Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and details of its meetings. It contains some of the officially invited addresses presented before the Society, research announcements and problems, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1960. The subscription price is $7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), $23.50 each; vol. 28 (1922), $19.70; vols. 30–35 (1924–1929), $20.00 each; vols. 36–55 (1930–1949), $28.00 each; vols. 56–64 (1950–1959), $14.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced, and the manuscript should not exceed 12 pages. The greatest possible care should be taken in preparing the manuscript and if necessary the Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to Alex Rosenberg, Lunt Building, Northwestern University, Evanston, Illinois; in probability, real variables, logic, and foundations to P. R. Halmos, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in abstract analysis to either P. R. Halmos or Alex Rosenberg; in geometry and topology to Hans Samelson, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in other branches of analysis, applied mathematics, and all other fields to R. P. Boas, Lunt Building, Northwestern University, Evanston, Illinois. All other communications to the editors should be addressed to the Managing Editor, P. R. Halmos.

One volume of six numbers is planned for 1960. The subscription price is $11.00. Vols. 1–10 (1950–1959) are available at the price of $14.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the Proceedings.

Four volumes of three numbers each will be published in 1960. The price per volume is $8.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) and 78–88 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1–36 (1900–1934), $16.00 each; vols. 37–65, 68–77 (1934–1954), $12.00 each; vols. 66, 67, 78–93 (1949, 1955–1959), $8.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is $50.00. Orders for complete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1–9, 11–16, 18, and 19 are available at the following prices: Vols. 1–14 (1940–1953), $24.00 each; all other volumes $50.00.
Books Published by the
American Mathematical Society

Colloquium Publications

37. N. Jacobson, Structure of rings, 1956, viii, 263 pp. $7.70
18. M. Morse, The calculus of variations in the large, 1934; reprinted, 1947, x, 368 pp.

Mathematical Surveys

6. C. Chevalley, Introduction to the theory of algebraic functions of one variable, 1951, xii, 188 pp. $4.00

The price to members of the American Mathematical Society is 25% less than list. Volumes which are not listed above are out of print.
CONTENTS

Vol. 11, No. 1  FEBRUARY, 1960  Whole No. 61

Some boundary properties of function algebras. By H. S. Bear........ 1
Intrinsic characterizations of some additive functors. By C. E. Watts. 5
Modularity relations in lattices. By R. J. Mihalek.................... 9
Upper and lower complementation in a modular lattice. By S. P.
Avann........................................... 17
Finite dimensional central division algebras. By S. A. Amitsur...... 28
On the absolute summability of a Fourier series and its conjugate
series. By F. C. Hsiang.................................. 32
Compact linear transformations. By C. T. Taam........................ 39
Algebraic division ring extensions. By Carl Faith...................... 43
Functional equations involving a parameter. By M. Altman............ 54
An uncountable set of incomparable degrees. By J. R. Shoenfield... 61
The existence of surfaces of constant mean curvature with arbitrary
Jordan curves as assigned boundary. By Helmut Werner.............. 63
On complete semimodules. By V. R. Hancock............................ 71
Sums of stationary random variables. By E. A. Robinson.............. 77
On closed operators with closed range. By J. T. Joichi............... 80
Hausdorff transforms of bounded sequences. By J. H. Wells.......... 84
Lipschitzian parameterizations and existence of minima in the calculus
of variations. By G. M. Ewing.................................. 87
The Taylor and other methods of summability. By D. E. Moser........ 90
Hausdorff-analytic functions of matrices. By W. O. Portmann......... 97
A sufficient condition for a matric function to be a primary matric func-
tion. By W. O. Portmann..................................... 102
A martingale inequality and the law of large numbers. By Y. S. Chow 107
Characterizations of convex sets by local support properties. By F. A.
Valentine.................................................. 112
On the primitivity of Hopf algebras over a field with prime character-
istic. By Edward Halpern..................................... 117
Some global properties of hypersurfaces. By R. E. Stong.............. 126
Immersion of manifolds of nonpositive curvature. By Barrett
O'Neill..................................................... 132
Generalized cells in generalized manifolds. By K. W. Kwun and Frank
Raymond.................................................. 135
Existence of invariant bases. By Ellis Kolchin and Serge Lang...... 140
Imbedding decompositions of $E^3$ in $E^4$. By R. H. Bing and M. L.
Curtis...................................................... 149
On a problem of Wolk in interval topologies. By T. Naito.............. 156

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN
