Proceedings of the American Mathematical Society
This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

1. On January 22, 1975, the Council of the American Mathematical Society voted:
   “To be published in the Proceedings, a paper must be correct, new, nontrivial and
   significant. Further, it must be well written and of interest to a substantial number
   of mathematicians. Piecemeal results, such as an inconclusive step toward an
   unproved major theorem or a minor variation on a known result, are in general not
   acceptable for publication. Proceedings Editors shall solicit, and encourage publica-
   tion of, worthy papers of length not exceeding 11 typed pages.

   “Very short notes not to exceed two printed pages are also accepted, and appear
   under the heading SHORTER NOTES. Items deemed suitable include an elegant new
   proof of an important and well-known theorem, an illuminating example or counter-
   example, or a new viewpoint on familiar results. New results, if of a brief and
   striking character, might also be acceptable, though in general a paper which is
   merely very short will not be suitable for the SHORTER NOTES department.”

2. On January 23, 1979, the Council of the American Mathematical Society
abolished blind refereeing as a policy for the Proceedings, but decided that any
author who so requests and who provides a blind copy of a manuscript will have the
manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended,
one should be complete and one blind, and then the latter will be sent to the referee
without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL
SOCIETY is published monthly. Subscription prices for Volumes 90–92 (1984) are $250.00 list; $125.00
member. A late charge of 10% of the subscription price will be imposed upon orders received from
nonmembers after January 1 of the subscription year. Subscribers outside the United States and India
must pay a postage surcharge of $10.00; subscribers in India must pay a postage surcharge of $28.00.
Combination paper and microfiche subscription prices are $333.00 list; $167.00 member. Microfiche of
each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm
subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann
Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 1–89, $110.00
list, $83.00 member. Back volumes may be purchased on microfilm or microfiche from University
Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed
to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders
must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248,
Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by
the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904.
Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address
changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248,
Providence, R.I. 02940

The paper used in this journal is acid-free and falls within the guidelines
established to ensure permanence and durability.

Information on Copying and Reprinting can be found at the back of this journal
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8½” × 11”) pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

   2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

   3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

   REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

   GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

   PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author’s paper for publication dependent upon payment of the page charge.

   BACKLOG. 50 pages. Papers currently being received by the editors will be published in 9–11 months.

   COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

   Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

   The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

**LOGIC AND FOUNDATIONS (03 04)**
Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**COMBINATORICS AND DISCRETE MATHEMATICS (05 15)**
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

**COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)**
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

**COMMUTATIVE ALGEBRA (06 12 14 15 18)**
William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

**GENERAL ALGEBRA (16 17 18 08)**
Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

**GROUP THEORY (20)**
Bhama Srinivasan, Department of Mathematics, University of Illinois, Chicago, Illinois 60680

**ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)**
Haynes R. Miller, Department of Mathematics, University of Washington, Seattle, Washington 98195

**REAL VARIABLES (26 28 40)**
J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, Urbana, Illinois 61801

**COMPLEX VARIABLES (30 31 32)**
Irwin Kra, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

**NUMBER THEORY (10)**
Larry J. Goldstein, 2 Redgate Court, Silver Spring, Maryland 20904

**ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)**
George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

**PARTIAL DIFFERENTIAL EQUATIONS (35 49)**
Walter Littman, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

**GENERAL ANALYSIS (41 42 43 44 45)**
Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

**FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)**
Catherine L. Olsen, Department of Mathematics, State University of New York at Buffalo, Buffalo, New York 14214

**FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)**
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

**COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)**
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

**LIE GROUPS AND GEOMETRY (22 51 53)**
David G. Ebin, Department of Mathematics, University of California, Los Angeles, California 90024

**GENERAL TOPOLOGY (54)**
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056
Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

**PROBABILITY AND CERTAIN OTHER FIELDS (60–99 inclusive)**
Bert E. Fristedt, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455
Daniel W. Stroock, University of Colorado, Box 426, Boulder, Colorado 80309

All other communications should be addressed to the Managing Editor, J. Jerry Uhl, Jr., at the above address.

CONTENTS

Vol. 91, No. 3    July 1984    Whole No. 301

A. ALGEBRA AND NUMBER THEORY

Applications of the joint angular field of values. By George Phillip Barker .......... 331
Relations for Grothendieck groups of artin algebras. By Maurice Auslander .......... 336
Solvable linear groups over division rings. By Robert L. Snider ...................... 341
The conjugacy problem for graph products with central cyclic edge groups. By K. J. Horadam ...................................................... 345
On units of certain cubic fields and the Diophantine equation $x^3 + y^3 + z^3 = 3$. By Manny Scarowsky ................................. 351
Nilpotency of derivations. II. By L. O. Chng and Jiang Luh ..................... 357
Minimal cyclotomic splitting fields for group characters. By R. A. Mollin .......... 359

B. ANALYSIS

A result concerning additive functions in hermitian Banach *- algebras and an application. By J. Vukman ......................................................... 367
On maxima of Takagi-van-der Waerden functions. By Yoshikazu Baba ............. 373
Topological minimax theorems. By Michael A. Geraghty and Bor-Luh Lin ............ 377
Uniform algebras and projections. By S. J. Sidney ......................................... 381
A coefficient problem of Bombieri concerning univalent functions. By Daoud Bshouty .... 383
$L^p_{\text{loc}}$-boundedness for a class of singular Fourier integral operators. By A. El. Kohener .......... 389
Meromorphic maps in the Nevanlinna class. By R. E. Mollon and G. Patrizio ........ 395
Roots of invertibly weighted shifts with finite defect. By Gerard E. Keough ........ 399
Restriction of spherical representations of $\text{PGL}_2(\mathbb{Q}_p)$ to a discrete subgroup. By Alessandro Figà-Talamanca and Massimo A. Picardello .................. 405
A new class of orthogonal polynomials. By Paul Nevai .................................. 409
Elementary proof of a formula of Ramanujan. By Robert L. Lamphere ............. 416
$P^2(\mu)$ and bounded point evaluations. By Tavan T. Trent and James L. Wang .... 421
Spectra of constructs of a system of operators. By Angel Carrillo and Carlos Hernández ................. 426

D. GEOMETRY

A generalization of a theorem on naturally reductive homogeneous spaces. By Oldřich Kowalski and Lieveen Vanhecke .................... 433

E. LOGIC AND FOUNDATIONS

On partially conservative sentences and interpretability. By Per Lindström .......... 436

G. TOPOLOGY

The fixed point property for continua approximated from within by Peano continua with this property. By Akira Tominaga ........................................... 444
Mappings between Euclidean spaces that are one to one over the image of a dense subset. By Mladen Bestvina and John J. Walsh .............................. 449
Realizing diagrams in the homotopy category by means of diagrams of simplicial sets. By W. G. Dwyer and D. M. Kan ............. 456
On the dimension of limits of inverse systems. By Yukinobu Yajima .......... 461
A note on Ralph Fox's $\gamma$-space. By Hans-Peter A. Künzi ....................... 467
On spaces of maps between complex projective spaces. By Jesper Michael Møller ...... 471
Primitive obstructions in the cohomology of loopspaces. By Frank Williams ......... 477
A characterization of $M_\theta$-spaces. By Heikki J. K. Junnila ...................... 481
Stability theorems for conformal foliations. By Robert A. Blumenthal ............ 485

H. COMBINATORICS

Constructing prime-field planar configurations. By Gary Gordon .................. 492

SHORter NOTES

Invariance of complementary domains of a fixed point set. By M. Brown and J. M. Kister 503
