Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

1. On January 22, 1975, the Council of the American Mathematical Society voted:
   “To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 11 typed pages.

   “Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.”

2. On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 90–92 (1984) are $250.00 list; $125.00 member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $10.00; subscribers in India must pay a postage surcharge of $28.00. Combination paper and microfiche subscription prices are $333.00 list; $167.00 member. Microfiche of each issue will be mailed the fastest way possible before the issue is mailed by the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 1–89, $110.00 list, $83.00 member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940

Printed in the United States of America

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability.

Information on Copying and Reprinting can be found at the back of this journal.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 11 (8½” X 11”) pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics Subject Classification with instructions for its use can be found in the 1978 Subject Index to Mathematical Reviews.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

REPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

BACKLOG. 150 pages. Papers currently being received by the editors will be published in 9-11 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

CONTENTS
Vol. 92, No. 2 October 1984 Whole No. 304

A. ALGEBRA AND NUMBER THEORY

On nilpotent and solvable Malcev algebras. By Ernest L. Stitzinger 157
G-projective groups. By C. Vinsonhaler and W. Wickless 164
Cremona transformations that are affine automorphisms. By Hisao Yoshihara 167
Krull and global dimensions of fully bounded Noetherian rings. By Kenneth A. Brown and R. B. Warfield, Jr. 169
Krull versus global dimension in noetherian P.I. rings. By K. R. Goodearl and L. W. Small 175
Flat covers and flat cotorsion modules. By Edgar Enochs 179

B. ANALYSIS

Smooth solutions of initial-value problems in regions with corners. By E. C. Svendsen 185
Remarks on the parametrized symbol calculus. By Michio Kinoshita 190
Linear maps between certain nonseparable C*-algebras. By Tadasi Huruya 193
Invariants related to the Bergman kernel of a bounded domain in C^n. By Tadayoshi Kanemaru 198
On the injectivity of the attenuated Radon transform. By Alexander Hertle 201
A note on state splitting. By Joel Friedman 206
A wave equation with a possibly jumping nonlinearity. By J. R. Ward, Jr. 209
A characterisation of the Weyl spectrum. By Andrzej Pokrzywa 215
Asymptotics of differential systems with deviating arguments. By William F. Trench 219
Completely bounded homomorphisms of operator algebras. By Vern I. Paulsen 225
A noncompletely continuous operator on L_1(G) whose random Fourier transform is in c_0(\hat{G}). By N. Ghoussoub and M. Talagrand 229
Counterexamples to several problems on the factorisation of bounded linear operators. By N. Ghoussoub and W. B. Johnson 233
On the second dual of the Lorentz space. By Pratibha G. Ghatage and Brian M. Scott 239
On summability of Fourier series at a point. By G. D. Dikshit 245
Factorization of probability measures and absolutely measurable sets. By David Blackwell and Ashok Maitra 251
Dieudonné-Schwartz Theorem in inductive limits of metrisable spaces. By Qiu Jing-Hui 255
L_p smoothness and approximate continuity. By Michael J. Evans and Paul D. Humke 258
A weighted polynomial inequality. By D. S. Lubinsky 263
Singular functions and division in H^\infty + C. By Pamela B. Gorkin 268
A note on hyponormal weighted shifts. By Peng Fan 271
M-accretive operators with M-dispersive resolvents. By Ralph deLaubenfels 273
A chaotic function whose nonwandering set is the Cantor ternary set. By Bau-Sen Du 277

F. STATISTICS AND PROBABILITY

Multiple points of a random field. By Narn Rueih Shieh 279
A strong law of large numbers for martingales. By Shey Shuang Sheu and Yu Shan Yao 283

G. TOPOLOGY

Adding a 2-handle to a 3-manifold: An application to Property R. By William Jaco 288
A characterization of absolutely C*-smooth continua. By C. Wayne Proctor 293
Compact Lie group action and equivariant bordism. By Shabd Sharan Khare 297
A Wallman-type compactification for convergence spaces. By R. J. Gazik, B. H. Park and G. D. Richardson 301
On 2-knot groups with abelian commutator subgroups. By Katsuyuki Yoshikawa 305
Homogeneity is not a Whitney property. By Wlodzimierz J. Charatonik 311
A continuum X which has no confluent Whitney map for 2^X. By Wlodzimierz J. Charatonik 313
