Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1965.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to Rthur AP. Mattuck, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139* or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801*; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, 4 Washington Place, New York, New York 10002; in geometry and topology to ELDON DYER, Department of Mathematics, Rice University, Houston, Texas 77001; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850 or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1965. The subscription price is $11.00. Vols. 1–15 (1950–1964) are available at the price of $14.00 each. Volume 1 was published in 1950.

* Please note this change of editor effective January 1966.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for Volumes 70–120 should be directed to the American Mathematical Society.

The PROCEEDINGS of the AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.31, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d, P. L. & R.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
(Act of October 23, 1962; Section 4369, Title 39 United States Code)
1. Date of filing: September 22, 1965
2. Title of Publication: Proceedings of the American Mathematical Society
3. Frequency of issue: Six issues per year
4. Location of known office of publication: P. O. Box 6248, Providence, R. I. 02904
5. Location of the headquarters or general business office of the publishers: P. O. Box 6248, Providence, R. I. 02904
7. Owner: None
8. Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities: None

I certify that the statements made by me above are correct and complete.—Gordon L. Walker
Journals Published by the American Mathematical Society

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1965, Volume 29 and Volume 30. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the Doklady AkademiÍ Nauk SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet Doklady (The Doklady AkademiÍ Nauk SSSR is issued three times a month, six issues constituting a volume.)

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P. O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Contents—Continued from back cover

Nonsingular path fields on compact topological manifolds. By R. F. BROWN and EDWARD FADELL...................................................... 1342
Lie groups and products of spheres. By P. G. KUMPEL, JR.............................................. 1350
Contractible complexes in $S^r$. By L. C. GLASER.......................................................... 1357
Hilbert manifolds without epiconjugate points. By NATHANIEL GROSSMAN.......................... 1365
A remark concerning quasi-Probenius rings. By E. A. RUTTER, JR...................................... 1372
On the subgroups of the Picard group. By H. V. WALDINGER........................................... 1373
A cohomology theory for commutative algebras. I. By MICHAEL BARR............................... 1379
A cohomology theory for commutative algebras. II. By MICHAEL BARR............................. 1385
On partially ordered groups satisfying the Riesz interpolation property. By J. R. TELLER...... 1392
On flat extensions of Noetherian rings. By BIRGER IVERSEN.......................................... 1401
A counterexample in differential algebra. By G. M. BERGMAN........................................ 1407
On the characteristic roots of matrices. By D. E. CRABTREE.......................................... 1410
Three results for locally compact groups connected with the Haar measure density theorem. By B. J. MUELLER.......................................................... 1414
Errata to On a realization of a complemented algebra. By P. P. SAWOROTNOW.................... 1417
Errata to Multiple transitivity of primitive permutation groups. By L. A. MACHTINGER....... 1417
Index to Volume 16.......................................................... 1418
