Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1963. The subscription price is $7.00. The prices of back volumes, as far as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), $23.50 each; vol. 28 (1922), $19.70; vols 30–35 (1924–1929), $20.00 each; vols. 36–55 (1930–1949), $28.00 each; vols. 56–68 (1950–1962), $14.00.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department. Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary the Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ALEX ROSENBERG, Department of Mathematics, Cornell University, Ithaca, New York or GEORGE WHAPLES, Department of Mathematics, Indiana University, Bloomington, Indiana; in probability, real variables, logic, and foundations to P. R. HALMOS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan; in abstract analysis to either P. R. HALMOS or ALEX ROSENBERG; in geometry and topology to ELDON DYER, Eckhart Hall, University of Chicago, Chicago 37, Illinois; in other branches of analysis, applied mathematics, and all other fields to M. H. HEINS, Department of Mathematics, University of Illinois, Urbana, Illinois or FRIEDRICH JOHN, Institute of Mathematical Sciences, 4 Washington Place, New York 3, New York. All other communications to the editors should be addressed to the Managing Editor, Alex Rosenberg. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, 190 Hope Street, Providence 6, Rhode Island.

One volume of six numbers is planned for 1963. The subscription price is $11.00. Vols. 1–13 (1950–1962) are available at the price of $14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1963. The price per volume is $8.00. All inquiries for volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for volumes 70–106 should be directed to the American Mathematical Society; the price for back issues insofar as they are available is $4.00 per issue (vols. 78–89 contain 2 issues, volumes 70–77 and 90–108 contain 3 issues).

The PROCEEDINGS of the AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 190 Hope Street, Providence 6, R. I.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1963, Volume 25 and Volume 26. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Subscription price per volume of 7 issues is $50.00; 2 volumes per year $100.00.
Back issues: volumes 1–16 (1940–1955) $42.00 per volume; volumes 17–24 (1956–1962) $50.00 per volume.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the Doklady Akademii Nauk SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet Doklady. (The Doklady Akademii Nauk SSSR is issued three times a month, six issues constituting a volume.)

Current subscriptions are as follows: Domestic, $17.50; foreign, $20.00. Single issues are $5.00. Volumes 1, 2, 3, and 4 (1960–1963) are available at $30.00 per volume or $5.00 per issue.

Chinese Mathematics—Acta

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

The subscription price is $7.00 per annual volume of seven numbers. A single copy is $2.00. Orders for back volumes (back issues of the last two years only are available) are $14.00 per volume.

All communications should be addressed to the Editor, 190 Hope Street, Providence 6, Rhode Island. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields. Published by the Society for the National Academy of Sciences-National Research Council.

Subscription price is $8.00 per volume of 4 issues. Single copies are $2.50. Back issues insofar as they are available are as follows: 1943–1947, $1.00 per issue; 1948–1949, $1.25 per issue; 1950–1958, $1.50 per issue (or $5.00 per volume); 1959–1961, $2.50 per issue (or $8.00 per volume).
CONTENTS

Vol. 14, No. 5 OCTOBER, 1963 Whole No. 83

On a related function theorem. By E. B. Leach ............... 687
A variation on the Stone-Weierstrass theorem. By R. I. Jewett .. 690
Weak convergence of stochastic processes defined on semi-infinite time intervals. By Charles Stone .......... 694
Σ-symmetric locally convex spaces. By D. E. Edmunds ........ 697
On finitely additive set functions. By S. P. Lloyd ............ 701
A note on the representation of a-complete Boolean algebras. By C. R. Karp ........... 705
Convergence, density, and r-density of bounded sequences. By R. A. Raimi ... 708
Divergence of approximating polynomials. By P. C. Curtis, Jr. . 713
A note on ergodic transformations. By J. R. Blum and D. L. Hanson ... 718
On the maximal ergodic theorem for Abel-limits. By G.-C. Rota .... 722
On subgroup commutators. By M. F. Newman ....... 724
Remarks on balanced incomplete block designs. By E. T. Parker .......... 729
A supplement to Parker's "Remarks on balanced incomplete block designs." By Esther Seiden ... 731
Products of indecomposable, aperiodic, stochastic matrices. By J. Wolfowitz 733
Remark on a characterization of certain ring class fields by their absolute Galois group. By Chr. U. Jensen ...... 738
On minimal sets of generators of purely inseparable field extensions. By P. T. Rygg .... 742
On the homological dimension of certain ideals. By R. E. MacRae .... 746
Concerning a theorem of L. K. Hua and I. Reiner. By Peter Stanek .... 751
The Euler φ function for generalized integers. By E. M. Horadam ... 754
Algebras split by a given purely inseparable field. By Klaus Hoechsmann ........ 768
Rings in which the unique primary decomposition theorem holds. By R. W. Gilmer .... 777
On groups with enough finite representations. By D. S. Passman .......... 782
Certain problems of differentiable imbedding. By Yasuro Tomonaga ... 787
New proof of the generalized Chinese Remainder Theorem. By A. S. Fraenkel ... 790
A note on unary algebras. By John Marica .......... 792
Some uses of the second conformal structure on strictly convex surfaces. By Tilla Klotz ........ 793
A note on the homology of deleted product spaces. By C. W. Patty .... 800
Imbedding and immersion of real projective spaces. By J. Levine .... 801
A note on metrization of Moore spaces. By D. R. Traylor .......... 804
A note on absolute Gp-spaces. By M. Reichaw-Reichbach .... 806
Differential operators with a purely continuous spectrum. By Kurt Kreith .... 809
Two convolution transforms which are inverted by convolutions. By D. V. Widder ... 812
The circulation of vector fields. By V. L. Shapiro .... 818
An integral inequality. By Dallas Banks .......... 823
Bounds for the solutions of a class of nonlinear partial differential equations. By Zeev Nehari .... 829
Column sequences in Hausdorff matrices. By J. D. Buckholtz .......... 837
The zeros of infrapolynomials with prescribed values at given points. By J. L. Walsh and O. Shisha ........ 839

SHORTER NOTES

A note on free algebras. By R. S. Pierce ........ 845

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN
