Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

1. On January 22, 1975, the Council of the American Mathematical Society voted:
   “To be published in the Proceedings, a paper must be correct, new, nontrivial and
   significant. Further, it must be well written and of interest to a substantial number
   of mathematicians. Piecemeal results, such as an inconclusive step toward an
   unproved major theorem or a minor variation on a known result, are in general not
   acceptable for publication. Proceedings Editors shall solicit, and encourage publica-
   tion of, worthy papers of length not exceeding 11 typed pages.

   “Very short notes not to exceed two printed pages are also accepted, and appear
   under the heading SHORTER NOTES. Items deemed suitable include an elegant new
   proof of an important and well-known theorem, an illuminating example or counter-
   example, or a new viewpoint on familiar results. New results, if of a brief and
   striking character, might also be acceptable, though in general a paper which is
   merely very short will not be suitable for the SHORTER NOTES department.”

2. On January 23, 1979, the Council of the American Mathematical Society
   abolished blind refereeing as a policy for the Proceedings, but decided that any
   author who so requests and who provides a blind copy of a manuscript will have the
   manuscript refereed blind.

   Two copies of a manuscript should be submitted. If blind refereeing is intended,
   one should be complete and one blind, and then the latter will be sent to the referee
   without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL
SOCIETY is published monthly. Subscription prices for Volumes 84–86 (1982) are $190.00 list; $95.00
member. Combination paper and microform (microfiche or microfilm) subscription prices are $254.00
list; $127.00 member. Microfiche of each issue will be mailed the fastest way before the camera copy is
sent to the printer.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–77, $52.00
list, $39.90 member; for Volumes 78–83, $84.00 list, $63.00 member. Beginning with Volume 68, back
volumes are available in microfiche or microfilm; volumes before Volume 68 are available in microfilm
only. The microfilm may be mounted on spools or in Kodak or 3M cartridges. Only current subscribers
are eligible to purchase back volumes on microform. Write to the AMS for a detailed price list.

Subscriptions and orders for publications of the American Mathematical Society should be addressed
to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders
must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248,
Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by
the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904.
Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address
changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248,
Providence, R. I. 02940.

Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8 1/2" × 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Papers currently being received by the editors will be published in 10–12 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

**LOGIC AND FOUNDATIONS (03 04)**
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**COMBINATORICS AND DISCRETE MATHEMATICS (05 15)**
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

**COMMUTATIVE ALGEBRA (06 11 13 14 15 18)**
William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**GENERAL ALGEBRA (16 17 18 08)**
Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

**GROUP THEORY (20)**
David M. Goldschmidt, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

**ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)**
Reinhard E. Schultz, Department of Mathematics, Purdue University, West Lafayette, Indiana 47907

**REAL VARIABLES (26 28 40)**
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, Urbana, Illinois 61801

**COMPLEX VARIABLES AND NUMBER THEORY (10 30 31 32)**
W. E. Kirwan, Department of Mathematics, University of Maryland, College Park, Maryland 20742
Lawrence A. Zalcman, Department of Mathematics, University of Maryland, College Park, Maryland 20742

**DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 35 39 49 58)**
George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

**GENERAL ANALYSIS (41 42 43 44 45)**
Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

**FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)**
Catherine L. Olsen, Department of Mathematics, State University of New York at Buffalo, Buffalo, New York 14214

**FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)**
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

**COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)**
Donald E. Sarason, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

**LIE GROUPS AND GEOMETRY (22 51 53)**
Jeff Cheeger, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

**GENERAL TOPOLOGY (54)**
David J. Lutzer, Department of Mathematics, Texas Tech University, Lubbock, Texas 79409
Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

**PROBABILITY AND OTHER FIELDS (60-99 inclusive)**
Thomas G. Kurtz, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

All other communications should be addressed to the Managing Editor, Richard R. Goldberg, at the above address.

