Information for Subscribers
The Journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. Annual subscription rates are: list $36.00, institutional member $24.00, individual AMS member $10.00, member of CBMS organizations $15.00. All back volumes are available. For Volumes 1 – 19 (1943 – 1965), prices are $20.00 per volume; for Volumes 20 – 23 (1966 – 1969), $24.00 per volume; Volumes 24 – 26 (1970 – 1972), $30.00 per volume and for Volume 27 (1973), $36.00.
Back volumes of Mathematics of Computation are available on 16 mm. microfilm. Volumes 1 – 27 (1943 – 1973) are available as a set; prices are $200.00 for spools and $218.00 for cartridges. Only current subscribers will be eligible to purchase back volumes on microfilm.

Unpublished Mathematical Tables
The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section Reviews and Descriptions of Tables and Books. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Subscriptions, address changes, business communications and payments should be sent to:

TABLE OF CONTENTS

JULY 1974

The Rayleigh Quotient Iteration and Some Generalizations for Nonnormal Matrices ........................................ B. N. Parlett 679

SOR Methods for the Eigenvalue Problem with Large Sparse Matrices

Axel Ruhe 695

An Application of Approximation Theory to an Error Estimate in Linear Algebra ........................................ Geneva G. Belford & E. H. Kaufman, Jr. 711

Negative Integral Powers of a Bidiagonal Matrix .......... Gurudas Chatterjee 713

Reduction of the Pseudoinverse of a Hermitian Persymmetric Matrix

Marvin J. Goldstein 715

On the Stability of Uniformly Asymptotically Diagonal Systems

R. S. Anderssen & B. J. Omodei 719

The Solution of Systems of Equations Using the $\epsilon$-Algorithm, and an Application to Boundary-Value Problems ... Claude Brezinski & Alain C. Rieu 731

A Comparison of Some Numerical Methods for Two-Point Boundary Value Problems ........................................ James M. Varah 743

A Least Squares Procedure for the Wave Equation .......... Alfred Carasso 757

A Class of Quadrature Formulas ................................... Ravindra Kumar 769

$L^p$ Approximation of Fourier Transforms and Certain Interpolating Splines

David C. Shreve 779

Error Analysis for Polynomial Evaluation ...................... A. C. R. Newbery 789

Numerical Stability in Evaluating Continued Fractions

William B. Jones & W. J. Thron 795

A Continued Fraction Expansion, with a Truncation Error Estimate, for Dawson's Integral ........................................ J. H. McCabe 811

Finite Sum Representations for Partial Derivatives of Special Functions with Respect to Parameters .......................... R. G. Buschman 817

Optimal Indexing of the Vertices of Graphs ..................... Carl H. FitzGerald 825

Generating the Nine-Point Graphs

Computation of the Ideal Class Group of Certain Complex Quartic Fields

Richard B. Lakein 839

On Multiple Prime Divisors of Cyclotomic Polynomials.... Wayne L. McDaniel 847

A Search for Elliptic Curves With Large Rank

David E. Penney & Carl Pomerance 851

A Compact Prime Listing ............................................. Sol Weintraub 855

Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest Mathematical Reviews volume index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in “Information for Contributors to Mathematics of Computation” and “Manual for Authors,” both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to Mathematical Reviews, Volume 39 (June 1970).
Sale of Microfilm Editions of Back Volumes of AMS Journals

The American Mathematical Society announces a new service to current subscribers. The following back volumes are now available on microfilm:

Mathematical Reviews will continue to be available on microfilm. The volumes available and prices follow:

- Volumes 1—20 (1940—1959), 12 spools: 350.00 386.00
- Volumes 21—30 (1960—1965), 11 spools: 300.00 333.00
- Volumes 31—40 (1966—1970), 10 spools: 480.00 510.00
- Volumes 41—42 (1971), 2 spools: 100.00 106.00
- Volumes 43—44 (1972), 2 spools: 100.00 106.00
- Volumes 45—46 (1973), 2 spools: 100.00 106.00

The microfilm for all of the journals mentioned above is 16 mm. Several options are available: the microfilm may be either negative (white characters on black background) or positive (black characters on white background) and may be mounted either on spools or in Eastman or 3M cartridges.

Orders are now being accepted. Except for Chinese Mathematics—Acta, only current subscribers will be eligible to purchase back volumes on microfilm. Prepayment is now being required for all AMS publications and services.
