TABLE ERRATA

On page 1015 the hypergeometric function in formula 8.812 should be
\[
F\left(\frac{m-n}{2}, \frac{m-n+1}{2}; 1; -\frac{n}{x^2}\right).
\]

Ann Scherzinger

In Table 7.3 for erfc \(\sqrt{n\pi}\) the terminal digit should be increased by four units for \(n = 2\), by one unit for \(n = 5\), and decreased by one unit for \(n = 6\).

In Table 7.4 (Repeated Integrals of the Error Function) the terminal digit should be increased by one unit for \(x = 0.4, n = 1\), and decreased by one unit for \(x = 1.1, n = 11; x = 1.2, n = 2; x = 1.2, n = 6; x = 1.3, n = 5; x = 1.3, n = 11\).

W. G.

In the entry for \(x = .45, n = 7\) the last digit should be decreased by one unit to read 0 instead of 1.
