Proceedings of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

1. On January 22, 1975, the Council of the American Mathematical Society voted:

"To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 11 typed pages.

"Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department."

2. On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 81–83 (1981) are $160.00 list; $80.00 member. Combination paper and microform (microfiche or microfilm) subscription prices are $215.00 list; $110.00 member. Microfiche of each issue will be mailed the fastest way before the camera copy is sent to the printer.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–53, $30.00 list, $22.50 member; for Volumes 54–67, $34.00 list, $25.50 member; for Volumes 68–72, $42.00 list, $31.50 member; for Volumes 73–77, $45.00 list, $33.75 member; for Volumes 78–80, $75.00 list, $56.25 member. Beginning with Volume 68, back volumes are available in microfiche or microfilm; volumes before Volume 68 are available in microfilm only. The microfilm may be mounted on spools or in Kodak or 3M cartridges. Only current subscribers are eligible to purchase back volumes on microform. Write to the AMS for a detailed price list.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940

INDEX TO VOLUME 81

“Starred items are Shorter Notes”

Abe, Kinetsu. A characterization of totally geodesic hypersurfaces of $S^{n+1}$ and $CP^{n+1}$, 603.

Andrade, J. F. and Simis, A. A complex that resolves the ideal of minors having $n-1$ columns in common, 217.

Archbold, R. J. A counterexample for commutation in tensor products of $C^*$-algebras, 562.

Arrate, M. A uniqueness criterion for ordinary differential equations in Banach spaces, 421.

Askey, Richard. See Andrews, George E.

Aull, C. E. Approximation of continuous functions on pseudocompact spaces, 490.

Aziz, Abdul and Mohammad, Q. G. Growth of polynomials with zeros outside a circle, 549.

Azoff, Edward A. Spectral multiplicity for tensor products of normal operators, 50.

Azumaya, Goro. Fixed subalgebra of a commutative Frobenius algebra, 213.

Baillon, J. B. and Schöneberg, R. Asymptotic normal structure and fixed points of nonexpansive mappings, 257.

de Bartolomeis, Paolo. See Bedford, Eric.

Bass, Charles D. Some products of topological spaces which are manifolds, 641.

Bedford, Eric and de Bartolomeis, Paolo. Levi flat hypersurfaces which are not holomorphically flat, 575.

Berkson, Earl. Composition operators isolated in the uniform operator topology, 230.

Berner, Andrew J. Spaces with dense conditionally compact subsets, 137.

Borges, Carlos R. A stratifiable $k^*$-space which is not a $k$-space, 308.

Bourgain, Jean and Talagrand, Michel. Dans un espace de Banach reticulé solide, la propriété de Radon-Nikodým et celle de Krein-Milman sont équivalentes, 93.

Boyer, D. and Rangaswamy, K. M. Intersections of pure subgroups in abelian groups, 178.

Brosowski, Bruno and Deutsch, Frank. An elementary proof of the Stone-Weierstrass theorem, 89.

Bunce, John W. The similarity problem for representations of $C^*$-algebras, 409.

Burke, Dennis K. Construction of spaces with a $\omega$-minimal base, 329.

Burke, D. K. and Davis, S. W. Compactifications of symmetrizable spaces, 647.

Cartwright, Donald I., Howlett, Robert B. and McMullen, John R. Extreme values for the Sidon constant, 531.

Charalambous, M. G. Inductive dimension and inverse sequences of compact spaces, 482.

Cheatham, Thomas J. and Stone, David R. Flat and projective character modules, 175.

Chicone, Carmen and Swanson, R. C. A generalized Poincaré stability criterion, 495.

*Choda, Marie. The states associated with approximately inner automorphisms, 343.

*Cohen, Joel E. Convexity of the dominant eigenvalue of an essentially nonnegative matrix, 657.

Cook, R. J. An upper bound for the sum of large differences between prime numbers, 33.

Corwin, Lawrence and Greenleaf, Frederick P. Rationally varying polarizing subalgebras in nilpotent Lie algebras, 27.

Croke, Christopher. The first eigenvalue of the Laplacian for plane domains, 304.

Dannon, Victor. Integral characterizations and the theory of curves, 600.

Darst, Richard B. Convergence of $L_p$ approximations as $p \to \infty$, 433.

Davis, Chandler. Beyond the minimax principle, 401.

Davis, S. W. See Burke, D. K.

Day, Mahlon M. A geometric variant of Bade's theorem on dominating measures, 554.

Deutsch, Frank. See Brosowski, Bruno.

Deveney, James K. and Mordeson, John N. Calculating invariants of inseparable field extensions, 373.

Diamond, Harvey, Kon, Mark and Raphael, Louise. Stable summation methods for a class of singular Sturm-Liouville expansions, 279.

