &amp; Jorge J. Moré</td>
<td>549</td>
</tr>
<tr>
<td>Evaluation of a Constant Associated with a Parking Problem</td>
<td>M. Lal &amp; P. Gillard</td>
<td>561</td>
</tr>
<tr>
<td>Splines with Nonnegative $B$-Spline Coefficients</td>
<td>C. de Boor &amp; James W. Daniel</td>
<td>565</td>
</tr>
<tr>
<td>On the Conditional Equivalence of Two Starting Methods for the Second Algorithm of Remez</td>
<td>R. E. Huddleston</td>
<td>569</td>
</tr>
<tr>
<td>A Note on Chambers’ Method</td>
<td>J. A. Blackburn &amp; Y. Beaudoin</td>
<td>573</td>
</tr>
<tr>
<td>Numerical Computation of a Generalized Exponential Integral Function</td>
<td>W. F. Breig &amp; A. L. Croubie</td>
<td>575</td>
</tr>
<tr>
<td>Rational Chebyshev Approximations for the Modified Bessel Functions</td>
<td>J. M. Blair</td>
<td>581</td>
</tr>
<tr>
<td>A Stable Algorithm for Computing the Inverse Error Function in the “Tail-End” Region</td>
<td>Henry E. Fettis</td>
<td>585</td>
</tr>
<tr>
<td>The Minimum Root Separation of a Polynomial</td>
<td>George E. Collins &amp; Ellis Horowitz</td>
<td>589</td>
</tr>
<tr>
<td>Error Analysis of a Computation of Euler’s Constant</td>
<td>W. A. Beyer &amp; M. S. Waterman</td>
<td>599</td>
</tr>
<tr>
<td>Confluent Expansions for Functions of Two Variables</td>
<td>V. L. Deshpande</td>
<td>605</td>
</tr>
<tr>
<td>Some Definite Integrals of the Product of Two Bessel Functions of the Second Kind: (Order Zero)</td>
<td>M. L. Glasser</td>
<td>613</td>
</tr>
<tr>
<td>On Weird and Pseudoperfect Numbers</td>
<td>S. J. Benkoski &amp; P. Erdős</td>
<td>617</td>
</tr>
</tbody>
</table>
A New Factorization Technique Using Quadratic Forms
D. H. LEHMER & EMMA LEHMER 625

Factoring Large Integers ......................... R. SHERMAN LEHMAN 637
A New Function Associated with the Prime Factors of (2)
E. F. ECKLUND, JR., P. ERDŐS & J. L. SELFRIDGE 647

Sums of Distinct Primes from Congruence Classes Modulo 12
ROBERT E. DRESSLER, ANDRZEJ MAŁKOWSKI & THOMAS PARKER 651
Irregular Prime Divisors of the Bernoulli Numbers .... WELLS JOHNSON 653

The Character Table of an Eight-Dimensional Orthogonal Group
DAVID C. HUNT 659

The Character Table of Fischer's Simple Group, M(23) .. DAVID C. HUNT 660

REVIEWS AND DESCRIPTIONS OF TABLES AND BOOKS ....................... 663

Bauer, Garabedian & Korn 22, Beyer & Waterman 19, Colombo
& Lavoine 26, John 27, Korn 28, Miller & Thatcher, Editors
20, Mitrinovic 23, Mitrinovic 24, Phillips & Hanson 18, Reid,
Editor 21, Rose & Willoughby, Editors 21, Schultz 16, Stoer 17,
Tranter 25.

Table Errata ......................................... 677

LEHMER 510.

MICROFICHE SUPPLEMENT

Gauss Quadrature Rules with B-Spline Weight Functions
JAMES L. PHILLIPS & RICHARD J. HANSON

Some Integrals Involving the Modified Bessel Function K₀
M. L. GLASSER

Tables for Numerical Computation of a Generalized Exponential
Integral Function ............... W. F. BREIG & A. L. CROSBBIE

The Character Table of an Eight-Dimensional Orthogonal Group
DAVID C. HUNT

The Character Table of Fischer's Simple Group, M(23)
DAVID C. HUNT

Tables for Rational Chebyshev Approximations for the Modified
Bessel Functions I₀(x) and I₁(x) ............... J. M. BLAIR

Information for Contributors
Manuscripts should be typewritten double-spaced in the format used by the journal.
For journal abbreviations, see the latest Mathematical Reviews volume index. An
author should submit the original and one copy of the manuscript and retain one
copy. The author may suggest an appropriate editor for his paper. It is recom-
"Information for Contributors to Mathematics of Computation" and "Manual for
Authors," both of which are available upon request from the American Mathemati-
cal Society. All contributions intended for publication and all books for review
should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Math-
ematics of Computation, New York University, Courant Institute of Mathematical
Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring
research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reason-
ably self-contained abstract, and by AMS (MOS) subject classification numbers. If
a list of key words and phrases is included, it will be printed as a footnote on the
first page. A list of the classification numbers may be found in the Index to Math-
ematical Reviews, Volume 39 (June 1970).

Microcard Edition
Volumes 1–14 (1943–1960) are available on Microcards at $39.00 for the com-
plete set and may be purchased from Microcard Editions, Inc., 901 26th Street,
N. W., Washington, D.C. 20037.
Spline Analysis
Martin M. Schultz, Yale University
An introduction to the theory, applications and computational aspects of finite elements. 1973, 156 pp. $10.50

Floating-Point Computation
Pat H. Sterbenz, INM Systems Research Institute
A detailed discussion of floating-point computation. 1974 approx. 352 pp. $15.00

Numerical Methods
Germund Dahlquist, Univ. of Stockholm, Ake Bjorck, Linkoping Univ., Ned Anderson, Massachusetts Inst. of Technology
Contains an introduction to the ideas and concepts of numerical analysis. 1974 approx. 576 pp. $14.50

Graph Theory with Applications to Engineering Science
Narsingh Deo, Indian Inst. of Technology, Kanpur, India
Offers complete treatment of the fundamentals of graph theory, emphasizing graph-theoretic algorithms. 1974 approx. 700 pp. $14.50

An Analysis of the Finite Element Method
Gilbert Strang, Massachusetts Institute of Technology and George Fix, University of Maryland
Details the finite element method—developed by civil and aerospace engineers for the numerical solution of structural problems. 1973 approx. 320 pp. $16.00

Computer Approaches to Mathematical Problems
Jurg Nievergelt, Univ. of Illinois, Urbana-Champaign, J. Craig Farrar Ohio Univ. and Edward M. Reingold, Univ. of Illinois, Urbana-Champaign
Focuses on problems that require mathematical concepts for their formulation, and computer techniques for their practical solution. 1974 approx. 272 pp. $8.95

Art by Stephen Frimm.
A New Factorization Technique Using Quadratic Forms
    D. H. LEHMER & EMMA LEHMER 625
Factoring Large Integers ....................... R. SHERMAN LEHMAN 637
A New Function Associated with the Prime Factors of (t)
    E. F. ECKLUND, JR., P. ERDÖS & J. L. SELFRIDGE 647
Sums of Distinct Primes from Congruence Classes Modulo 12
    ROBERT E. DRESSLER, ANDREJ MAKOWSKI & THOMAS PARKER 651
Irregular Prime Divisors of the Bernoulli Numbers .... WELLS JOHNSON 653
The Character Table of an Eight-Dimensional Orthogonal Group
    DAVID C. HUNT 659
The Character Table of Fischer’s Simple Group, M(23) . . DAVID C. HUNT 660
REVIEWS AND DESCRIPTIONS OF TABLES AND BOOKS ............. 663
    BAUER, GARABEDIAN & KORN 22, BEYER & WATERMAN 19, COLOMBO
    & LAVOINE 26, JOHN 27, KORN 28, MILLER & THATCHER, Editors
    20, MITRINOVIĆ 23, MITRINOVIĆ 24, PHILLIPS & HANSON 18, REID,
    Editor 21, ROSE & WILLOUGHBY, Editors 21, SCHULTZ 16, STOER 17,
    TRANTER 25.
TABLE ERRATA ........................................... 677
    LEHMER 510.
MICROFICHE SUPPLEMENT
    Gauss Quadrature Rules with B-Spline Weight Functions
        JAMES L. PHILLIPS & RICHARD J. HANSON
    Some Integrals Involving the Modified Bessel Function $K_0$
        M. L. GLASSER
    Tables for Numerical Computation of a Generalized Exponential
        Integral Function ...................... W. F. BREIG & A. L. CROSIE
    The Character Table of an Eight-Dimensional Orthogonal Group
        DAVID C. HUNT
    The Character Table of Fischer’s Simple Group, M(23)
        DAVID C. HUNT
    Tables for Rational Chebyshev Approximations for the Modified
        Bessel Functions $I_0(x)$ and $I_1(x)$ .............. J. M. BLAIR

