Journals Published by the
American Mathematical Society

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1965, Volume 29 and Volume 30. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the Doklady Akademii Nauk SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet Doklady. (The Doklady Akademii Nauk SSSR is issued three times a month, six issues constituting a volume.)

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P. O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Contents—Continued from back cover

Prime rings with maximal annihilator and maximal complement right ideals. By Kwangil Koh and A. C. Mewborn ............................................................. 1073
Analytic functions in Banach spaces. By E. F. Whittlesey ........................................ 1077
Maximal quotient rings. By Carl Faith and Yuzo Utumi ........................................... 1084
The Schnirelmann density of the k-free integers. By R. L. Duncan ............................ 1090
On a problem connected with the Vandermonde determinant. By J. Kiefer and J. Wolfowitz ................................................................. 1092
Reflexive semigroups. By R. O. Pulp and Paul Hill ............................................... 1096
Prime matrix rings. By R. E. Johnson ................................................................. 1099
Powers in eighth-groups. By Seymour Lipschutz ...................................................... 1105
On a class of Lie algebras. By R. H. Oehmke ......................................................... 1107
Commutative algebras satisfying an identity of degree four. By J. M. Osborn ........ 1114
Some properties of localization and normalization. By Joseph Lipman .................. 1120
Symmetry for the enveloping algebra of a restricted Lie algebra. By J. R. Schue .......... 1123
Representations of Lie algebras by normal operators. By Thomas Sherman ........... 1125

SHORTER NOTES

A note on a theorem of I. Niven. By W. J. Leahey .................................................. 1130
A matrix version of Rennie's generalization of Kantorovich's inequality. By B. Mond ... 1131
Note on a property of the elementary symmetric functions. By J. N. Darroch and Jane Pitman ................................................................. 1132
A note on addition chains. By C. T. Whittburn ...................................................... 1134
CONTENTS

Vol. 16, No. 5  OCTOBER, 1965  Whole No. 95

Radii of star-likeness and close-to-convexity. By M. S. Robertson  847
Lower bounds for solutions of hyperbolic inequalities. By Hajimu Ogawa  853
Partial differential equations and difference equations. By LEOPOLD FLATTO  858
Harnack's and Weyl's inequalities. By MARVIN MARCUS  864
L(ρ)-sets for Walsh series. By V. L. SHAPIRO  867
Pairs of Carleman-type integral equations. By R. C. MAC CAMY  871
A remark on an arithmetic theorem of Chevalley. By H. BASS  875
On a class of holomorphic functions. By NICOLAS ARTEMIDIAS  879
Comparison theorems for elliptic differential equations. By COLIN CLARK and C. A. SWANSON  886
Local trajectory equivalence of differential systems. By COURTNEY COLEMAN  890
On the inversion of matrices and linear operators. By W. V. PETRYSHYN  893
On differential equations of mode 2. By J. C. C. NITSCHER  897
An abstract formulation of some theorems on cluster sets. By ULYSSES HUNTER  909
On the lifting property. By W. F. DONOHUE, JR.  913
Inequalities and a limit theorem for certain Wiener Integrals. By J. YEH  915
The estimation of some determinants of Toeplitz-type. By H. O. POLLAK and L. A. SHEPP  919
A note on indefinite integrals. By M. H. Taibleson  923
On a note of Marcus concerning a problem posed by Frink. By R. B. DARST and R. E. ZINK  926
Convergence of closed subsets in a topological space. By E. G. EFFROS  929
On the continuous function space of a basically disconnected space. By D. B. GOODNER  932
Stationary sets and determining sets for certain classes of Darboux functions. By A. M. BRUCKNER and J. LEONARD  935
The Shilov boundary of the algebra of measures on a group. By J. L. TAYLOR  941
A representation theorem for a continuous linear transformation on a space of continuous functions. By D. H. TUCKER  946
Counterexample to the Morse-Sard theorem in the case of infinite-dimensional manifolds. By IVAN KUTKA  950
The degree of approximation by linear operators. By P. C. CURTIS, JR.  957
Ergodic and spectral analysis of certain infinite measure preserving transformations. By WILLIAM PARRY  960
A Choquet boundary for the product of two compact spaces. By M. W. GROSSMAN  967
On a problem of G. E. Sacks. By A. H. LACHLAN  972
The spectrum of an operator in Banach space. By M. D. GEORGE  980
An invariance theorem for representations of Banach algebras. By L. T. GARDNER  983
On the existence of [Schauder] decompositions in Banach spaces. By B. L. SANDERS  987
An approximation theorem for a class of operators. By G. K. LEAF  991
A note on normal dilations. By ARNOLD LEBOW  995
Minkowskian distribution of discs. By L. FEJES TÓTH  999
Homology of deleted products in dimension one. By A. H. COPELAND, JR.  1005
On the combinatorial Schoenflies conjecture. By ERHARD LUFHT  1008
A compact convex set in $E^n$ whose exposed points are of the first category. By H. H. CORSON  1012
A theorem on homotopically equivalent $(2n+1)$-manifolds. By Y.-F. WONG  1015
Embedding products of chainable continua. By RALPH BENNET  1022
Non-differentiability of retractions of $C^r$ to subvarieties. By M. GILMARTIN  1028
On piecewise linear immersions. By M. W. HIRSCH  1029
A characterization of the almost periodic homeomorphisms on the closed 2-cell. By N. E. POLAND  1031
On points of Jacobian rank &. II. By P. T. CHURCH  1035
Parallel umbilical hypersurfaces. By C. M. FULTON  1039
The ring $C(X)$ determines the category of $X$. By W. W. COMFORT and STELIOS NEGREPONTIS  1041
A note on holonomy. By A. P. WHITMAN and LAWRENCE CONLON  1046
On the existence of the center of a link. By KUNIO MURASUGI  1052
Extreme Hamiltonian circuits. Solution of the convex-even case. By L. V. QUINTAS and FRED SUPINICH  1058
On the invariants of a vector subspace of a vector space over a field of characteristic two. By VERA PLESS  1062
Characterization of totally unimodular matrices. By PAUL CAMION  1068