Yost, David. *M-ideals, the strong 2-ball property and some renorming theorems*, 299.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8½" × 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Papers currently being received by the editors will be published in 10-12 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
David Eisenbud, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154

GENERAL ALGEBRA (16 17 18 08)
Robert L. Wilson, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

GROUP THEORY (20)
David M. Goldschmidt, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
Reinhard E. Schultz, Department of Mathematics, Purdue University, West Lafayette, Indiana 47907

REAL VARIABLES (26 28 40)
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, Urbana, Illinois 61801

COMPLEX VARIABLES AND NUMBER THEORY (10 30 32)
W. E. Kirwan, Department of Mathematics, University of Maryland, College Park, Maryland 20742

Differential Equations and Dynamical Systems (33, 34, 35, 39, 49, 58)
George R. Sell, Department of Mathematics, University of Southern California, Los Angeles, California 90007

GENERAL ANALYSIS (41 42 43 44 45)
Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Catherine L. Olsen, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
Robert R. Phelps, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)

SHORTER NOTES
A regular space which is not completely regular. By A. MYSIOR ........................................ 652
Generalizations of certain fundamental results on finite groups. By MORTON E. HARRIS and
DAVID A. SIBLEY ................................................................. 654
Convexity of the dominant eigenvalue of an essentially nonnegative matrix. By JOEL E.
COHEN ............................................................................ 657
Index to Volume 81 ................................................................ 659
## CONTENTS

**Vol. 81, No. 4**  
April 1981  
Whole No. 262

### A. ALGEBRA AND NUMBER THEORY

- Some counterexamples concerning a differential criterion for flatness. By WILLIAM C. BROWN and SARAH GLAZ
- Simple subrings of algebras over fields. By JAN KREMPA
- A simple approach to the analytic continuation and values at negative integers for Riemann's zeta-function. By DAVID GOSS
- Extension of a theorem of Gudder and Schelp to polynomials of orthomodular lattices. By LADISLAV BERAN

### B. ANALYSIS

- Neighborhoods of univalent functions. By STEPHAN RUSCHEWEYH
- Flat Orlicz spaces. By A. J. PACH, M. A. SMITH and B. TURETT
- Extreme values for the Sidon constant. By DONALD I. CARTWRIGHT, ROBERT B. HOWLETT and JOHN R. McMULLEN
- On a problem of Lohwater about the asymptotic behaviour of Nevanlinna's class. By J. S. HWANG
- Essential numerical range in $B(l_1)$. By D. A. LEGG and D. W. TOWNSEND
- A note on continuous dependence of solutions of Volterra integral equations. By MATS GYLLENBERG
- Growth of polynomials with zeros outside a circle. By ABDUL AZIZ and Q. G. MOHAMMAD
- A geometric variant of Bade's theorem on dominating measures. By MAHLON M. DAY
- The minimum of small entire functions. By P. C. FENTON
- A counterexample for commutation in tensor products of C*-algebras. By R. J. ARCHBOLD
- Point-spectrum of semibounded operator extensions. By PALLE E. T. JORGENSEN
- Topological restrictions on double fibrations and Radon transforms. By ERIC TODD QUINTO
- Levi flat hypersurfaces which are not holomorphically flat. By ERIC BEDFORD and PAOLO de BARTOLOMEIS
- A note on periodic solutions in the vicinity of a center. By BAU-SEN DU
- Spherical summability of differentiated multiple Fourier series. By M. J. KOHN
- A note on the factorization of operator valued functions. By TAKAHIKO NAKAZI
- Almost compactness and decomposability of integral operators. By WALTER SCHACHER-MAYER and LUTZ WEIS

### D. GEOMETRY

- Integral characterizations and the theory of curves. By VICTOR DANNON
- A characterization of totally geodesic hypersurfaces of $S^{n+1}$ and $C_{p}^{n+1}$. By KINETSU ABE

### E. LOGIC AND FOUNDATIONS

- The partition property for certain extendible measures on supercompact cardinals. By DONALD H. PELLETIER
- On universal null sets. By E. GRZEGOREK and C. RYLL-NARDZEWSKI

### F. STATISTICS AND PROBABILITY

- Quadratic integration of Gaussian processes. By T. F. LIN

### G. TOPOLOGY

- Finite Borel measures on spaces of cardinality less than $c$. By R. J. GARDNER and G. GRUENHAGE
- Transitivity and the $\gamma$-space conjecture in ordered spaces. By JACOB KOFNER
- Absolute C*-embedding of extremally disconnected spaces. By ALAN DOW
- Some products of topological spaces which are manifolds. By CHARLES D. BASS
- Compactifications of metrizable spaces. By D. K. BURKE and S. W. DAVIS