The editorial committee would welcome readers’ comments about this microfiche
feature. Please send comments to Professor Eugene Isaacson, MATHEMATICS
OF COMPUTATION, Courant Institute of Mathematical Sciences, New York
University, 251 Mercer Street, New York, New York 10012.
On Fourier-Toeplitz Methods for Separable Elliptic Problems
D. Fischer, G. Golub, O. Hald, C. Leiva & O. Widlund

High-Order Finite-Difference Methods for Poisson’s Equation
H. J. van Linde

Finite Element Methods for Parabolic Equations .... MILOŠ ZLÁMAL
Semidiscrete Least-Squares Methods for Second Order Parabolic Problems with Nonhomogeneous Data ....... J. Thomas King
Stable Approximations for Hyperbolic Systems with Moving Internal Boundary Conditions .......... M. Goldberg & S. Abarbanel
The Application of Implicit Runge-Kutta and Collocation Methods to Boundary-Value Problems ........ RICHARD WEISS
Approximation by Aliasing with Application to “Certaine” Stiff Differential Equations ........ ARTHUR DAVID SNIDER & GARY CHARLES FLEMING
Recursive Collocation for the Numerical Solution of Stiff Ordinary Differential Equations .......... H. Brunner
On Semicardinal Quadrature Formulae
I. J. Schoenberg & S. D. Silliman

Quadrature Formulas for Semi-Infinite Integrals
RAVINDRA KUMAR & M. K. JAIN

Methods for Modifying Matrix Factorizations
P. E. Gill, G. H. Golub, W. Murray & M. A. Saunders
Modifying Pivot Elements in Gaussian Elimination .... G. W. Stewart
A Characterization of Superlinear Convergence and Its Application to Quasi-Newton Methods ........ J. E. Dennis, Jr. & Jorge J. Moré
Evaluation of a Constant Associated with a Parking Problem
M. Lal & P. Gillard
Splines with Nonnegative B-Spline Coefficients
C. de Boor & James W. Daniel

On the Conditional Equivalence of Two Starting Methods for the Second Algorithm of Remez ................. R. E. Huddleston
A Note on Chambers’ Method ............ J. A. Blackburn & Y. Beaudoin
Numerical Computation of a Generalized Exponential Integral Function
W. F. Breig & A. L. Crosbie
Rational Chebyshev Approximations for the Modified Bessel Functions $I_0(x)$ and $I_1(x)$ .................... J. M. Blair
A Stable Algorithm for Computing the Inverse Error Function in the “Tail-End” Region ............... HENRY E. FETTIS
The Minimum Root Separation of a Polynomial
GEORGE E. COLLINS & ELLIS HOROWITZ
Error Analysis of a Computation of Euler’s Constant
W. A. Beyer & M. S. Waterman
Confluent Expansions for Functions of Two Variables . . . . V. L. Deshpande
Some Definite Integrals of the Product of Two Bessel Functions of the Second Kind: (Order Zero) ........... M. L. Glasser
On Weird and Pseudoperfect Numbers ........ S. J. Benkoski & P. Erdős
