Solomon Friedberg

Graduate Student Blog

This summer we honor James G. Arthur, former president of the AMS, on the occasion of his 2017 AMS Steele Prize for Lifetime Achievement. Ron Solomon provides a progress report on the classification of all finite simple groups. Solomon Friedberg considers "WHAT IS...the Langlands Program?" And we've got a record number of Letters to the Editor. Relax with us and math.

Q: What do feather boas, cookies, and paper shredders have in common?

A: They are all ingredients that have the potential to help your undergraduate students understand a variety of mathematical concepts. In this book, 43 faculty from a wide range of institutional settings share a total of 64 hands-on activities that allow students to physically engage with mathematical ideas ranging from the basics of precalculus to special topics appropriate for upper-level courses. Purchase of the book also includes access to electronic printable versions of the handouts.