ABCDEFGHJ-AMS-898765432
CONTENTS—Continued from back cover

A solution to a problem of Eilenberg concerning dimension lowering mappings. By JAMES KESLING and DAVID C. WILSON ................................................................. 159

A pathological area preserving $C^\infty$ diffeomorphism of the plane. By MICHAEL HANDEL .......... 163

A nonmetric indecomposable homogeneous continuum every proper subcontinuum of which is an arc. By ANDRZEJ GUTEK and CHARLES L. HAGOPIAN ........................................... 169

Proper pseudocompact extensions of compact Abelian group topologies. By W. W. COMFORT and LEWIS C. ROBERTSON .............................................................. 173

Integral polynomial generators for the homology of $BSU$. By STANLEY O. KOCHMAN .......... 179

SHORTER NOTES

Gauss-Bonnet theorems for noncompact surfaces. By STEVEN ROSENBERG ......................... 184

Differentiability of convex functions and Rybakov's theorem. By RUSSELL G. BILYEYU and PAUL W. LEWIS ............................................................ 186

Erratum to "Characterization of $(r, s)$-adjacency graphs of complexes". By M. L. GARDNER and F. HARARY .......................................................... 188
CONTENTS
Vol. 86, No. 1 September 1982 Whole No. 279

A. ALGEBRA AND NUMBER THEORY

On graded rings with finiteness conditions. By V. P. CAMILLO and K. R. FULLER................. 1
A note on linear systems on K-3 surfaces. By ALLEN TANNENBAUM.............................. 6
An inequality for invariant factors. By ROBERT C. THOMPSON.................................. 9
Cyclic relations and the Goldberg coefficients in the Campbell-Baker-Hausdorff formula. By
ROBERT C. THOMPSON........................................... 12
Asymptotic evaluation of Gauss polynomials. By PATRICK X. GALLAGHER, L. THOMAS
RAMSEY and BENJAMIN B. WELLS........................................ 15
A result on the set-theoretic complete intersection problem. By T. T. MOH........................... 19
Middle nucleus = center in semiprime Jordan algebras. By KEVIN McCRIMMON and NG
SEONG NAM...................................................... 21
The global dimension of FBN rings with enough clans. By ROBERT F. DAMIANO...................... 25
Composition factors for indecomposable modules. By DIETER HAPPEL.............................. 29

B. ANALYSIS

On Littlewood's conjecture for univalent functions. By D. H. HAMILTON.......................... 32
On the location of the zeros of the derivative of a polynomial. By J. BRIAN CONREY and LEE
A. RUBEL.......................................................... 37
On the Hahn-Banach extension property. By JONATHAN M. BORWEIN.............................. 42
An example for factorization theory in Banach algebras. By P. G. DIXON........................... 47
The left regular *-representation of an inverse semigroup. By J. R. WORDINGHAM................ 52
Certain Schur-Hadamard multipliers in the spaces $C_p$. By JONATHAN ARAYZ...................... 59
Measure-theoretic quantifiers and Haar measure. By RUSSLELYONS................................. 62
On zero sets for the ball algebra. By H. ALEXANDER.................................................. 71
On Dini's theorem and a metric on $C(X)$ topologically equivalent to the uniform metric. By
GERALD BEER.................................................. 75
Cone lattices of upper semicontinuous functions. By GERALD BEER................................. 81
Topologies of pointwise convergence on families of extremal points and weak compactness. By
IAN TWEDDLE...................................................... 85
Attractors with positively Lyapunov stable trajectories. By TADEUSZ NADZIEJA.................... 87
Completely bounded maps on $C^*$-algebras and invariant operator ranges. By VERN I.
PAULEN........................................................... 91
Recoverability of some classes of analytic functions from their boundary values. By AHMED I.
ZAYED........................................................... 97

D. GEOMETRY

On the minimal eigenvalue of the Laplacian operator for $p$-forms in conformally flat Riemann-
ian manifolds. By DOMENICO PERRONE............... .................................................. 103
Quantitative Helly-type theorems. By IMRE BÁRÁNY, MEIR KATCHALSKI and JANOS
PACH............................................................ 109
Riemannian metrics induced by two immersions. By M. do CARMO and M. DAJCZER.............. 115
Simple geodesics on Riemann surfaces. By TROELS JORGENSEN..................................... 120
A characteristic property of the sphere. By GIACOMO SABAN....................................... 123

E. LOGIC AND FOUNDATIONS

Weakly homogeneous models. By ANAND PILLAY.................................................. 126

F. STATISTICS AND PROBABILITY

Quasi-continuous functions associated with a Hunt process. By YVES LE JAN..................... 133
A singular stochastic integral equation. By DAVID NUALART and MARTA SANZ..................... 139

G. TOPOLOGY

Every two-generator knot is prime. By F. H. NORWOOD........................................ 143
There exist arbitrarily many different disk knots with the same exterior. By L. R. HITTI and
D. W. SUMNERS................................................ 148
When is a Kirillov orbit a linear variety? By RAINER FELIX...................................... 151
Uniformly contractive fixed points in compact metric spaces. By SOLOMON LEADER............. 153
