# Do the Math

Magical Mathematics

The Mathematical Ideas that Animate Great Magic Tricks

Persi Diaconis & Ron Graham
With a foreword by Martin Gardner

"Finally a book that celebrates the math involved in magic. This is quite simply the most brilliant book ever written on this mind-blowing, highly secretive field."
—David Blaine, illusionist

Cloth $29.95 978-0-691-15164-9

A Mathematical Nature Walk

John A. Adam

"[A] snappy guide to the mathematics of the outdoors. . . . A sharp eye and an ingenious mind are at work on every page. . . . Read this book with pencil and paper in hand. Then go forth, enjoy the view, and impress your friends."
—Laurence A. Marschall, *Natural History*

Paper $18.95 978-0-691-15265-3

The Best Writing on Mathematics 2011

Edited by Mircea Pitici
Foreword by Freeman Dyson

This anthology brings together the year's finest mathematics writing from around the world. Featuring promising new voices alongside some of the foremost names in the field, *The Best Writing on Mathematics 2011* makes available to a wide audience many articles not easily found anywhere else. These writings offer surprising insights into the nature, meaning, and practice of mathematics today.

Paper $19.95 978-0-691-15315-5
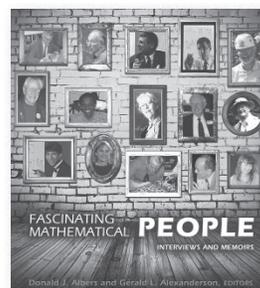

Fascinating Mathematical People

Interviews and Memoirs

Edited by Donald J. Albers & Gerald L. Alexanderson
With a foreword by Philip J. Davis

"*Fascinating Mathematical People* is a wonderfully varied collection. We meet brilliantly successful teachers, authors, a dentist, and two Fields Medal–winning Scandinavians. All of them had surprising side paths and detours on their way to mathematical success."
—Reuben Hersh, coauthor of *Loving and Hating Mathematics*

Cloth $35.00 978-0-691-14829-8
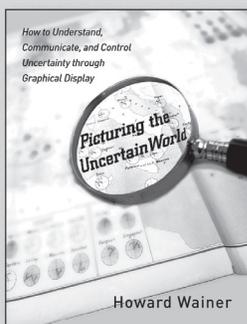

Picturing the Uncertain World

How to Understand, Communicate, and Control Uncertainty through Graphical Display

Howard Wainer

"Wainer's approach is refreshingly different. He has . . . been involved in many policy debates and understands well that the same information can be interpreted in a variety of ways to support widely divergent positions. . . . [This book] makes for very fine reading."
—Michael Goodchild, *American Scientist*

Paper $19.95 978-0-691-15267-7
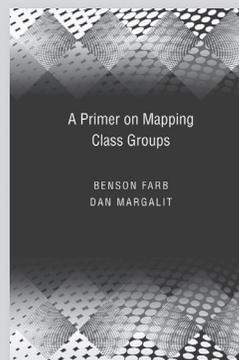

A Primer on Mapping Class Groups (PMS-49)

Benson Farb & Dan Margalit

The study of the mapping class group Mod(S) is a classical topic that is experiencing a renaissance. It lies at the juncture of geometry, topology, and group theory. This book explains as many important theorems, examples, and techniques as possible, quickly and directly, while at the same time giving full details and keeping the text nearly self-contained.
