

Catherine A. Roberts
AMS Executive Director

Dear AMS Members and Friends,

Thank you for your contributions to the American Mathematical Society in 2017. This list celebrates each of you and your support of mathematics.

In this roster are several first-time donors. I offer you a special welcome and thanks for supporting the AMS's work. Also listed are hundreds of dedicated, long-time donors who have provided support for ten, fifteen, twenty years or more. Your ongoing support makes great things happen for the mathematics community. For example, the Savage Charitable Fund has generously supported young mathematics students via the Epsilon Fund for over fifteen years.

"Contributing Members" is a title that refers to those who choose a dues category that includes a charitable gift to the AMS. Your thoughtful support helps with meetings expenses, our Washington, DC, efforts, and much more. Some of you have donated in memory or in honor of someone. You have infused your gifts with special meaning and we celebrate the people you pay tribute to.

The AMS is fortunate to have visionary donors who create or influence major projects such as new prizes, innovative fellowships, special publishing initiatives, and more. In 2017, with gifts from Joan Birman and her late husband Joseph, the Joan and Joseph Birman Fellowship for Women Scholars was established to help mid-career female mathematicians advance their research. Donald E. and Jill Knuth are funding a variety of improvements to MathSciNet® to enhance its usefulness for all of us. An anonymous benefactor continues crucial program support for doctoral students. These offerings serve the AMS mission in exciting and strategic ways, and I join all the beneficiaries in expressing gratitude to these inspiring donors.

Members of the Thomas S. Fiske Society have made a provision for the AMS in their estate plans. In 2017 the AMS was honored to receive gifts from the estates of Cathleen S. Morawetz and Franklin P. Peterson. Their legacy gifts will positively impact mathematicians for years to come.

Everyone on this list, including the donors who wish to remain anonymous, contributes essential support that advances mathematical research and creates fruitful connections within and beyond the AMS community. On behalf of the many people who benefit, I thank you.

Catherine A. Roberts
Executive Director

Thomas S. Fiske Society

Members of the Thomas S. Fiske Society uphold the future of mathematics by including the American Mathematical Society in their estate plans. The following Fiske Society members have created a personal legacy in support of the mathematical sciences by naming the AMS in their will, retirement plan, or other gift planning vehicle.

In Tribute

The following friends, colleagues, and family members are all being specially honored by a donation in support of mathematics. These gifts are a tangible homage to those who have passed on, or a way to honor people still living. The AMS is pleased to list the commemorated individuals and the 2017 donors who made these gifts possible.

AMS Donors

The people and businesses listed below made gifts to the AMS between January 1–December 31, 2017. On behalf of all those who benefit from this generosity, the AMS extends its thanks to everyone who chose to support mathematics through the AMS during the past year. Donors who have contributed \$1,000 or more in one year are further acknowledged on the AMS Donor Wall of Honor at the Society's Headquarters. We are pleased to recognize each donor in the following listing.

Donors to the Epsilon Fund help make great things happen for talented summer mathematics students.

“Three weeks was the longest I’ve ever worked on a math problem...It was a weird experience. Every day I found something new in the problem but the new discovery opened up yet another question to answer...Thank you for the best 3 weeks of my life.”—Camila, participant at Bridge to Enter Advanced Mathematics (BEAM), an Epsilon Fund supported program.
