**TABLE ERRATA**

On p. 234, the right side of Eq. (10) should read

\[(1 + 2at) \exp(at) \text{Erfc}(\alpha^{1/2} t^{1/2}) - 2\pi^{-1/2} \alpha^{1/2} t^{1/2}.\]

On p. 283, in Eq. (42), for \(t^{-n}\) read \(t^{-n-1}\). The case \(n = 0\) now gives Eq. (40), as it should.

</tbody>
</table>
p.283:  7.39  For $p^2 + (b^2 - a^2)^2$, read $(p^2 + b^2 - a^2)^2$.  
For $\text{sn}(at)$, read $\sin(at)$.

p.298:  8.73  For $H[t - (a + b + 2an)^2]$, read $H[t - (a + b + 2an)]$.

p.307:  10.7  For $e^{-ap}$, read $b^{-ap}$.

p.331:  12.39  For $\frac{\partial}{\partial a}$, read $\frac{\partial}{\partial b}$.

p.338:  13.39  Remove the horizontal line between entries 13.39 and 13.40 and
13.40  delete the number 13.40, as the right side of 13.40 should be
part of the right side of 13.39.

13.46  For $t^{-n}$, read $t^{-n-\nu-1}$.

612.—LEONARDO PISANO FIBONACCI, The Book of Squares, An Annotated 
Translation into Modern English by L. E. Sigler, Academic Press, Orlando, Fla., 
1987.

The following typographical corrections should be made in equations appearing 
in the comments appended to the translated text.

P. 8, line 3 from below: For $(6n^2 + 6n)^2 + [3(2n + 1)^2] = (6n^2 + 6n + 3)$, read 
$(6n^2 + 6n)^2 + [3(2n + 1)]^2 = (6n^2 + 6n + 3)^2$.

P. 23, line 4: For $(52/5)^2 + (29/5)^2 = 13^2$, read $(52/5)^2 + (39/5)^2 = 13^2$.

P. 83, line 9 from below: For $n^2 - nm = mn - m^2$, read $n^2 - nm = mn + m^2$.

P. 89, line 16: For $25/12 - 1 = 1/12$  
$25/12 + 1 = 49/12$, read $25/12 - 2 = 
25/12 + 2 = 49/12$.

P. 89, line 17: For $(25/12)^2 - (25/12) = (5/12)^2$  
$(25/12)^2 + (25/12) = (35/12)^2$, read 
$(25/12)^2 - 2(25/12) = (5/12)^2$  
$(25/12)^2 + 2(25/12) = (35/12)^2$.

P. 106, line 9 from below: For $a + [(a - 1)]^2 = [(a + 1)/2]^2$, read $a + [(a - 1)/2]^2 = 
[(a + 1)/2]^2$.

P. 107, line 3: For $8^2 + 720^2 = 725^2$, read $85^2 + 720^2 = 725^2$.

P. 107, line 5: For $8^2 + 204^2 = 221^2$, read $85^2 + 204^2 = 221^2$.

P. 115, line 13 from below: For $x^2 + x + y^2 + z^2 = r^2$, read $x^2 + x + y + z = r^2$.
